

# COMMISSION

## COMMISSION DECISION

of 22 June 1998

**on the procedure for attesting the conformity of construction products pursuant to Article 20(2) of Council Directive 89/106/EEC as regards roof coverings, roof-lights, roof windows and ancillary products**

*(notified under document number C(1998) 1598)*

(Text with EEA relevance)

(98/436/EC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Directive 89/106/EEC of 21 December 1988 on the approximation of laws, regulations and administrative provisions of the Member States relating to construction products<sup>(1)</sup>, as amended by Directive 93/68/EEC<sup>(2)</sup>, and in particular Article 13(4) thereof,

Whereas the Commission is required to select, as between the two procedures under Article 13(3) of Directive 89/106/EEC for attesting the conformity of a product, the 'least onerous possible procedure consistent with safety'; whereas this means that it is necessary to decide whether, for a given product or family of products, the existence of a factory-production control system under the responsibility of the manufacturer is a necessary and sufficient condition for an attestation of conformity, or whether, for reasons related to compliance with the criteria mentioned in Article 13(4), the intervention of an approved certification body is required;

Whereas Article 13(4) requires that the procedure thus determined must be indicated in the mandates and in the technical specifications; whereas, therefore, it is desirable to define the concept of products or family of products as used in the mandates and in the technical specifications;

Whereas the two procedures provided for in Article 13(3) are described in detail in Annex III to Directive 89/106/EEC; whereas it is necessary therefore to specify clearly the methods by which the two procedures must be implemented, by reference to Annex III, for each product

or family of products, since Annex III gives preference to certain systems;

Whereas the procedure referred to in point (a) of Article 13(3) corresponds to the systems set out in the first possibility, without continuous surveillance, and the second and third possibilities of point (ii) of section 2 of Annex III, and the procedure referred to in point (b) of Article 13(3) corresponds to the systems set out in point (i) of section 2 of Annex III, and in the first possibility, with continuous surveillance, of point (ii) of section 2 of Annex III;

Whereas the measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Construction,

HAS ADOPTED THIS DECISION:

### *Article 1*

The products and families of products set out in Annex I shall have their conformity attested by a procedure whereby the manufacturer has under its sole responsibility a factory-production control system ensuring that the product is in conformity with the relevant technical specifications.

### *Article 2*

The products set out in Annex II shall have their conformity attested by a procedure whereby, in addition to a factory-production control system operated by the manufacturer, an approved certification body is involved in assessment and surveillance of the production control or of the product itself.

<sup>(1)</sup> OJ L 40, 11. 2. 1989, p. 12.

<sup>(2)</sup> OJ L 220, 30. 8. 1993, p. 1.

*Article 3*

The procedure for attesting conformity as set out in Annex III shall be indicated in mandates for harmonized standards.

*Article 4*

This Decision is addressed to the Member States.

Done at Brussels, 22 June 1998.

*For the Commission*  
Martin BANGEMANN  
*Member of the Commission*

---

*ANNEX I*

**Flat and profiled sheets:**  
**Roofing tiles, slates, stones and shingles:**  
**Factory-bonded composite or sandwich panels:**  
**Rooflights:**  
**Roof windows:**  
**Fascias and soffit boards:**

For all uses, excluding those subject to reaction to fire regulations for products made of materials falling into classes (A, B, C) (\*).

**Mastic asphalt roofing:**  
**Roof pavings:**  
**Roof access systems, walkways and footholds:**  
**Roof safety hooks and anchorages:**  
**Mechanical fixings for roof coverings:**  
**Accessories for roof coverings:**

For all uses.

---

*ANNEX II*

**Flat and profiled sheets:**  
**Roofing tiles, slates, stones and shingles:**  
**Factory-bonded composite or sandwich panels:**  
**Rooflights:**  
**Roof windows:**  
**Fascias and soffit boards:**

For uses subject to reaction to fire regulations for products made of materials falling into classes (A, B, C) (\*).

---

(\*) Materials for which the reaction to fire performance is susceptible to change during production (in general, those subject to chemical modification, e.g. fire retardants, or where changes of composition may lead to changes in reaction to fire performance).

