

Commission Regulation (EC) No 3115/94 of 20 December 1994 amending Annexes I and II to Council Regulation (EEC) No 2658/87 on the tariff and statistical nomenclature and on the Common Customs Tariff

COMMISSION REGULATION (EC) No 3115/94 of

20 December 1994

amending Annexes I and II to Council Regulation (EEC) No 2658/87 on the tariff and statistical nomenclature and on the Common Customs Tariff

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Regulation (EEC) No 2658/87 of 23 July 1987 on the tariff and statistical nomenclature and on the Common Customs Tariff⁽¹⁾, and in particular Articles 9 and 12 thereof,

Whereas Regulation (EEC) No 2658/87 established a goods nomenclature, hereinafter called the 'combined nomenclature', to meet, at one and the same time, the requirements both of the Common Customs Tariff and of the external trade statistics of the Community;

Whereas it is necessary to amend the combined nomenclature to take account of:

- changes in requirements relating to statistics or commercial policy, in particular by virtue of Council Decision bringing into force simultaneously the acts implementing the results of the Uruguay Round of multilateral trade negotiations⁽²⁾ and Council Regulation concerning certain measures resulting from the conclusion of negotiations under Article XXIV:6 and other measures necessary for simplification purposes⁽³⁾,
- the need to align or clarify texts;

Whereas Article 12 of Regulation (EEC) No 2658/87 provides for the Commission to adopt each year by means of a regulation, to apply from 1 January of the following year, a complete version of the combined nomenclature together with the corresponding autonomous and conventional rates of duty of the Common Customs Tariff, as it results from measures adopted by the Council or by the Commission⁽⁴⁾;

Whereas it is necessary to update the list at Annex II to Regulation (EEC) No 2658/87 concerning the specific Community measures referred to in Article 2 of that Regulation in order to take account of the evolution of Community measures liable to affect Taric;

Whereas the measures provided for in this Regulation are in accordance with the opinion of the Tariff and Statistical Nomenclature Section of the Customs Code Committee,

HAS ADOPTED THIS REGULATION:

ANNEX I

COMBINED NOMENCLATURE

PART ONE

PRELIMINARY PROVISIONS

SECTION I

GENERAL RULES

A. General rules for the interpretation of the combined nomenclature

Classification of goods in the combined nomenclature shall be governed by the following principles:

1. The titles of sections, chapters and sub-chapters are provided for ease of reference only; for legal purposes, classification shall be determined according to the terms of the headings and any relative section or chapter notes and, provided such headings or notes do not otherwise require, according to the following provisions.
2.
 - (a) Any reference in a heading to an article shall be taken to include a reference to that article incomplete or unfinished, provided that, as presented, the incomplete or unfinished article has the essential character of the complete or finished article. It shall also be taken to include a reference to that article complete or finished (or falling to be classified as complete or finished by virtue of this rule), presented unassembled or disassembled.
 - (b) Any reference in a heading to a material or substance shall be taken to include a reference to mixtures or combinations of that material or substance with other materials or substances. Any reference to goods of a given material or substance shall be taken to include a reference to goods consisting wholly or partly of such material or substance. The classification of goods consisting of more than one material or substance shall be according to the principles of rule 3.
3. When by application of rule 2 (b) or for any other reason, goods are prima facie classifiable under two or more headings, classification shall be effected as follows:
 - (a) the heading which provides the most specific description shall be preferred to headings providing a more general description. However, when two or more headings each refer to part only of the materials or substances contained in mixed or composite goods or to part only of the items in a set put up for retail sale, those headings are to be regarded as equally specific in relation to those goods, even if one of them gives a more complete or precise description of the goods;
 - (b) mixtures, composite goods consisting of different materials or made up of different components, and goods put up in sets for retail sale, which cannot be classified by reference to 3 (a), shall be classified as if they consisted of the material or component which gives them their essential character in so far as this criterion is applicable;

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

- (c) when goods cannot be classified by reference to 3 (a) or (b), they shall be classified under the heading which occurs last in numerical order among those which equally merit consideration.
4. Goods which cannot be classified in accordance with the above rules shall be classified under the heading appropriate to the goods to which they are most akin.
5. In addition to the foregoing provisions, the following rules shall apply in respect of the goods referred to therein:
- (a) camera cases, musical instrument cases, gun cases, drawing-instrument cases, necklace cases and similar containers, specially shaped or fitted to contain a specific article or set of articles, suitable for long-term use and presented with the articles for which they are intended, shall be classified with such articles when of a kind normally sold therewith. This rule does not, however, apply to containers which give the whole its essential character;
- (b) subject to the provisions of rule 5 (a), packing materials and packing containers⁽⁵⁾ presented with the goods therein shall be classified with the goods if they are of a kind normally used for packing such goods. However, this provision is not binding when such packing materials or packing containers are clearly suitable for repetitive use.
6. For legal purposes, the classification of goods in the subheadings of a heading shall be determined according to the terms of those subheadings and any related subheading notes and *mutatis mutandis* to the above rules, on the understanding that only subheadings at the same level are comparable. For the purposes of this rule the relative section and chapter notes also apply, unless the context otherwise requires.

