COMMISSION DIRECTIVE 98/98/EC
of 15 December 1998

adapting to technical progress for the 25 time Council Directive 67/548/EEC on the approximation of the laws, regulations and administrative provisions relating to the classification, packaging and labelling of dangerous substances

(Text with EEA relevance)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Directive 67/548/EEC of 27 June 1967 on the approximation of the laws, regulations and administrative provisions relating to the classification, packaging and labelling of dangerous substances ⁽¹⁾, as last amended by Commission Directive 98/73/EC ⁽²⁾, and in particular Article 28 thereof,

Whereas Annex I to Directive 67/548/EEC contains a list of dangerous substances, together with particulars of the classification and labelling procedures in respect of each substance; whereas present scientific and technical knowledge has shown that the list of dangerous substances in that Annex should be adapted; whereas in consequence it is necessary to amend the foreword to Annex I so as to include changes in nomenclature, format of entries, notes relating to the identification, classification and labelling of substances and notes relating to the labelling of preparations; whereas the list of dangerous substances in Annex I contains substances for which specific temporary classification and labelling derogations have been granted to Austria and Sweden by the Act of Accession of Austria, Finland and Sweden; whereas the Act of Accession provides for the review of the classification and labelling requirements of those substances; whereas that review leads to the adaptation of classifications for a number of such substances;

Whereas Annex III to Directive 67/548/EEC contains a list of phrases indicating the nature of special risks attributed to dangerous substances and preparations; whereas it is necessary to introduce new phrases indicating the danger to health of certain substances and preparations;

Whereas Annex IV to Directive 67/548/EEC contains a list of the phrases indicating the safety advice concerning dangerous substances and preparations; whereas it is necessary to revise certain safety advice phrases related to the dangers to health and for the environment; whereas it is necessary to introduce certain safety advice phrases related to the dangers to health; whereas it is also necessary to introduce certain combined phrases relating to the use of dangerous substances and preparations;

Whereas Annex VI to Directive 67/548/EEC contains a guide to the classification and labelling of dangerous substances and preparations; whereas it is necessary to amend this guide;

Whereas the measures provided for in this Directive are in accordance with the opinion of the Committee on the Adaptation to Technical Progress of the Directives for the Elimination of Technical Barriers to Trade in Dangerous Substances and Preparations,

HAS ADOPTED THIS DIRECTIVE:

Article 1

Directive 67/548/EEC is amended as follows.

1. Annex I is amended as follows:
 - (a) the text in Annex 1A to this Directive replaces the corresponding text in the Foreword;
 - (b) the entries in Annex 1B to this Directive replace the corresponding entries;

⁽¹⁾ OJ L 196, 16.8.1967, p. 1.

⁽²⁾ OJ L 305, 16.11.1998, p. 1.

▼B

- (c) the entries in Annex 1C to this Directive are inserted;
 - (d) the entries in Annex 1D to this Directive are deleted.
2. Annex 2 to this Directive is inserted in Annex III.
 3. Annex IV is amended as follows:
 - (a) the phrases in Annex 3A to this Directive replace the corresponding phrases;
 - (b) the phrases in Annex 3B to this Directive are inserted;
 - (c) the combined phrases in Annex 3C to this Directive are inserted.
 4. Annex VI is amended as set out in Annex 4 to this Directive.

Article 2

1. Member States shall bring into force the laws, regulations and administrative provisions necessary to comply with this Directive by 1 July 2000 at the latest. They shall forthwith inform the Commission thereof.

When Member States adopt those provisions, they shall contain a reference to this Directive or be accompanied by such a reference on the occasion of their official publication. Member States shall determine how such reference is to be made.

2. Member States shall communicate to the Commission the main provisions of national law which they adopt in the field covered by this Directive and a correlation table between this Directive and the national provisions adopted.

Article 3

This Directive shall enter into force on the third day following its publication in the *Official Journal of the European Communities*.

Article 4

This Directive is addressed to the Member States.

ANNEX IA

‘FOREWORD TO ANNEX I

Introduction

Annex I is an index of dangerous substances for which harmonised classification and labelling have been agreed at Community level in accordance with the procedure laid down in Article 4(3) of this Directive.

Numbering of entries

Entries in Annex I are listed according to the atomic number of the element most characteristic of the substance's properties. A list of the chemical elements, arranged according to atomic number is shown in Table A. Organic substances, because of their variety, have been placed in the usual classes, as shown in Table B.

The Index number for each substance is in the form of a digit sequence of the type ABC-RST-VW-Y, where:

- ABC is either the atomic number of the most characteristic chemical element (preceded by one or two zeros to make up the sequence) or the usual class number for organic substances,
- RST is the consecutive number of the substance in the series ABC,
- VW denotes the form in which the substance is produced or placed on the market,
- Y is the check-digit calculated in accordance with the ISBN (International Standard Book Number) method.

As an example, the index number for sodium chlorate is 017-005-00-9.

For dangerous substances in the European inventory of existing commercial chemical substance (Einecs, OJ C 146 A, 15.6.1990) the Einecs number is included. This number is a seven-digit system of the type XXX-XXX-X which starts at 200-001-8.

For dangerous substances notified under the provisions of this Directive, the number of the substance in the European list of notified substance (Elincs) is included. This number is a seven-digit system of the type XXX-XXX-X which starts at 400-010-9.

For dangerous substances in the list of ‘No-longer polymers’ (document of the Office for Official Publications of the European Communities, 1997, ISBN 92-827-8995-0), the “No-longer-polymer” number is included. This number is a seven-digit system of the type XXX-XXX-X which starts at 500-001-0.

The Chemical Abstracts Service (Cas) number is also included to assist identification of the entry. It should be noted that the Einecs number includes both anhydrous and hydrated forms of a substance, and there are frequently different Cas numbers for anhydrous and hydrated forms. The Cas number included is for the anhydrous form only, and therefore the Cas number shown does not always describe the entry as accurately as the Einecs number.

Einecs, Elincs, “No-longer-polymer” or Cas numbers are not usually included for entries which comprise more than four individual substances.

Nomenclature

Wherever possible dangerous substances are designated by their Einecs, Elincs or “No-longer-polymer” names. Other substances not listed in Einecs, Elincs or the list of “No-longer-polymers” are designated using an internationally recognised chemical name (e.g. ISO, IUPAC). An additional common name is included in some cases.

