SCHEDULE 2

Essential Composition of Baby Foods for Infants and Young Children

Vitamins

5. Vitamin C—

   In a fruit juice, nectar, or vegetable juice the final content of vitamin C in the product shall be either not less than 6 mg/100 kJ (25 mg/100 kcal) or not less than 25 mg per 100 g.

Vitamin A—

In vegetable juices, the final content of vitamin A in the product shall be not less than 25 µg RE/100 kJ (100 µg RE/100 kcal) and, for the purposes of this paragraph, RE = all trans retinol equivalents.

Vitamin A shall not be added to other baby foods.

Vitamin D—

Vitamin D shall not be added to baby foods.
