

## SCHEDULE 1

### RULES OF HYGIENE

#### Chapter VII

##### Water supply

1. There must be an adequate supply of potable water. This potable water must be used whenever necessary to ensure foodstuffs are not contaminated.
2. Where appropriate, ice must be made from potable water. This ice must be used whenever necessary to ensure foodstuffs are not contaminated. It must be made, handled and stored under conditions which protect it from all contamination.
3. Steam used directly in contact with food must not contain any substance which presents a hazard to health, or is likely to contaminate the product.
4. Water unfit for drinking used for the generation of steam, refrigeration, fire control and other similar purposes not relating to food, must be conducted in separate systems, readily identifiable and having no connection with, nor any possibility of reflux into, the potable water systems.