Impurities, additives and minor components are normally not mentioned unless they contribute significantly to the classification of the substance.

Some substances are described as a mixture of A and B. These entries refer to one specific mixture. In some cases where it is necessary to characterise the substance put on the market, the proportions of the main substances in the mixture are specified.

Some substances are described with a specific percentage purity. Substances containing a higher content of active material (e.g. an organic peroxide) are not included in the Annex I entry and may have other hazardous properties (e.g. explosive). Where specific concentration limits are shown, these apply to the substance or substances shown in the entry. In particular, in the case of entries which are mixtures of substances or substances described with a specific percentage purity, the limits apply to the substance as described in Annex I and not the pure substance.

Article 23(2)(a) requires that for substances appearing in Annex I, the name of the substance to be used on the label should be one of the designations given in the Annex. For certain substances, additional information has been added in square brackets in

▼B

order to help identify the substance. This additional information need not be included on the label.

Certain entries contain a reference to impurities. An example is index No 607-190-00-X: methyl acrylamidomethoxyacetate (containing $\geq 0,1$ % acrylamide). In these cases the reference in brackets forms part of the name, and must be included on the label.

Certain entries refer to groups of substances. An example is index No 006-007-00-5: "hydrogen cyanide (salts of ...) with exception of complex cyanides such as ferrocyanides, ferricyanides and mercuric oxycyanide". For individual substances covered by these entries, the Eines name or another internationally recognised name must be used.

Format of entries

The following information is given for each substance in Annex I:

- (a) *the classification:*
- (i) the process of classification consists of placing a substance in one or more categories of danger (as defined in Article 2(2) of Directive 92/32/EEC) and assigning the qualifying risk phrase or phrases. The classification has consequences not only for labelling but also for other legislation and regulatory measures on dangerous substances;
 - (ii) the classification for each category of danger is shown in separate boxes. The classification is normally presented in the form of an abbreviation representing the category of danger together with the appropriate risk phrase or phrases. However, in some cases (i.e. substances classified as flammable, sensitising and some substances classified as dangerous for the environment) the risk phrase alone is used;
 - (iii) the abbreviation for each of the categories of danger is shown below:
 - explosive: E
 - oxidising: O
 - extremely flammable: F +
 - highly flammable: F
 - flammable: R 10
 - very toxic: T +
 - toxic: T
 - harmful: Xn
 - corrosive: C
 - irritant: Xi
 - sensitising: R 42 and/or R 43
 - carcinogenic: Carc. Cat. ⁽¹⁾
 - mutagenic: Muta. Cat. ⁽¹⁾
 - toxic for reproduction: Repr. Cat. ⁽¹⁾
 - dangerous for the environment: N and/or R 52, R 53, R 59;
 - (iv) additional risk phrases which have been assigned to describe other properties (see sections 2.2.6 and 3.2.8 of the labelling guide) are shown in separate boxes on the same line although they are not formally part of the classification.
- (b) *the label, including:*
- (i) the letter assigned to the substance in accordance with Annex II (see Article 23(2)(c)). This acts as an abbreviation for the symbol (if assigned) and the indication of danger;
 - (ii) the risk phrases, denoted as a series of numbers preceded by the letter R indicating the nature of the special risks, in accordance with Annex III (see Article 23(2)(d)). The numbers are separated by either:
 - a dash (-) to denote separate statements concerning special risks (R), or

⁽¹⁾ The category of carcinogen, mutagen or toxic for reproduction (i.e. 1, 2 or 3) is shown as appropriate.

▼B

— an oblique stroke (/) to denote a combined statement, in a single sentence, of the special risks as set out in Annex III;

- (iii) the safety phrases denoted as a series of numbers preceded by the letter S indicating the recommended safety precautions, in accordance with Annex IV (see Article 23(2)(e)). Again the numbers are separated by either a dash or an oblique stroke; the significance of recommended safety precautions are set out in Annex IV. The safety phrases shown apply only to substances; for preparations, phrases are selected according to the usual rules.

Note that for certain dangerous substances and preparations sold to the general public certain S phrases are mandatory.

S 1, S 2 and S 45 are obligatory for all very toxic, toxic and corrosive substances and preparations sold to the general public.

S 2 and S 46 are obligatory for all other dangerous substances and preparations sold to the general public other than those that have only been classified as dangerous for the environment.

Safety phrases S 1 and S 2 are shown in brackets in Annex I and can only be omitted from the label when the substance or preparation is sold for industrial use only;

- (c) *the concentration limits and associated classifications necessary to classify dangerous preparations containing the substance in accordance with Directive 88/379/EEC.*

Unless otherwise shown, the concentration limits are a percentage by weight of the substance calculated with reference to the total weight of the preparation.

Where no concentration limits are given, the concentration limits to be used when applying the conventional method of assessing health hazards are those in Annex I of Directive 88/379/EEC.

General explanatory notes*Groups of substances*

A number of group entries are included in Annex I. In these cases, the classification and labelling requirements will apply to all substances covered by the description if they are placed on the market, insofar as they are listed in Einecs or Elincs. Where a substance that is covered by a group entry occurs as an impurity in another substance, the classification and labelling requirements described in the group entry shall be taken into account in the labelling of the substance.

In some cases, there are classification and labelling requirements for specific substances that would be covered by the group entry. In such cases a specific Annex I entry will be present for the substance and the group entry will be annotated with the phrase "except those specified elsewhere in this Annex".

In some cases, individual substances may be covered by more than one group entry. Lead oxalate (Einecs No 212-413-5) is for instance covered by the entry for lead compounds (index No 082-001-00-6) as well as for salts of oxalic acid (607-007-00-3). In these cases, the labelling of the substance reflects the labelling for each of the two group entries. In cases where different classifications for the same hazard are given, the classification leading to the more severe classification is used for the label of the particular substance (see section on Note A below).

Entries in Annex I for salts (under any denomination) cover both anhydrous and hydrous forms unless specifically specified otherwise.

Substances with an Elincs number

In Annex I, substances with an Elincs number have been notified under the provisions of this Directive. A producer or importer who has not previously notified these substances must refer to the provisions of this Directive if he intends to place these substances on the market.

Explanation of the notes relating to the identification, classification and labelling of substances*Note A:*

The name of the substance must appear on the label in the form of one of the designations given in Annex I (see Article 23(2)(a)).