B. General rules concerning duties

1. The customs duties applicable to imported goods originating in countries which are Contracting Parties to the General Agreement on Tariffs and Trade or with which the European Economic Community has concluded agreements containing the most-favoured-nation tariff clause shall be the conventional duties shown in column 4 of the schedule of duties. Unless the context otherwise requires, these conventional duties are applicable to goods, other than those referred to above, imported from any third country.

The autonomous duties shown in column 3 are applicable:

- when they are less than the conventional duties,
 - or
 - when no conventional duty exists, in which case a dash is shown in column 4.
2. Paragraph 1 shall not apply where special autonomous customs duties are provided for in respect of goods originating in certain countries or where preferential customs duties are applicable in pursuance of agreements.
3. Paragraphs 1 and 2 shall not preclude the Member States from applying customs duties other than those of the Common Customs Tariff where the application of such other duties is justified by Community law.
4. The duties expressed as percentage rates in columns 3 and 4 are *ad valorem* duties.
5. The symbol 'AGR' appearing in column 3 opposite certain headings or subheadings denotes that the goods concerned are subject to levies.

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

When the customs duty is followed by the sign ‘ + ’ and the symbol ‘ AGR ’ for example ‘ 16 + AGR ’, the goods are subject to both duty and levy.

When the customs duty is followed by the symbol ‘ (AGR) ’, for example ‘ 20 (AGR) ’, the figure 20 refers to a rate of duty made obsolete by the introduction of the levy system.

6. The symbol ‘ MOB ’ in columns 3 and 4 denotes that the goods concerned are chargeable with a ‘ variable component ’ determined under the regulations relating to trade in certain goods processed from agricultural products.
7. The symbol ‘ AD S/Z ’ or ‘ AD F/M ’ in column 4 in Chapters 17 to 19 and 21 indicates that the maximum rate of duty consists of an *ad valorem* duty plus an additional duty for certain forms of sugar or for flour. This additional duty is fixed in accordance with the rules concerning trade in certain processed agricultural products.
8. The symbol ‘ AD S/Z ’ in column 4 in Chapters 8 and 20 indicates that the Community reserves the right to charge, over and above the bound duty, an additional duty on sugar corresponding to the duty payable on imported sugar and applicable to the quantity of various sugars contained in this product in excess of the percentage by weight laid down in the additional note to Chapter 8 and in additional notes 3 and 5 to Chapter 20, or, in respect of products falling within heading Nos 0811 and 2006 to 2008 which exceed 13 % by weight.
9. In heading No 2008, columns 3 and 4, the symbol ‘ 2 AD S/Z ’ indicates that the applicable rate of the additional duty on sugar is fixed at a standard rate of 2 % of the customs value of the goods.
10. In Chapter 22 the symbol ‘ ECU/% vol/hl ’ in columns 3 and 4 means that a specific duty, expressed in ecus, is to be calculated for each percentage volume of alcohol per hectolitre. Thus a beverage having an alcohol content by volume of 40 % is to be charged as follows:
 - ‘ ECU 1/% vol/hl ’ = ECU 1 x 40, giving a duty of ECU 40 per hectolitre, or
 - ‘ ECU 1/% vol/hl + ECU 5/hl ’ = ECU 1 x 40 plus ECU 5, giving a duty of ECU 45 per hectolitre.

Where, in addition, a minimum (MIN) value is shown, for example ‘ ECU 1,6/% vol/hl MIN ECU 9/hl ’, it means that the duty, calculated on the basis of the abovementioned rule, is to be compared with the minimum duty, for example ‘ ECU 9/hl ’, and the higher of the two is to be applied.

C. General rules applicable both to nomenclature and to duties

1. Unless provided otherwise, the provisions relating to customs value shall be applied to determine, in addition to the value for the assessment of *ad valorem* customs duties, the values by reference to which the scope of certain headings or subheadings is defined.
2. The dutiable weight, in the case of goods chargeable by weight, and the weights by reference to which the scope of certain headings or subheadings is defined, shall be taken to be:
 - (a) in the case of a reference to ‘ gross weight ’, the aggregate weight of the goods and of all the packing materials and packing containers;
 - (b) in the case of a reference to ‘ net weight ’ or simply to ‘ weight ’ without qualification, the weight of the goods themselves without packing materials and packing containers of any kind.

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

3. Pursuant to Article 18 (1) of Regulation (EEC) No 2913/92⁽⁶⁾ and without prejudice to special provisions drawn up in other fields, in particular for agriculture, the equivalent in national currencies of the ecu by reference to which certain specific customs duties are expressed, or which is used as a criterion limiting the scope of certain subheadings, shall be that obtaining on the first working day of October 1994 to be published in the 'C' series of the *Official Journal of the European Communities*.

