▼B**COUNCIL DIRECTIVE****of 6 February 1979****on the approximation of the laws of the Member States concerning electrical equipment for use in potentially explosive atmospheres employing certain types of protection**

(79/196/EEC)

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community, and in particular Article 100 thereof,

Having regard to the proposal from the Commission <sup>(1)</sup>,

Having regard to the opinion of the European Parliament <sup>(2)</sup>,

Having regard to the opinion of the Economic and Social Committee <sup>(3)</sup>,

Whereas national legislation in force to ensure the safety of electrical equipment for use in potentially explosive atmospheres differs from one Member State to another, thus constituting a barrier to trade; whereas these laws should therefore be approximated;

Whereas Council Directive 76/117/EEC of 18 December 1975 on the approximation of the laws of the Member States concerning electrical equipment for use in potentially explosive atmospheres <sup>(4)</sup> has in particular set out the inspection procedures which this equipment must satisfy in order to be imported, put on the market and used freely after undergoing the tests and being provided with the mark and marking prescribed;

Whereas Article 4 (4) of Directive 76/117/EEC provides that specific Directives shall specify the harmonized standards applicable in all the Member States in respect of this equipment;

Whereas Article 5 of Directive 76/117/EEC provides that the specific Directives shall expressly indicate which provisions may be adapted to technical progress in accordance with the procedure laid down in Article 7 of that Directive;

Whereas the second subparagraph of Article 8 (1) and Article 9 (5) of Directive 76/117/EEC provide that copies of the certificates of conformity and inspection certificates shall be forwarded to the Member States only; whereas, in order to ensure the free movement of this equipment, the Commission should be able to publish extracts from these certificates in the *Official Journal of the European Communities*; whereas it is therefore necessary that the Commission should also receive such copies;

Whereas Articles 8 (2) and 9 (6) of Directive 76/117/EEC provide for a procedure for withdrawing the certificate; whereas the Member States, the Commission and the party concerned should be informed of such withdrawal and the reasons therefor,

HAS ADOPTED THIS DIRECTIVE:

*Article 1*

This Directive shall apply to electrical equipment for use in a potentially explosive atmosphere which employs one or more of the following types of protection:

<sup>(1)</sup> OJ No C 4, 6. 1. 1978, p. 2.

<sup>(2)</sup> OJ No C 131, 5. 6. 1978, p. 84.

<sup>(3)</sup> OJ No C 269, 13. 11. 1978, p. 45.

<sup>(4)</sup> OJ No L 24, 30. 1. 1976, p. 45.

**▼B**

- oil immersion ‘o’,
- pressurized apparatus ‘p’,
- powder filling ‘q’,
- flameproof enclosure ‘d’,
- increased safety ‘e’,
- intrinsic safety ‘i’,

**▼M4**

- encapsulation ‘m’,
- intrinsically safe electrical systems ‘i’.

**▼B***Article 2*

1. Member States may not, on grounds of safety requirements for the design and construction of electrical equipment, prohibit the sale or free movement or the use, for its proper purpose, of electrical equipment for use in a potentially explosive atmosphere which complies with the provisions of this Directive and of Directive 76/117/EEC, with regard to the safety features covered by this Directive.

2. With regard to safety features not covered in this Directive, national provisions shall continue to apply providing no Community provisions exist.

*Article 3*

For the purposes of this Directive, harmonized standards within the meaning of Article 4 (4) of Directive 76/117/EEC shall mean the standards listed in Annex I hereto.

*Article 4*

1. Electrical equipment for use in potentially explosive atmospheres shall be subject to the procedures laid down in Article 4 (1) of Directive 76/117/EEC. The information communicated to the approved bodies in the context of these procedures shall be treated as confidential.

2. For the purposes of this Directive, the distinctive Community mark referred to in Articles 4 (1) and 10 of Directive 76/117/EEC shall conform to Annex II; this mark shall be affixed to each item of equipment in such a way as to be visible, legible and durable.

3. Member States shall take all necessary measures to prohibit the use on equipment covered by this Directive of markings or inscriptions likely to be confused with the mark shown in Annex II.

*Article 5*

In accordance with Article 5 (1) of Directive 76/117/EEC, the contents of the harmonized standards referred to in Annex I, and Annex II, may be amended by following the procedure laid down in Article 7 of Directive 76/117/EEC.

*Article 6*

1. Within one month of the date of issue of the certificate of conformity or inspection certificate, a copy of the certificate concerned shall be forwarded to the Commission, which shall also receive, on request, copies of the final technical specifications of the equipment and of the inspection records of the tests or inspections which the equipment has undergone. This information shall be treated as confidential.

**▼M3****▼B***Article 7*

1. If, for the reasons put forward in Articles 8 (2) and 9 (6) of Directive 76/117/EEC, the body which has issued the certificate of conformity or inspection certificate withdraws the certificate, it shall

**▼B**

inform the other Member States and the Commission that it has done so. The grounds for such withdrawal shall be given in detail.

►M3

2. Such withdrawals, and refusals to issue a certificate of conformity or inspection certificate, shall be notified forthwith to the party concerned, with an indication of the remedies available to him under the laws in force in the Member States and of the time limits for the exercise of such remedies.

*Article 8*

Member States shall bring into force the provisions necessary to comply with this Directive within 18 months of its notification and shall forthwith inform the Commission thereof.

Member States shall ensure that the texts of the provisions of national law which they adopt in the field covered by this Directive are communicated to the Commission.

*Article 9*

This Directive is addressed to the Member States.

▼ **M6**

## ANNEX I

**HARMONIZED STANDARDS**

The harmonized standards to which equipment must conform, depending on the type of protection, are the European standards referred to in the table below.

**European Standards**

(drawn up by Cenelec, 35 rue de Stassart, B-1050 Brussels)

Number	Title	Edition	Date
EN 50014	Electrical apparatus for potentially explosive atmospheres — General requirements	2	December 1992
EN 50015	Electrical apparatus for potentially explosive atmospheres — Oil immersion 'o'	2	April 1994
EN 50016	Electrical apparatus for potentially explosive atmospheres — Pressurized apparatus 'p'	2	October 1995
EN 50017	Electrical apparatus for potentially explosive atmospheres — Powder filling 'q'	2	April 1994
EN 50018	Electrical apparatus for potentially explosive atmospheres — Flameproof enclosure 'd'	2	August 1994
EN 50019	Electrical apparatus for potentially explosive atmospheres — Increased safety 'e'	2	March 1994
EN 50020	Electrical apparatus for potentially explosive atmospheres — Intrinsic safety 'i'	2	August 1994
EN 50028	Electrical equipment for use in potential explosive atmospheres — Encapsulation 'm'	1	February 1987
EN 50039	Electrical equipment for use in potentially explosive atmospheres — Intrinsically safe electrical systems 'i'	1	March 1980
EN 50050	Electrostatic hand-held spraying equipment	1	January 1986
EN 50053 (part 1)	Hand-held electrostatic paint spray guns with an energy limit of 0,24 mJ and their associated apparatus	1	February 1987 (*)
EN 50053 (part 2)	Hand-held electrostatic powder spray guns with an energy limit of 5 mJ and their associated apparatus	1	June 1989 (*)
EN 50053 (part 3)	Hand-held electrostatic flock spray guns with an energy limit of 0,24 mJ or 5 mJ and their associated apparatus	1	June 1989 (*)

(\*) Only the paragraphs dealing with the construction of apparatus, provided for in standards EN 50053, parts 1, 2 and 3.
