Effect of the List of Wastes

3.—(1) Subject to regulation 2(3)(d) and the following provisions of this regulation, the List of Wastes has effect for purposes connected with the regulation of waste and hazardous waste, and in particular for the purposes of—

- (a) the determination of whether a material or substance is a waste or a hazardous waste, as the case may be;
- (b) the classification and coding of wastes and hazardous waste,

and accordingly the List of Wastes and the codes and chapter headings are to be recognised and used for those purposes.

(2) Paragraph (1) is without prejudice to regulations made under section 62A(1) of the Environmental Protection Act 1990(20) or any determination under regulations 8 or 9 of the Hazardous Waste Regulations.

(3) Subject to regulation 2(3)(c), the notes set out in the Introduction to the List have effect for the purposes of—

- (a) the interpretation of the List of Wastes;
- (b) the determination of whether a material or substance is a waste or a hazardous waste, as the case may be; and
- (c) the identification of a waste or hazardous waste, as the case may be.

(4) The different types of wastes in the List of Wastes are fully defined by the six-digit code for the waste and the respective two-digit and four-digit chapter headings, and accordingly, for purposes connected with the regulation of waste or hazardous waste—

- (a) any reference to a waste by its six-digit code as specified in the List of Wastes is to be treated as a reference to that waste; and
- (b) a reference to wastes by the respective two-digit or four-digit chapter heading is a reference to the wastes listed in the List of Wastes under that chapter heading.

(5) Where any provision (howsoever expressed) of an enactment imposes a requirement that the six digit code be given, or authorises any action to be taken or requirement to be dispensed with on condition that the six digit code is given, that requirement or condition shall not be taken to have been complied with unless the code given is the code for the waste, or hazardous waste, as the case may be, in the List of Wastes.

(6) Subject to paragraph (7), a waste marked with an asterisk in the List of Wastes is considered listed in the List of Wastes as a hazardous waste for the purposes of regulation 6(a) of the Hazardous Waste Regulations.

(7) Where a waste marked with an asterisk in the List of Wastes comprises or contains one or more dangerous substances, it is considered a hazardous waste—

(19) S.I. 2002/1689 as amended by S.I. 2004/3386.

(20) 1990 c. 43.

- (a) where the description in the List of Wastes makes no reference to a dangerous substance, regardless of the actual concentration of any dangerous substance present or properties of the waste or that substance;
- (b) where a waste is identified as hazardous by a specific or general reference (howsoever expressed) to dangerous substances, if the concentrations of those substances are such (that is, percentage by weight) that the waste—
 - (i) presents one or more of the hazardous properties; and
 - (ii) in the case of any of the hazardous properties H3 to H8, H10 or H11, satisfies the requirements of regulation 4.

Properties and characteristics of dangerous substances classified as hazardous waste

4. Waste satisfies the requirements of this regulation in respect of any of the properties H3 to H8, H10(21) and H11 of Annex III, where it displays one or more of the following characteristics—

- (a) flash point ≤ 55 °C,
- (b) one or more substances classified(22) as very toxic at a total concentration $\geq 0,1$ %,
- (c) one or more substances classified as toxic at a total concentration ≥ 3 %,
- (d) one or more substances classified as harmful at a total concentration ≥ 25 %,
- (e) one or more corrosive substances classified as R35 at a total concentration ≥ 1 %,
- (f) one or more corrosive substances classified as R34 at a total concentration ≥ 5 %,
- (g) one or more irritant substances classified as R41 at a total concentration ≥ 10 %,
- (h) one or more irritant substances classified as R36, R37, R38 at a total concentration ≥ 20 %,
- (i) one substance known to be carcinogenic of category 1 or 2 at a concentration $\geq 0,1$ %,
- (j) one substance known to be carcinogenic of category 3 at a concentration ≥ 1 %,
- (k) one substance toxic for reproduction of category 1 or 2 classified as R60, R61 at a concentration $\geq 0,5$ %,
- (l) one substance toxic for reproduction of category 3 classified as R62, R63 at a concentration ≥ 5 %,
- (m) one mutagenic substance of category 1 or 2 classified as R46 at a concentration $\geq 0,1$ %,
- (n) one mutagenic substance of category 3 classified as R68 at a concentration ≥ 1 %.