▼B

In Annex I, use is sometimes made of a general description such as "... compounds" or "... salts". In this case, the manufacturer or any other person who markets such a substance is required to state on the label the correct name, due account being taken of the chapter entitled "Nomenclature" of the Foreword:

Example: for BeCl₂ (Einecs No 232-116-4): beryllium chloride.

The Directive also requires that the symbols, indications of danger, R and S phrases to be used for each substance shall be those shown in Annex I (Article 23(2)(c), (d) and (e)).

For substances belonging to one particular group of substances included in Annex I, the symbols, indications of danger, R and S phrases to be used for each substance shall be those shown in the appropriate entry in Annex I.

For substances belonging to more than one group of substances included in Annex I, the symbols, indications of danger, R and S phrases to be used for each substance shall be those shown in both the appropriate entries given in Annex I. In cases where two different classifications are given in the two entries for the same hazard, the classification reflecting the more severe hazard classification is used.

Example:

Group entry 1 classification:	Repr. Cat. 1; R 61 R 33	Repr. Cat. 3; R 62 N; R 50-53	Xn; R 20/22
Group entry 2 classification:	Carc. Cat. 1; R 45	T; R 23/25	N; R 51-53
Substance classification:	Carc. Cat. 1; R 45 T; R 23/25	Repr. Cat. 1; R 61 R 33	Repr. Cat. 3; R 62 N; R 50-53

Note B:

Some substances (acids, bases, etc.) are placed on the market in aqueous solutions at various concentrations and therefore require different labelling since the hazards vary at different concentrations.

In Annex I entries with Note B have a general designation of the following type: "... % nitric acid".

In this case the manufacturer or any other person who markets such a substance must state the percentage concentration of the solution on the label.

Example: 45 % nitric acid.

Unless otherwise stated, it is assumed that the percentage concentration is calculated on a weight/weight basis.

The use of additional data (e.g. specific gravity, degrees Baumé) or descriptive phrases (e.g. fuming or glacial) is permissible.

Note C:

Some organic substances may be marketed either in a specific isomeric form or as a mixture of several isomers.

In Annex I, a general designation of the following type is sometimes used: "xylenol".

In this case the manufacturer or any other person who markets such a substance must state on the label whether the substance is a specific isomer (a) or a mixture of isomers (b).

Example: (a) 2,4-dimethylphenol
(b) xylene (mixture of isomers).

Note D:

Certain substances which are susceptible to spontaneous polymerisation or decomposition are generally placed on the market in a stabilised form. It is in this form that they are listed in Annex I to this Directive.

However, such substances are sometimes placed on the market in a non-stabilised form. In this case, the manufacturer or any person who places such a substance on the market must state on the label the name of the substance followed by the words non-stabilised.

Example: methacrylic acid (non-stabilised).

Note E:

Substances with specific effects on human health (see Chapter 4 of Annex VI) that are classified as carcinogenic, mutagenic and/or toxic for reproduction in categories 1 or 2 are ascribed Note E if they are also classified as very toxic (T+), toxic (T) or harmful (Xn). For these substances, the risk phrases R 20, R 21, R 22, R 23, R 24, R 25, R 26, R 27, R 28, R 39, R 40, R 48 and R 65 and all combinations of these risk phrases shall be preceded by the word "Also".

▼B

Examples:	R 45-23	“May cause cancer. Also toxic by inhalation”
	R 46-27/28	“May cause heritable genetic damage. Also very toxic in contact with skin and if swallowed”.

Note F:

This substance may contain a stabiliser. If the stabiliser changes the dangerous properties of the substance, as indicated by the label in Annex I, a label should be provided in accordance with the rules for the labelling of dangerous preparations.

Note G:

This substance may be marketed in an explosive form in which case it must be evaluated using the appropriate test methods and a label should be provided reflecting its explosive property.

Note H:

The classification and label shown for this substance applies to the dangerous property(ies) indicated by the risk phrase(s) in combination with the category(ies) of danger shown. The requirements of Article 6 of this Directive on manufacturers, distributors and importers of this substance apply to all other aspects of classification and labelling. The final label shall follow the requirements of section 7 of Annex VI of this Directive.

This note applies to certain coal- and oil-derived substances and to certain entries for groups of substances in Annex I.

Note J:

The classification as a carcinogen need not apply if it can be shown that the substance contains less than 0,1 % w/w benzene (Einecs No 200-753-7). This note applies only to certain complex coal- and oil-derived substances in Annex I.

Note K:

The classification as a carcinogen need not apply if it can be shown that the substance contains less than 0,1 % w/w 1,3-butadiene (Einecs No 203-450-8). If the substance is not classified as a carcinogen, at least the S phrases (2-)9-16 should apply. This note applies only to certain complex oil-derived substances in Annex I.

Note L:

The classification as a carcinogen need not apply if it can be shown that the substance contains less than 3 % DMSO extract as measured by IP 346. This note applies only to certain complex oil-derived substances in Annex I.

Note M:

The classification as a carcinogen need not apply if it can be shown that the substance contains less than 0,005 % w/w benzo[a]-pyrene (Einecs No 200-028-5). This note applies only to certain complex coal-derived substances in Annex I.

Note N:

The classification as a carcinogen need not apply if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen. This note applies only to certain complex oil-derived substances in Annex I.

Note P:

The classification as a carcinogen need not apply if it can be shown that the substance contains less than 0,1 % w/w benzene (Einecs No 200-753-7).

When the substance is classified as a carcinogen, Note E shall also apply.

When the substance is not classified as a carcinogen at least the S phrases (2-)23-24-62 shall apply.

This note applies only to certain complex oil-derived substances in Annex I.

Note Q:

The classification as a carcinogen need not apply if it can be shown that the substance fulfils one of the following conditions:

- a short term biopersistence test by inhalation has shown that the fibres longer than 20 µm have a weighted half-life of less than 10 days, or

▼B

- a short term biopersistence test by intratracheal instillation has shown that the fibres longer than 20 µm have a weighted half-life of less than 40 days, or
- an appropriate intra-peritoneal test has shown no evidence of excess carcinogenicity, or
- absence of relevant pathogenicity or neoplastic changes in a suitable long term inhalation test.

Note R:

The classification as a carcinogen need not apply to fibres with a length weighted geometric mean diameter less two standard errors greater than 6 µm.

