EXPLANATORY NOTE

(This note is not part of the Regulations)

These Regulations, which extend to Scotland only, provide for the administration and enforcement of the Community system of classification of beef carcasses as required by Commission Regulation (EEC) No. 344/91 laying down detailed rules for applying Council Regulation (EEC) No. 1186/90 to extend the scope of the Community scale for the classification of carcasses of adult bovine animals (O.J. No. L 41, 14.2.91, p.15).

The Regulations consolidate with minor amendments the Beef Carcase (Classification) Regulations 1991, the Beef Carcase (Classification) (Amendment) Regulations 1994 and the Beef Carcase (Classification) (Amendment) Regulations 1998 which are revoked. In particular they—

- (a) make provision for exemptions from the Community system (regulation 3);
- (b) require every occupier of a regulated slaughterhouse to give the Scottish Ministers particulars of that occupier's business (regulation 4);
- (c) authorise certain carcasses to be identified using labels rather than marks (regulation 5);
- (d) make provision for the granting of classification licences (regulation 6);
- (e) require occupiers of regulated slaughterhouses to keep, retain and produce records (regulation 8);
- (f) give the Meat and Livestock Commission power to carry out classification requirements for regulated carcasses and make provision for its entering into agreements with the occupiers of regulated slaughterhouses for such a purpose (regulation 9);
- (g) confer on authorised officers of the Scottish Ministers powers of entry and inspection for the purpose of ensuring compliance with the Community system and these Regulations, and require that reasonable assistance be given to them at their request (regulations 10 and 11);
- (h) provide for the service of notices (regulation 12); and
- (i) create offences and penalties, and provide for defences (regulations 13 and 14).

In addition, these Regulations introduce provision for granting licences for the use of automated grading equipment for the classification of carcasses (regulation 7) as permitted by Commission Regulation (EC) No. 1215/2003 (O.J. No. L 169, 8.7.03, p.32).

A full Regulatory Impact Assessment has not been prepared for this instrument as it has no impact on the costs of business.