Consequential Amendments

5. Schedule 2 (which makes consequential amendments to secondary legislation) has effect.

(21) In Directive 92/32/EEC amending for the seventh time Directive 67/548/EEC the term 'toxic for reproduction' was introduced. The term 'teratogenic' was replaced by a corresponding term 'toxic for reproduction'. This term is considered to be in line with property H10 in Annex III to Directive 91/689/EEC.

(22) In Directive 92/32/EEC amending for the seventh time Directive 67/548/EEC the term 'toxic for reproduction' was introduced. The term 'teratogenic' was replaced by a corresponding term 'toxic for reproduction'. This term is considered to be in line with property H10 in Annex III to Directive 91/689/EEC.

SCHEDULE 1

Regulation 2(2)(b)

THE LIST OF WASTES — THE ANNEX TO THE LIST OF WASTES DECISION

“ANNEX

List of wastes pursuant to Article 1(a) of Directive 75/442/EEC on waste and Article 1(4) of Directive 91/689/EEC on hazardous waste**Introduction**

1. The present list is a harmonised list of wastes. It will be periodically reviewed on the basis of new knowledge and, in particular, of research results, and if necessary revised in accordance with Article 18 of Directive 75/442/EEC. However, the inclusion of a material in the list does not mean that the material is a waste in all circumstances. Materials are considered to be waste only where the definition of waste in Article 1(a) of Directive 75/442/EEC is met.

2. Wastes included in the list are subject to the provisions of Directive 75/442/EEC except where Article 2(1)(b) of this Directive applies.

3. The different types of wastes in the list are fully defined by the six-digit code for the waste and the respective two-digit and four-digit chapter headings. This implies that the following steps should be taken to identify a waste in the list.

(3.1) Identify the source generating the waste in chapters 01 to 12 or 17 to 20 and identify the appropriate six-digit code of the waste (excluding codes ending with 99 of these chapters). A specific production unit may need to classify its activities in several chapters. For instance, a car manufacturer may find its wastes listed in chapters 12 (wastes from shaping and surface treatment of metals), 11 (inorganic wastes containing metals from metal treatment and the coating of metals) and 08 (wastes from the use of coatings), depending on the different process steps.

Note: separately collected packaging waste (including mixtures of different packaging materials) shall be classified in 15 01, not in 20 01.

(3.2) If no appropriate waste code can be found in chapters 01 to 12 or 17 to 20, the chapters 13, 14 and 15 must be examined to identify the waste.

(3.3) If none of these waste codes apply, the waste must be identified according to chapter 16.

(3.4) If the waste is not in chapter 16 either, the 99 code (wastes not otherwise specified) must be used in the section of the list corresponding to the activity identified in step one.

4. Any waste marked with an asterisk (*) is considered as a hazardous waste pursuant to Directive 91/689/EEC on hazardous waste, and subject to the provisions of that Directive unless Article 1(5) of that Directive applies.

5. For the purpose of this Decision, 'dangerous substance' means any substance that has been or will be classified as dangerous in Directive 67/548/EEC and its subsequent amendments; 'heavy metal' means any compound of antimony, arsenic, cadmium, chromium(VI), copper, lead, mercury, nickel, selenium, tellurium, thallium and tin, as well as these materials in metallic form, as far as these are classified as dangerous substances.

6. If a waste is identified as hazardous by a specific or general reference to dangerous substances, the waste is hazardous only if the concentrations of those substances are such (i.e. percentage by weight) that the waste presents one or more of the properties listed in Annex III to Council Directive 91/689/EEC. As regards H3 to H8, H10 and H11, Article 2 of this

Decision shall apply. For the characteristics H1, H2, H9 and H12 to H14 Article 2 of the present Decision does not provide specifications at present.

7. In line with Directive [1999/45/EC](#) (OJNo. L200, 30.7.1999, p.1), which states in its preamble that the case of alloys has been considered to need further assessment because the characteristics of alloys are such that it may not be possible accurately to determine their properties using currently available conventional methods, the provisions of Article 2 would not apply to pure metal alloys (not contaminated by dangerous substances). This will be so pending further work that the Commission and Member States have taken the commitment to undertake on the specific approach of the classification of alloys. The waste materials which are specifically enumerated in this list, shall remain classified as at present.