Note S:

This substance may not require a label according to Article 23 (see section 8 of Annex VI).

Explanation of the notes relating to the labelling of preparations

The significance of the notes that appear to the right of the concentration limits is as follows:

Note 1:

The concentration stated or, in the absence of such concentrations, the general concentrations of Directive 88/379/EEC are the percentages by weight of the metallic element calculated with reference to the total weight of the preparation.

Note 2:

The concentration of isocyanate stated is the percentage by weight of the free monomer calculated with reference to the total weight of the preparation.

Note 3:

The concentration stated is the percentage by weight of chromate ions dissolved in water calculated with reference to the total weight of the preparation.

Note 4:

Preparations containing these substances have to be classified as harmful with R 65 if they meet the criteria in section 3.2.3 in Annex VI.

Note 5:

The concentration limits for gaseous preparations are expressed as volume per volume percentage.

Note 6:

Preparations containing these substances have to be assigned R 67 if they meet the criteria in section 3.2.8 in Annex VI.

NOTA A

- ES: sales del ácido cianhídrico, excepto los cianuros complejos, tales como los ferrocianuros y ferricianuros y oxicianuro de mercurio
- DA: salte af hydrogencyanid med undtagelse af komplekse salte som cyanoferrat (II) og-(III) og kviksølv(II)oxidcyanid
- DE: Salze der Blausäure mit Ausnahme der komplexen Cyanide, z. B. Cyanoferrate (II) und (III) und Quecksilberoxidcyanide
- EL: άλατα υδροκυανιου εκτός από τα σύμπλοκα κυανιούχα όπως τα σιδηροκυανιούχα, σιδηρικυανιούχα και οξυκυανιούχος υδράργυρος
- EN: hydrogen cyanide (Salts of ...) with the exception of complex cyanides such as ferrocyanides, ferricyanides and mercuric oxycyanide
- FR: sels de l'acide cyanhydrique, à l'exception des cyanures complexes tels que ferrocyanures et ferricyanures et oxycyanure de mercure
- IT: sali dell'acido cianidrico, ad esclusione dei cianuri complessi come ferrocianuri e ferricianuri e ossicianuro di Hg
- NL: cyaanwaterstof (Zouten van ...) met uitzondering van complexe cyaniden zoals ferro- en ferricyaniden en kwikoxycyanide
- PT: sais do ácido cianídrico, com excepção dos cianetos complexos tais como ferrocianetos, ferricianetos e oxicianeto de mercúrio
- FI: syaanivetyhapon suolat lukuunottamatta kompleksisia syanideja kuten ferrosyanidit, ferrisyanidit ja elohopeaoksisyanidi
- SV: cyanvätesyra (salter av ...); salter av vätecyanid med undantag av komplexa cyanider som ferrocyanider, ferricyanider och kvicksilveroxicyanid

No 048-001-00-5

NOTA A

- ES: compuestos de cadmio, excepto el sulfoseleniuro ($x\text{CdS}_y\text{CdSe}$), el sulfuro mixto de cadmio-cinc ($x\text{CdS}_y\text{ZnS}$), el sulfuro mixto de cadmio y mercurio ($x\text{CdS}_y\text{HgS}$) y de los especialmente citados en este Anexo
- DA: cadmiumforbindelser, med undtagelse af cadmiumsulfoselenid ($x\text{CdS}_y\text{CdSe}$) og blandinger af cadmiumsulfid med zinksulfid ($x\text{CdS}_y\text{ZnS}$), blandinger af cadmiumsulfid med kviksølvulfid ($x\text{CdS}_y\text{HgS}$) såvel som cadmium forbindelser opført andetsteds i dette bilag
- DE: Cadmiumverbindungen, mit Ausnahme von Cadmiumselenosulfid ($x\text{CdS}_y\text{CdSe}$) und Mischungen von Cadmiumsulfid und Zinksulfid ($x\text{CdS}_y\text{ZnS}$), Mischungen von Cadmiumsulfid und Quecksilbersulfid ($x\text{CdS}_y\text{HgS}$) sowie der Cadmiumverbindungen, die in diesem Anhang gesondert aufgeführt sind
- EL: ενώσεις καδμίου εκτός του θειοσεληνιούχου καδμίου ($x\text{CdS}_y\text{CdSe}$), των μιγμάτων θειούχου καδμίου με θειούχο ψευδάργυρο ($x\text{CdS}_y\text{ZnS}$), των μιγμάτων θειούχου καδμίου με θειούχο υδράργυρο ($x\text{CdS}_y\text{HgS}$), και των ενώσεων που κατονομάζονται σ' άλλο σημείο στο παρόν παράρτημα
- EN: cadmium compounds, with the exception of cadmium sulphoselenide ($x\text{CdS}_y\text{CdSe}$), mixture of cadmium sulphide with zinc sulphide ($x\text{CdS}_y\text{ZnS}$), mixture of cadmium sulphide with mercury sulphide ($x\text{CdS}_y\text{HgS}$), and those specified elsewhere in this Annex
- FR: composés du cadmium à l'exclusion du sulfoséléniure ($x\text{CdS}_y\text{CdSe}$), du sulfure mixte cadmiumzinc ($x\text{CdS}_y\text{ZnS}$), du sulfure mixte cadmium-mercure ($x\text{CdS}_y\text{HgS}$) et de ceux nommément désignés dans cette annexe
- IT: composti di cadmio, esclusi il solfoseleniuro ($x\text{CdS}_y\text{CdSe}$), i solfuri misti di cadmio e zinco ($x\text{CdS}_y\text{ZnS}$), i solfuri misti di cadmio e mercurio ($x\text{CdS}_y\text{HgS}$) e quelli espressamente indicati in questo allegato
- NL: cadmiumverbindingen met uitzondering van cadmiumsulfoselenide ($x\text{CdS}_y\text{CdSe}$) en mengsels van cadmiumsulfide met zinksulfide ($x\text{CdS}_y\text{ZnS}$), mengsels van cadmiumsulfide met kwiksulfide ($x\text{CdS}_y\text{HgS}$), alsmede van in deze bijlage met name genoemde Cd-verbindingen
- PT: compostos de cádmio, com excepção do sulfoseleneto ($x\text{CdS}_y\text{CdSe}$), do sulfureto misto de cádmio e zinco ($x\text{CdS}_y\text{ZnS}$), do sulfureto misto de cádmio e mercúrio ($x\text{CdS}_y\text{HgS}$) e dos expressamente referidos no presente anexo
- FI: kadmiumpyhdisteet paitsi kadmiiumsulfoselenidi ($x\text{CdS}_y\text{CdSe}$), kadmiiumsulfidin ja sinkkisulfidin seos ($x\text{CdS}_y\text{ZnS}$), kadmiiumsulfidin ja elohopeasulfidin seos ($x\text{CdS}_y\text{HgS}$) sekä muualla luettelossa mainitut
- SV: kadmiumpföreningar förutom kadmiiumsulfoselenid ($x\text{CdS}_y\text{CdSe}$), blandning av kadmiiumsulfid och zinksulfid ($x\text{CdS}_y\text{ZnS}$), blandning av kadmiiumsulfid och kvicksilversulfid ($x\text{CdS}_y\text{HgS}$), och sådana som specificeras på andra ställen i denna bilaga