## ANNEX III

*Note: for products having more than one of the intended uses specified in the following families, the tasks for the approved body, derived from the relevant systems of attestation of conformity, are cumulative.*

## PRODUCT FAMILY

**ROOF COVERINGS, ROOFLIGHTS, ROOF WINDOWS AND ANCILLARY PRODUCTS (1/6)****Systems of attestation of conformity**

For the product(s) and intended use(s) listed below, CEN/Cenelec are requested to specify the following system(s) of attestation of conformity in the relevant harmonised standard(s).

Product(s)	Intended use(s)	Level(s) or class(es) (fire resistance)	Attestation of conformity system(s)
Flat and profiled sheets Roofing tiles, slates, stones and shingles Factory-bonded composite or sandwich panels Rooflights Roof windows	For uses subject to resistance to fire regulations (e.g. fire compartmentation)	Any	3

System 3: see CPD Annex III(2)(ii), second possibility.

The specification for the system should be such that it can be implemented even where performance does not need to be determined for a certain characteristic, because at least one Member State has no legal requirement at all for such characteristic (see Article 2(1) of Directive 89/106/EEC and, where applicable, clause 1.2.3 of the interpretative documents). In those cases, the verification of such a characteristic must not be imposed on the manufacturer if he does not wish to declare the performance of the product in that respect.

## PRODUCT FAMILY

**ROOF COVERINGS, ROOFLIGHTS, ROOF WINDOWS AND ANCILLARY PRODUCTS (2/6)****Systems of attestation of conformity**

For the product(s) and intended use(s) listed below, CEN/Cenelec are requested to specify the following system(s) of attestation of conformity in the relevant harmonised standard(s).

Product(s)	Intended use(s)	Level(s) or class(es) (reaction to fire)	Attestation of conformity system(s)
Flat and profiled sheets	For uses subject to reaction to fire regulations	(A, B, C) (*)	1
Roofing tiles, slates, stones and shingles		(A, B, C) (**)	3
Factory-bonded composite or sandwich panels		A (***) , D, E, F	4
Rooflights			
Roof windows			
Fascias and soffit boards			

System 1: see CPD Annex III(2)(i), without audit-testing of samples.

System 3: see CPD Annex III(2)(ii), second possibility.

System 4: see CPD Annex III(2)(ii), third possibility.

(\*) Materials for which the reaction to fire performance is susceptible to change during production (in general, those subject to chemical modification, e.g. fire retardants, or where changes of composition may lead to changes in reaction to fire performance).

(\*\*) Materials for which the reaction to fire performance is not susceptible to change during the production process.

(\*\*\*) Materials of class A that according to Decision 96/603/EC do not require to be tested for reaction to fire.

The specification for the system should be such that it can be implemented even where performance does not need to be determined for a certain characteristic, because at least one Member State has no legal requirement at all for such characteristic (see Article 2(1) of Directive 89/106/EEC and, where applicable, clause 1.2.3 of the interpretative documents). In those cases, the verification of such a characteristic must not be imposed on the manufacturer if he does not wish to declare the performance of the product in that respect.

## PRODUCT FAMILY

**ROOF COVERINGS, ROOFLIGHTS, ROOF WINDOWS AND ANCILLARY PRODUCTS (3/6)****Systems of attestation of conformity**

For the product(s) and intended use(s) listed below, CEN/Cenelec are requested to specify the following system(s) of attestation of conformity in the relevant harmonised standard(s).

Product(s)	Intended use(s)	Level(s) or class(es) (reaction to fire)	Attestation of conformity system(s)
Flat and profiled sheets Roofing tiles, slates, stones and shingles	For uses subject to external fire performance regulations	Products requiring testing	3
Factory-bonded composite or sandwich panels Mastic asphalt roofing Roof pavings Rooflights Roof windows Roof access systems, walkways and footholds Accessories for roof coverings		Products 'deemed to satisfy' without testing (*)	4

System 3: see CPD Annex III(2)(ii), second possibility.

System 4: see CPD Annex III(2)(ii), third possibility.