8. The following rules for numbering of the items in the list have been used: For those wastes that were not changed, the code numbers from Commission Decision [94/3/EC](#) have been used. The codes for wastes that were changed have been deleted and remain unused in order to avoid confusion after implementation of the new list. Wastes added have been given a code that has not been used in Commission Decision [94/3/EC](#) and Commission Decision [2000/532/EC](#).

EXPLANATORY NOTE

(This note is not part of the Regulations)

These Regulations implement (except for Article 3) in Wales Commission Decision [2000/532/EC](#) (“the List of Wastes Decision”, as amended by Decisions [2001/118/EC](#), [2001/119/EC](#) and [2001/573/EC](#)) which adopted the List of Wastes. A consolidated text of the decision is available at:

http://europa.eu.int/eur-lex/en/consleg/pdf/2000/en_2000D0532_do_001.pdf.

Article 1(a) of the Waste Directive ([75/442/EEC](#)), a consolidated text of which is available at:

http://europa.eu.int/eur-lex/en/consleg/main/1975/en_1975L0442_index.html,

and the first indent of Article 1(4) of the Hazardous Waste Directive ([91/689/EEC](#)); a consolidated text of which is available at:

http://europa.eu.int/eur-lex/en/consleg/pdf/1991/en_1991L0689_do_001.pdf,

require the drawing up of a list of wastes in accordance with the procedure in Article 18 of the Waste Directive. The European Waste Catalogue comprised the lists in Decisions [94/3/EC](#) and [94/904](#) adopted pursuant to Article 1(a) of the Waste Directive and Article 1(4) of the Hazardous Waste Directive; these lists were never formally transposed.

The List of Wastes, which replaced the “European Waste Catalogue”, provides for the classification of wastes and determines, subject as follows, whether they are hazardous wastes.

Regulation 6 of the Hazardous Waste (Wales) Regulations 2005 (“the Hazardous Waste Regulations”) defines hazardous waste for the purpose of implementing the Hazardous Waste Directive in Wales. Paragraph (a) of that regulation provides that a waste is hazardous if it is listed as a hazardous waste in these Regulations. The definition is also used in other Directives (for instance, Directive [1999/31/EC](#) on the landfill of waste and Directive [1996/61/EC](#) concerning integrated pollution prevention and control). Consequential amendments to incorporate this list in these Regulations in the relevant implementing legislation is included in Schedule 11 to the Hazardous Waste Regulations.

Regulation 3(1) of these Regulations provides that the List of Wastes has effect for purposes connected with the regulation of waste and hazardous waste, and in particular for—

- (a) determining whether a material or substance is a waste or a hazardous waste (sub-paragraph (1)(a)); and
- (b) the classification and coding of wastes (sub-paragraph (1)(b)). Regulation 3(3) provides that the Introduction to the List of Wastes has effect for the purposes of interpreting the list, for determining whether a waste is hazardous and in identifying the waste.

Regulation 3(4) gives effect, for the purposes of the regulation of waste and hazardous waste, to the six digit codes and two and four digit chapter headings in the List of Wastes.

Regulation 3(5) provides that any requirement (or condition) in any legislation that the correct six digit code is to be given is only complied with (or satisfied) if the code in the List of Wastes for the waste concerned is given. Regulation 3(6) provides for the asterisk in the List of Wastes to indicate that the waste concerned is hazardous, and regulation 3(7) provides that, where waste is identified as hazardous by reference to dangerous substances, it is only hazardous where the limit value in regulation 4, or Annex III of the Hazardous Waste Directive, is satisfied. Regulation 4 sets out the limit values of concentration contained in Article 2 of the List of Wastes Decision.

Status: This is the original version (as it was originally made).

The List of Wastes refers to substances being hazardous if they contain dangerous substances. A substance is a dangerous substance if it is a dangerous substance pursuant to the Chemicals (Hazard Information and Packaging for Supply) Regulations 2002 (S.I.2002/1689, as amended by S.I. 2004/3386) which implement the Dangerous Substances Directive (67/548/EEC) in Great Britain.