- ES:** trementina, aceite
[Cualquiera de las fracciones terpénicas en su mayor parte volátiles o destilados resultantes de la extracción con disolventes de la goma o de la pasta de las maderas blandas. Compuestas principalmente de hidrocarburos terpénicos $C_{10}H_{16}$: α -pineno, β -pineno, limoneno, 3-careno y canfeno. Pueden contener otros terpenos acíclicos, monocíclicos o bicíclicos, terpenos oxigenados y anetol. La composición exacta varía con los métodos de refinado y la edad, localización y especie de la clase de madera blanda.]
- DA:** terpentint, olie; terpentint, vegetabilsk
[Enhver af de flygtige overvejende terpenske fraktioner eller destillater fremkommet ved solventekstraktion af gummiindsamling fra, eller kvasning af, blødtræ. Består primært af $C_{10}H_{16}$ -terpencarbonhydriderne: α -pinen, β -pinen, limonen, 3-caren, camphen. Kan indeholde andre acycliske, monocycliske eller bicyclisketerpener, oxygenerede terpen og anethol. Nøjagtig sammensætning varierer med raffineringemetoder og alderen, lokaliseringen og arterne af blødtræskilden.]
- DE:** Terpentint, Öl
[Jede der flüchtigen, vorherrschend Terpen-, Fraktionen oder Destillate aus der Lösungsmittlextraktion, der Gummigewinnung oder beim Pulpen von Weichholz. Besteht in erster Linie aus den $C_{10}H_{16}$ Terpenkohlenwasserstoffen: α -Pinen, β -Pinen, Limonen, 3-Caren, Camphen. Kann andere acyclische, monocyclische oder bicyclische Terpene, oxygenierte Terpene und Anethol enthalten. Exakte Zusammensetzung variiert mit den Aufbereitungsverfahren und Alter, Ort und Art der Weichholzquelle.]
- EL:** τερεβινθέλαιο
[Όποιαδήποτε από τα πτητικά κυρίως τερπενικά κλάσματα ή αποστάγματα που προκύπτουν από την εκχύλιση με διαλύτη συλλογής κόμμεος ή πολτού μαλακών ξύλων. Αποτελείται πρωτίστως από τους $C_{10}H_{16}$ υδρογονάνθρακες τερπενίου: α -πινένιο, β -πινένιο, λεμονένιο, 3-καρένιο, καμφένιο. Μπορεί να περιέχουν άλλα άκυκλα, μονοκυκλικά ή δικοκυκλικά τερπένια, οξυγονωμένα τερπένια και ανηθόλη. Η ακριβής σύσταση ποικίλει με τις μεθόδους καθαρισμού και την ηλικία, τοποθεσία και το είδος της πηγής του μαλακού ξύλου.]
- EN:** Turpentine, oil
[Any of the volatile predominately terpenic fractions or distillates resulting from the solvent extraction of, gum collection from, or pulping of softwoods. Composed primarily of the $C_{10}H_{16}$ terpene hydrocarbons: α -pinene, β -pinene, limonene, 3-carene, camphene. May contain other acyclic, monocyclic, or bicyclic terpenes, oxygenated terpenes, and anethole. Exact composition varies with refining methods and the age, location, and species of the softwood source.]
- FR:** essence de térébenthine
[Toute fraction ou distillat volatil à dominante terpénique obtenu par extraction au solvant, collecte des suc ou réduction en pâte de bois tendre. Se compose principalement d'hydrocarbures terpéniques $C_{10}H_{16}$: α -pinène, β -pinène, limonène, carène-3 et camphène. Peut contenir d'autres terpènes acycliques, monocycliques ou bicycliques, des terpènes oxygénés et de l'anéthol. La composition exacte varie avec les méthodes de raffinage et l'âge, l'origine géographique et l'espèce des arbres dont le bois est utilisé.]
- IT:** trementina, olio
[Una qualsiasi delle frazioni terpeniche prevalentemente volatili o dei distillati ottenuti dal legno di conifere per estrazione con solventi, o con la raccolta della resina, o dalla trasformazione del legno in pasta. E composta principalmente dagli idrocarburi terpenici $C_{10}H_{16}$: α -pinene, β -pinene, limonene, 3-carene, canfene. Può contenere altri terpeni aciclici, monociclici o biciclici, terpeni ossigenati ed anetolo. La composizione esatta varia con i metodi di raffinazione e con l'età, la provenienza e la specie di legno di conifere usato.]
- NL:** terpentijn, olie
[Elk van de vluchtige, voornamelijk terpenen bevattende, fracties of destillaten verkregen door extractie met oplosmiddelen van, gomwinning uit of in brijvorm brengen van zachthout. Voornamelijk samengesteld uit de $C_{10}H_{16}$ -terpeenkolwaterstoffen: α -pinene, β -pinene, limonene, 3-careen, kamfeen. Kan andere acyclische, monocyclische of bicyclische terpenen, geoxygeneerde terpenen, en anethool bevatten. Exacte samenstelling varieert met zuiveringsmethoden en de leeftijd, herkomst en species van de zachthoutbron.]
- PT:** essência de terebentina; aguarrás
[Qualquer das fracções voláteis predominantemente terpénicas ou destilados resultantes da extracção com solvente de madeira de resinosas, recolha de colofónia de resinosas, ou produção de pasta a partir de madeira de resinosas. E constituída principalmente por hidrocarbonetos terpénicos $C_{10}H_{16}$: α -pineno, β -pineno, limoneno, 3-careno, canfeno. Por conter outros terpenos acíclicos, monocíclicos, ou bicíclicos, terpenos oxigenados, e anetole. A composição exacta varia com os métodos de refinação e a idade, origem geográfica, e espécie de resinosa.]
- FI:** tärpätti, öljy
[Jokainen haihtuva etupäässä terpeenifraktio tai tisle, joka saadaan liutinuutolla havupuun pihkan tai sellun tuotannosta. Muodostuu pääasiassa $C_{10}H_{16}$ terpeenihilivedyistä: α -pineeni, β -pineeni, limoneeni, 3-kareeni, kamfeeni. Voi sisältää muita asyklisiä, monosyklisiä tai bisyklisiä terpeenejä, hapettuneita terpeenejä ja anetolia. Tarkka koostumus vaihtelee jalostusmenetelmien sekä havupuun iän, sijaintipaikan ja lajin mukaan.]
- SV:** terpentint
[Någon av de flyktiga fraktioner eller destillat, huvudsakligen innehållande terpen, från solventextraktion av, hartsinsamling från eller massaframställning av mjuka träslag. Består huvudsakligen av $C_{10}H_{16}$ -terpenkolväten: α -pinen, β -pinen, limonen, 3-karen, kamfen. Kan innehålla andra acykliska, monocykliska eller bicykliska terpen, oxiderade terpen och anetol. Exakt sammansättning varierar med reningsmetod och ålder, plats och art av mjukträråvara.]

