STATUTORY INSTRUMENTS

1996 No. 1350

The Radioactive Material (Road Transport) (Great Britain) Regulations 1996

Transport Index (TI) limits

14.—(1) No person shall transport or cause to be transported any package, overpack, tank, freight container or unpackaged LSA-I or SCO-I unless the Transport Index (TI) for that item has been determined by the consignor in accordance with Schedule 17.

(2) Subject to regulation 15, no person shall transport or cause to be transported any package or overpack with a Transport Index (TI) greater than 10 except under exclusive use.

(3) No person shall transport or cause to be transported in a conveyance any radioactive material (other than a consignment consisting entirely of LSA-I material) if the total sum of the Transport Indexes (TI) of the packages, overpacks, tanks and freight containers aboard that conveyance is greater than 50, except under exclusive use.

(4) No person shall transport or cause to be transported in a conveyance under exclusive use any packages or overpacks containing fissile material if the total sum of the Transport Index (TI) of such packages or overpacks is greater than 100.
