

Factories Act 1961

1961 CHAPTER 34

PART I

HEALTH (GENERAL PROVISIONS)

2 Overcrowding

- (1) A factory shall not, while work is carried on, be so overcrowded as to cause risk of injury to the health of the persons employed in it.
- (2) Without prejudice to the generality of subsection (1) of this section but subject to subsection (3) thereof, the number of persons employed at a time in any workroom shall not be such that the amount of cubic space allowed for each is less than four hundred cubic feet.
- (3) If the chief inspector is satisfied that, owing to the special conditions under which the work is carried on in any workroom in which explosive materials are manufactured or handled, the application of subsection (2) of this section to that workroom would be inappropriate or unnecessary, he may by certificate exempt the workroom from that subsection subject to any conditions specified in the certificate.
- (4) The Minister may make regulations, as respects any class or description of factory or parts thereof or any process, increasing the number of cubic feet which must under this section be allowed for every person employed in a workroom.
- (5) In calculating for the purposes of this section the amount of cubic space in any room no space more than fourteen feet from the floor shall be taken into account and, where a room contains a gallery, the gallery shall be treated for the purposes of this section as if it were partitioned off from the remainder of the room and formed a separate room.
- (6) Unless the inspector for the district otherwise allows, there shall be posted in the workroom a notice specifying the number of persons who, having regard to the provisions of this section, may be employed in that room.