ANNEX 4

1.6. **For substances, the data required for classification and labelling may be obtained:**

- (a) as regards substances for which the information specified in Annex VII is required, most of the necessary data for classification and labelling appear in the “base set”. This classification and labelling must be reviewed, if necessary, when further information is available (Annex VIII);
- (b) as regards other substances (e.g. those referred to in section 1.5 above), the data required for classification and labelling may, if necessary, be obtained from a number of different sources, for example the results of previous tests, information required by international rules on the transport of dangerous substances, information taken from reference works and the literature or information derived from practical experience. The results of validated structure-activity relationships and expert judgement may also be taken into account where appropriate.

For preparations, the data required for classification and labelling may be obtained:

- (a) if it concerns physico-chemical data, by the application of the methods specified in Annex V. For gaseous preparations, a calculation method may be used for flammable and oxidising properties (see chapter 9);
- (b) if it concerns data on health effects:
 - by the application of the methods specified in Annex V and/or by the application of the conventional method referred to in Article 3(5)(a) to (i) of Directive 88/379/EEC, or, in the case of R 65, by the application of the rules under 3.2.3,
 - however, if it concerns the evaluation of the carcinogenic, mutagenic and reproductive properties, by the application of the conventional method referred to in Article 3(5)(j) to (q) of Directive 88/379/EEC.

Note concerning the performance of animal tests

The performance of animal tests to establish experimental data is subject to the provisions of Directive 86/609/EEC regarding the protection of animals used for experimental purposes.’

1.7.2. *Application of the guide criteria for substances*

The guidance criteria set out in this Annex are directly applicable when the data in question have been obtained from test methods comparable with those described in Annex V. In other cases, the available data must be evaluated by comparing the test methods employed with those indicated in Annex V and the rules specified in this Annex for determining the appropriate classification and labelling.

In some cases there may be doubt over the application of the relevant criteria, especially where these require the use of expert judgement. In such cases the manufacturer, distributor or importer should provisionally classify and label the substance on the basis of an assessment of the evidence by a competent person.

Without prejudice to article 6, where the above procedure has been followed and there is concern over possible inconsistencies then a proposal may be submitted for the entry of the provisional classification into Annex I. The proposal should be made to one of the Member States and should be accompanied by appropriate scientific data (see also section 4.1).

A similar procedure may be followed when information is identified which gives cause for concern over the accuracy of an existing entry in Annex I.’

2.2.2.1. *Remarks concerning peroxides*

For the explosive properties, an organic peroxide or preparation thereof in the form in which it is placed on the market is classified according to the criteria in section 2.2.1 on the basis of tests carried out in accordance with the methods given in Annex V.

For the oxidising properties the existing methods in Annex V cannot be applied to organic peroxides.

For substances, organic peroxides not already classified as explosive are classified as dangerous on the basis of their structure (e.g. R-O-O-H; R₁-O-O-R₂).

Preparations not already classified as explosive shall be classified using the calculation method based on the percentage of active oxygen shown in section 9.5.

▼B

Any organic peroxide or preparation thereof not already classified as explosive is classified as oxidising, if the peroxide or its formulation contains:

- more than 5 % of organic peroxides or,
- more than 0,5 % available oxygen from the organic peroxides, and more than 5 % hydrogen peroxide.²

3.2.3. *Harmful*

R 65 Harmful: may cause lung damage if swallowed

Liquid substances and preparations presenting an aspiration hazard in humans because of their low viscosity:

- (a) For substances and preparations containing aliphatic, alicyclic and aromatic hydrocarbons in a total concentration equal to or greater than 10 % and having either
- a flow time of less than 30 sec. in a 3 mm ISO cup according to ISO 2431, or
 - a kinematic viscosity measured by a calibrated glass capillary viscometer in accordance with ISO 3104/3105 of less than 7×10^{-6} m²/sec. at 40 °C, or
 - a kinematic viscosity derived from measurements of rotational viscometry in accordance with ISO 3129 of less than 7×10^{-6} m²/sec. at 40 °C.

Note that substances and preparations meeting these criteria need not be classified if they have a mean surface tension greater than 33 mN/m at 25 °C as measured by the du Nouy tensiometer or by the test methods shown in Annex V Part A.5.

- (b) For substances and preparations, based on practical experience in humans.

3.2.3.1. *Comments regarding volatile substances*

For certain substances with a high saturated vapour concentration evidence may be available to indicate effects that give cause for concern. Such substances may not be classified under the criteria for health effects in this guide (3.2.3) or not covered by section 3.2.8. However, where there is appropriate evidence that such substances may present a risk in normal handling and use then classification on a case-by-case basis in Annex I may be necessary.³

3.2.6.1. *Inflammation of the skin*

The following risk phrase shall be assigned in accordance with the criteria given:

R 38 Irritating to skin

- Substances and preparations which cause significant inflammation of the skin which persists for at least 24 hours after an exposure period of up to four hours determined on the rabbit according to the cutaneous irritation test method cited in Annex V.