(\*) To be confirmed in discussions with the Fire Regulators Group.

The specification for the system should be such that it can be implemented even where performance does not need to be determined for a certain characteristic, because at least one Member State has no legal requirement at all for such characteristic (see Article 2(1) of Directive 89/106/EEC and, where applicable, clause 1.2.3 of the interpretative documents). In those cases, the verification of such a characteristic must not be imposed on the manufacturer if he does not wish to declare the performance of the product in that respect.

## PRODUCT FAMILY

**ROOF COVERINGS, ROOFLIGHTS, ROOF WINDOWS AND ANCILLARY PRODUCTS (4/6)****Systems of attestation of conformity**

For the product(s) and intended use(s) listed below, CEN/Cenelec are requested to specify the following system(s) of attestation of conformity in the relevant harmonised standard(s).

Product(s)	Intended use(s)	Level(s) or class(es)	Attestation of conformity system(s)
Flat and profiled sheets Factory-bonded composite or sandwich panels Rooflights Roof windows	For uses contributing to stiffening the roof structure		3

System 3: see CPD Annex III(2)(ii), second possibility.

The specification for the system should be such that it can be implemented even where performance does not need to be determined for a certain characteristic, because at least one Member State has no legal requirement at all for such characteristic (see Article 2(1) of Directive 89/106/EEC and, where applicable, clause 1.2.3 of the interpretative documents). In those cases, the verification of such a characteristic must not be imposed on the manufacturer if he does not wish to declare the performance of the product in that respect.

## PRODUCT FAMILY

**ROOF COVERINGS, ROOFLIGHTS, ROOF WINDOWS AND ANCILLARY PRODUCTS (5/6)****Systems of attestation of conformity**

For the product(s) and intended use(s) listed below, CEN/Cenelec are requested to specify the following system(s) of attestation of conformity in the relevant harmonised standard(s).

Product(s)	Intended use(s)	Level(s) or class(es)	Attestation of conformity system(s)
All roof coverings, rooflights, roof windows and ancillary products	For uses subject to regulations on dangerous substances (*)	—	3

System 3: see CPD Annex III(2)(ii), second possibility.

(\*) In particular, those dangerous substances defined in Council Directive 76/769/EEC, as amended.

The specification for the system should be such that it can be implemented even where performance does not need to be determined for a certain characteristic, because at least one Member State has no legal requirement at all for such characteristic (see Article 2(1) of Directive 89/106/EEC and, where applicable, clause 1.2.3 of the interpretative documents). In those cases, the verification of such a characteristic must not be imposed on the manufacturer if he does not wish to declare the performance of the product in that respect.

## PRODUCT FAMILY

**ROOF COVERINGS, ROOFLIGHTS, ROOF WINDOWS AND ANCILLARY PRODUCTS (6/6)****Systems of attestation of conformity**

For the product(s) and intended use(s) listed below, CEN/Cenelec are requested to specify the following system(s) of attestation of conformity in the relevant harmonised standard(s).

Product(s)	Intended use(s)	Level(s) or class(es)	Attestation of conformity system(s)
Flat and profiled sheets Roofing tiles, slates, stones and shingles Factory-bonded composite or sandwich panels Roof pavings Fascias and soffit boards Mechanical fixings for roof coverings Accessories for roof coverings	For uses other than those specified in families (1/6), (2/6), (3/6), (4/6), (5/6)	—	4
Roof access systems, walkways and footholds Roof safety hooks and anchorages Mastic asphalt roofing Roof windows Rooflights	For uses other than those specified in families (1/6), (2/6), (3/6), (4/6), (5/6)	—	3

System 3: see CPD Annex III(2)(ii), second possibility.

System 4: see CPD Annex III(2)(ii), third possibility.

The specification for the system should be such that it can be implemented even where performance does not need to be determined for a certain characteristic, because at least one Member State has no legal requirement at all for such characteristic (see Article 2(1) of Directive 89/106/EEC and, where applicable, clause 1.2.3 of the interpretative documents). In those cases, the verification of such a characteristic must not be imposed on the manufacturer if he does not wish to declare the performance of the product in that respect.
