

Commission Decision of 8 November 2005 concerning animal health protection measures against swine vesicular disease in Italy (notified under document number C(2005) 4273) (Text with EEA relevance) (2005/779/EC) (repealed)

CHAPTER III

SURVEILLANCE

Article 5

Surveillance in regions recognised as free from swine vesicular disease

1 Italy shall ensure that sampling and checking procedures to detect swine vesicular disease are carried out as set out in paragraphs 2 and 3 in regions recognised as free from that disease.

[^{F12} On holdings where breeding pigs are kept, sampling for serological testing shall be carried out at the following intervals on a random sample of 12 breeding pigs or on all breeding pigs where there are fewer than 12 breeding pigs on the holding:]

- a once a year where the holding mainly produces pigs for slaughter,
- b twice a year in other cases.

3 At assembly centres for pigs, sampling of faeces for virological testing shall be carried out at monthly intervals in every pen where pigs are usually kept.

Textual Amendments

- F1** Substituted by [Commission Decision of 18 December 2006 amending Decision 2005/779/EC concerning animal health protection measures against swine vesicular disease in Italy \(notified under document number C\(2006\) 6574\) \(Text with EEA relevance\) \(2007/9/EC\)](#).

[^{F1}Article 6

Surveillance in regions not recognised as free from swine vesicular disease

1 Italy shall ensure that the sampling and checking procedures to detect swine vesicular disease are carried out as set out in paragraphs 2, 3 and 4 in regions not recognised as free from that disease.

2 On holdings recognised as free from swine vesicular disease where breeding pigs are kept the provisions laid down in Article 5(2) shall apply.

3 On holdings recognised as free from swine vesicular disease where no breeding pigs are kept, sampling for serological testing shall be carried out twice a year on a random sample of 12 pigs or on all pigs where there are fewer than 12 pigs on the holding.

4 At assembly centres for pigs, sampling of faeces for virological testing shall be carried out every two months in every pen where pigs are usually kept.

Status: Point in time view as at 12/01/2007.

Changes to legislation: There are currently no known outstanding effects for the Commission Decision of 8 November 2005 concerning animal health protection measures against swine vesicular disease in Italy (notified under document number C(2005) 4273) (Text with EEA relevance) (2005/779/EC) (repealed), CHAPTER III. (See end of Document for details)

The pigs shall not be moved from the assembly centre until negative results of those tests are available.]