Inflammation of the skin is significant if:

- (a) the mean value of the scores for either erythema and eschar formation or oedema formation, calculated over all the animals tested, is 2 or more,
- (b) or, in the case where the Annex V test has been completed using three animals, either erythema and eschar formation or oedema formation equivalent to a mean value of 2 or more calculated for each animal separately has been observed in two or more animals.

In both cases all scores at each of the reading times (24, 48 and 72 hr) for an effect should be used in calculating respective mean values.

Inflammation of the skin is also significant if it persists in at least two animals at the end of the observation time. Particular effects e.g. hyperplasia, scaling, discoloration, fissures, scabs and alopecia should be taken into account.

Relevant data may also be available from non-acute animal studies (see comments on R 48, section 2(d)). These are considered significant if the effects seen are comparable to those described above.

▼B

- Substances and preparations which cause significant inflammation of the skin, based on practical observations in humans on immediate, prolonged or repeated contact.
- Organic peroxides, except where evidence to the contrary is available.

Paresthesia:

Paresthesia caused in humans by skin contact with pyrethroid pesticides is not regarded as an irritant effect justifying classification as Xi; R 38. The S-phrases S 24 should however be applied for substances seen to cause this effect.'

'3.2.8. *Other toxicological properties*

Additional risk phrases shall be assigned in accordance with the following criteria (based on experience obtained during compilation of Annex I) to substances and preparations classified by virtue of 2.2.1 to 3.2.7 above and/or chapters 4 and 5:

R 66 Repeated exposure may cause skin dryness or cracking.

For substances and preparations which may cause concern as a result of skin dryness, flaking or cracking but which do not meet the criteria for R 38:

based on either:

- practical observation after normal handling and use, or
- relevant evidence concerning their predicted effects on the skin.

See also paragraphs 1.6 and 1.7.

R 67 Vapours may cause drowsiness and dizziness

For volatile substances and preparations containing such substances which cause clear symptoms of central nervous system depression by inhalation and which are not already classified with respect to acute inhalation toxicity (R 20, R 23, R 26, R 40/20, R 39/23 or R 39/26).

The following evidence may be used:

- (a) Data from animal studies showing clear signs of CNS depression such as narcotic effects, lethargy, lack of co-ordination (including loss of righting reflex) and ataxia either:
 - at concentrations/exposure times not exceeding 20 mg/l/4 h or,
 - for which the ratio of the effect concentration at ≤ 4 h to the saturated vapour concentration (SVC) at 20 °C is $\leq 1/10$.
- (b) Practical experience in humans (e.g. narcosis, drowsiness, reduced alertness, loss of reflexes, lack of coordination, vertigo) from well documented reports under comparable exposure conditions to the effects specified above for animals.

See also paragraphs 1.6 and 1.7.

For other supplementary risk phrases see section 2.2.6.'

'4.1.2. If a manufacturer, distributor or importer has information available which indicates that a substance should be classified and labelled in accordance with the criteria given in section 4.2.1, 4.2.2 or 4.2.3, he shall provisionally label the substance in accordance with these criteria, on the basis of the assessment of the evidence by a competent person.

4.1.3. The manufacturer, distributor or importer shall submit as soon as possible a document summarising all relevant information to one Member State in which the substance is placed on the market. This summary document should include a bibliography containing all relevant references, including any relevant unpublished data.

4.1.4. Furthermore, a manufacturer, distributor or importer who has new data which are relevant to the classification and labelling of a substance in accordance with the criteria given in section 4.2.1, 4.2.2 or 4.2.3, shall submit this data as soon as possible to one Member State in which the substance is placed on the market.'

'5.2.2. *Non-aquatic environment*

5.2.2.1. Substances shall be classified as dangerous for the environment and assigned the symbol N and the appropriate indication of danger, and assigned risk phrases in accordance with the following criteria:

R 54 Toxic to flora

R 55 Toxic to fauna

R 56 Toxic to soil organisms

R 57 Toxic to bees

R 58: May cause long term adverse effects on the environment

Substances which on the basis of the available evidence concerning their properties, persistence, potential to accumulate and predicted or observed environmental fate and behaviour may present a danger, immediate or long-term and/or delayed, to the structure and/or functioning of natural ecosystems other than those covered under 5.2.1 above. Detailed criteria will be elaborated later.

5.2.2.2. Substances shall be classified as dangerous for the environment and assigned the symbol N and the appropriate indication of danger, and assigned risk phrases in accordance with the following criteria:

R 59 Dangerous for the ozone layer

Substances which on the basis of the available evidence concerning their properties and their predicted or observed environmental fate and behaviour may present a danger to the structure and/or the functioning of the stratospheric ozone layer. This includes the substances which are listed in Annex I to Council Regulation (EC) No 3093/94 on substances that deplete the ozone layer (OJ L 333, 22.12.1994, p. 1) and its subsequent amendments.'

6.2. Safety phrases for substances and preparations

S 24 Avoid contact with skin

- Applicability:
 - all substances and preparations dangerous for health.
- Criteria for use:
 - *obligatory* for those substances and preparations to which R 43 has been ascribed, unless S 36 has also been ascribed,
 - recommended when it is necessary to draw the attention of the user to skin contact risks not mentioned in the risk phrases (e.g. paresthesia) which have to be ascribed. However, may be used to emphasise such risk phrases.

S 25 Avoid contact with eyes

- Applicability:
 - all substances and preparations dangerous to health.
- Criteria for use:
 - recommended when it is necessary to draw the attention of the user to eye contact risks not mentioned in the risk phrases which have to be applied. However, may be used to emphasis such risk phrases,
 - recommended for substances ascribed R 34, R 35, R 36 or R 41 which are likely to be used by the general public.

S 27 Take off immediately all contaminated clothing

- Applicability:
 - very toxic, toxic or corrosive substances and preparations.
- Criteria for use:
 - *obligatory* for very toxic substances and preparations to which R 27 has been ascribed and which are likely to be used by the general public,
 - recommended for very toxic substances and preparations to which R 27 has been ascribed used in industry. However, this safety phrase should not be used if S 36 has been ascribed,
 - recommended for toxic substances and preparations to which R 24 has been ascribed as well as corrosive substances and preparations which are likely to be used by the general public.

