

Commission Directive 2006/76/EC of 22 September 2006 amending
Council Directive 91/414/EEC as regards the specification of
the active substance chlorothalonil (Text with EEA relevance)

COMMISSION DIRECTIVE 2006/76/EC

of 22 September 2006

amending Council Directive 91/414/EEC as regards
the specification of the active substance chlorothalonil

(Text with EEA relevance)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Directive 91/414/EEC of 15 July 1991 concerning the placing of plant protection products on the market⁽¹⁾, and in particular the second indent of the second subparagraph of Article 6(1) thereof,

Whereas:

- (1) After a review in which the Netherlands acted as Rapporteur Member State, Commission Directive 2005/53/EC⁽²⁾ added the active substance chlorothalonil to Annex I to Directive 91/414/EEC. Directive 2005/53/EC provides for maximum levels for certain impurities. Following the Commission's usual practice, these levels were based on specifications drafted by the Food and Agriculture Organisation (FAO) of the United Nations as regards the purity and levels of impurities contained in active substances, and in particular a publication of February 2005. Those specifications set a maximum level for hexachlorobenzene of 0,01 g/kg active substance. However, the FAO has issued a further set of specifications for chlorothalonil⁽³⁾, which became available in December 2005, after the adoption of Directive 2005/53/EC. These specifications completed and formally repealed the specifications of February 2005 that were taken into consideration when that Directive was adopted. The new specifications set a maximum level for hexachlorobenzene of 0,04 g/kg active substance.
- (2) Although the Community is entitled to set its own level of protection for public health, animal health and the environment, it has been examined whether the purity levels laid down by Directive 2005/53/EC could be adjusted to reflect the new FAO specifications.
- (3) The Netherlands, after carrying out an *ad hoc* toxicological and ecotoxicological assessment, reached the conclusion that such a modification does not generate risks in addition to those already taken into account when chlorothalonil was added to Annex I to Directive 91/414/EEC. This conclusion was communicated to the other Member States, which agreed. In the light of this conclusion, and of the special circumstances of this case, the Commission considers that it is justified to modify the specification for chlorothalonil.

Status: EU Directives are being published on this site to aid cross referencing from UK legislation. After IP completion day (31 December 2020 11pm) no further amendments will be applied to this version.

- (4) Since Directive 2005/53/EC requires Member States to apply its Article 2 from 1 September 2006, the amended specification for chlorothalonil should also apply from this date, without prejudice to the other deadlines laid down by Article 3 of Directive 2005/53/EC. As a consequence, this Directive should enter into force as quickly as possible.
- (5) It is therefore appropriate to amend Directive 91/414/EEC accordingly.
- (6) The measures provided for in this Directive are in accordance with the opinion of the Standing Committee on the Food Chain and Animal Health,

HAS ADOPTED THIS DIRECTIVE:

Article 1

Annex I to Directive 91/414/EEC is amended as set out in the Annex to this Directive.

Article 2

Member States shall adopt and publish by 31 August 2006 at the latest the laws, regulations and administrative provisions necessary to comply with this Directive. They shall forthwith communicate to the Commission the text of those provisions and a correlation table between those provisions and this Directive.

They shall apply those provisions from 1 September 2006.

When Member States adopt those provisions, they shall contain a reference to this Directive or shall be accompanied by such a reference on the occasion of their official publication. Member States shall determine how such reference is to be made.

Article 3

This Directive shall enter into force on the day of its publication in the *Official Journal of the European Union*.

Article 4

This Directive is addressed to the Member States.

Done at Brussels, 22 September 2006.

For the Commission

Markos KYPRIANOU

Member of the Commission

ANNEX

In Annex I to Directive 91/414/EEC, row 102 is replaced by the following:

No	Common Name, Identification Numbers	IUPAC Name	Purity ^a	Entry into force	Expiration of inclusion	Specific provisions
'102	Chlorothalonil CAS No 1897-45-6 CIPAC No 288	Tetrachloroisophthalonitrile	— —	1 March 2006 Hexachlorobenzene not more than 0,04 g/kg Decachlorobiphenyl: not more than 0,03 g/kg	28 February 2016	PART A Only uses as fungicide may be authorised. PART B For the implementation of the uniform principles of Annex VI, the conclusions of the review report on chlorothalonil, and in particular Appendices I and II thereof, as finalised in the Standing Committee on the Food

^a Further details on identity and specification of active substance are provided in the review report.