S 28 After contact with skin, wash immediately with plenty of ... (to be specified by the manufacturer)

- Applicability:
 - very toxic, toxic or corrosive substances and preparations.

▼B

- Criteria for use:
 - *obligatory* for very toxic substances and preparations,
 - recommended for the other substances and preparations mentioned above, in particular when water is not the most appropriate rinsing fluid,
 - recommended for corrosive substances and preparations which are likely to be used by the general public.

S 29 Do not empty into drains

- Applicability:
 - extremely or highly flammable liquids immiscible with water,
 - very toxic and toxic substances and preparations,
 - substances dangerous for the environment.
- Criteria for use:
 - *obligatory* for substances dangerous for the environment and assigned the symbol N, which are likely to be used by the general public, unless this is the intended use,
 - recommended for other substances and preparations mentioned above which are likely to be used by the general public, unless this is the intended use.

S 35 This material and its container must be disposed of in a safe way

- Applicability:
 - all dangerous substances and preparations.
- Criteria for use:
 - recommended for substances and preparations where special guidance is needed to ensure proper disposal.

S 37 Wear suitable gloves

- Applicability:
 - very toxic, toxic, harmful or corrosive substances and preparations,
 - organic peroxides,
 - substances and preparations irritating to the skin or causing sensitisation by skin contact.
- Criteria for use:
 - *obligatory* for very toxic and corrosive substances and preparations,
 - *obligatory* for those substances and preparations to which either R 21, R 24 or R 43 has been ascribed,
 - *obligatory* for Category 3 carcinogens, mutagens and substances toxic to reproduction unless the effects are produced solely by inhalation of the substances and preparations,
 - *obligatory* for organic peroxides,
 - recommended for toxic substances and preparations if the LD₅₀ dermal value is unknown but the substance or preparation is likely to be harmful by skin contact,
 - recommended for substances and preparations irritating to the skin.

S 45 In case of accident or if you feel unwell seek medical advice immediately (show the label where possible)

- Applicability:
 - very toxic substances and preparations,
 - toxic and corrosive substances and preparations,
 - substances and preparations causing sensitisation by inhalation.
- Criteria for use:
 - *obligatory* for the substances and preparations mentioned above.

▼B

- S 56 Dispose of this material and its container to hazardous or special waste collection point**
- Applicability:
 - all dangerous substances and preparations.
 - Criteria for use:
 - recommended for all dangerous substances and preparations likely to be used by the general public for which special disposal is required.
- S 59 Refer to manufacturer/supplier for information on recovery/recycling**
- Applicability:
 - all dangerous substances and preparations.
 - Criteria for use:
 - *obligatory* for substances dangerous for the ozone layer,
 - recommended for other substances and preparations for which recovery/recycling is recommended.
- S 60 This material and its container must be disposed of as hazardous waste**
- Applicability:
 - all dangerous substances and preparations.
 - Criteria for use:
 - recommended for substances and preparations not likely to be used by the general public and where S 35 is not assigned.
- S 62 If swallowed, do not induce vomiting: seek medical advice immediately and show this container or label**
- Applicability:
 - substances and preparations classified as harmful with R 65 in accordance with the criteria in section 3.2.3,
 - not applicable to substances and preparations which are placed on the market in aerosol containers (or in containers fitted with a sealed spray attachment), see sections 8 and 9.
 - Criteria for use:
 - *obligatory* for substances and preparations mentioned above, if sold to, or likely to be used by the general public, except when S 45 or S 46 are obligatory,
 - recommended for the substances and preparations mentioned above when used in industry, except where S 45 or S 46 are obligatory.
- S 63 In case of accident by inhalation: remove casualty to fresh air and keep at rest**
- Applicability:
 - very toxic and toxic substances and preparations (gases, vapours, particulates, volatile liquids,
 - substances and preparations causing respiratory sensitisation.
 - Criteria for use:
 - *obligatory* for substances and preparations to which R 26, R 23 or R 42 has been assigned which are likely to be used by the general public in a way which could result in inhalation.
- S 64 If swallowed, rinse mouth with water, (only if the person is conscious)**
- Applicability:
 - corrosive or irritant substances and preparations.

▼B

- Criteria for use:
 - recommended for the above substances and preparations which are likely to be used by the general public and where the above treatment is suitable.'

7.5.2. *Choice of safety phrases*

The final choice of safety phrases must have regard to the risk phrases indicated on the label and to the intended use of the substance or preparation:

- as a general rule, a maximum of four S-phrases shall suffice to formulate the most appropriate safety advice; for this purpose the combined phrases listed in Annex IV shall be regarded as single phrases,
- in the case of S-phrases concerning disposal, one S-phrase shall be used, unless it is clear that disposal of the material and its container does not present a danger for human health or the environment. In particular, advice on safe disposal is important for substances and preparations sold to the general public,
- some R-phrases become superfluous if a careful selection is made of S-phrases and vice-versa; S-phrases which obviously correspond to R-phrases will appear on the label only if it is intended to emphasise a specific warning,
- particular attention must be given, in the choice of safety phrases, to the foreseen conditions of use of certain substances and preparations, e.g. spraying or other aerosol effects. Phrases should be chosen with the intended use in view,
- the safety phrases S 1, S 2 and S 45 are obligatory for all very toxic, toxic and corrosive substances and preparations sold to the general public,
- the safety phrases S 2 and S 46 are obligatory for all other dangerous substances and preparations (except those only classified as dangerous to the environment) sold to the general public.

Where the phrases selected according to the strict criteria in 6.2 result in redundancy or ambiguity or are clearly unnecessary given the specific product/package then some phrases may be deleted.'

8. SPECIAL CASES: Substances

8.3. **Metals in massive form**

These substances are classified in Annex I or shall be classified in accordance with Article 6. However, some of these substances, although classified in accordance with Article 2 do not present a danger to human health by inhalation, ingestion or contact with skin or to the aquatic environment in the form in which they are placed on the market. Such substances do not require a label according to Article 23. However, all the information which should have appeared on the label shall be transmitted to the user by the person responsible for placing the metal on the market, in a format foreseen in Article 27.'