However, where a change in the bilateral central rate of one or more national currencies occurs the provisions of Article 18 (2) of the abovementioned Regulation shall apply.

D. Standard rate of duty

1. Customs duty shall be charged at the flat rate of 10 % *ad valorem* on goods:
 - contained in consignments sent by one private individual to another,
 - or
 - contained in travellers' personal luggage,

provided that such importations are not of a commercial nature.

This flat rate 10% customs duty shall apply provided that the value of the goods subject to import duty does not exceed ECU 200 per consignment or per traveller.

Such flat rate assessment shall not apply to goods falling within Chapter 24 which are contained in a consignment or in travellers' personal luggage in amounts exceeding those laid down in Article 31 or in Article 46 of Council Regulation (EEC) No 918/83⁽⁸⁾, as last amended by Regulation (EEC) No 355/94⁽⁹⁾.

2. Importations shall be treated as not being of a commercial nature if:
 - (a) in the case of goods contained in consignments sent by one private individual to another, such consignments:
 - are of an occasional nature,
 - contain goods exclusively for the personal use of the consignee or his family; which do not by their nature or quantity reflect any commercial interest,
 - are sent to the consignee by the consignor free of payment of any kind;
 - (b) in the case of goods contained in travellers' personal luggage, they:
 - are of an occasional nature,
 - and
 - consist exclusively of goods for the personal use of the travellers or their families, or of goods intended as presents; the nature and quantity of such goods must not be such as might indicate that they are being imported for commercial reasons.
3. The flat rate of customs duty shall not apply to goods imported under the conditions set out in paragraphs 1 and 2 if the person entitled has, before the said flat rate is applied to them, requested that they be subject to the customs duties appropriate to them. All the goods making up the consignment shall then be subject to the import duties which

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

are appropriate to them, without prejudice to the duty-free admission provided for pursuant to Articles 29 to 31 and 45 to 49 of Regulation (EEC) No 918/83.

For the purposes of the first subparagraph, import duties shall mean both customs duties and charges having equivalent effect and agricultural levies and other import charges provided for under the common agricultural policy or under specific arrangements applicable to certain goods resulting from the processing of agricultural products.

4. Member States may round off the amount in national currencies resulting from the conversion of the sum of ECU 200.
5. Member States may maintain unchanged the equivalent in national currency of the sum of ECU 200 if, at the time of the annual adjustment provided for in the first paragraph of Article 18 (1) of Regulation (EEC) No 2913/92 the conversion of this amount, before the rounding off provided for in paragraph 4, results in a change of less than 5 % in the equivalent in national currency, or in a reduction thereof.

F. Containers and packing materials

The following provisions are applicable to the containers and packing materials referred to in general interpretative rule 5 (a) and (b) and put into free circulation at the same time as the goods which they contain or with which they are presented.

1. When the containers and packing materials are classified with the goods in accordance with the provisions of general interpretative rule 5, they shall be:
 - (a) chargeable at the same rate of customs duty as the goods:
 - where such goods are subject to an *ad valorem* customs duty, or
 - where they are to be included in the dutiable weight of the goods;
 - (b) admitted free of customs duties:
 - where the goods are free of customs duty, or
 - where the goods are dutiable otherwise than by reference to weight or value, or
 - where the weight of the containers and packing materials is not to be included in the dutiable weight of the goods.
2. Where containers and packing materials covered by the provisions of paragraphs 1 (a) and (b) contain or are presented with goods of several different tariff descriptions, the weight and value of the containers and packing materials shall, for the purpose of determining their dutiable weight or value, be apportioned among all the goods contained, in proportion to the weight or value of those goods.

Additional notes

I.

A. *The following expressions shall have the meanings hereunder assigned to them:*

- (a) *'carcasses of bovine animals', for the purposes of subheadings 0201 10 and 0202 10, whole carcasses of the slaughtered animals after having been bled, eviscerated and skinned, imported with or without the heads, with or without the feet and with or without the other offals attached. Where carcasses are imported without the heads, the latter must have been separated from the carcass at the atlanto-occipital joint. When imported without the feet, the latter must have been cut off at the carpo-metacarpal or tarso-metatarsal joints; 'carcass' shall include the front part of the carcass comprising all the bones and the scrag, neck and shoulder having more than 10 pairs of ribs;*
- (b) *'half-carcasses of bovine animals', for the purposes of subheadings 0201 10 and 0202 10, the product resulting from the symmetrical division of the whole carcass through the centre of each cervical, dorsal, lumbar and sacral vertebra and through the centre of the sternum and of the ischio-pubic symphysis; 'half-carcass' shall include the front part of the half-carcass comprising all the bones and the scrag, neck and shoulder having more than 10 ribs;*
- (c) *'compensated quarters', for the purposes of subheadings 0201 20 20 and 0202 20 10: portions composed of either:*
 - *forequarters comprising all the bones and the scrag, neck and shoulder, and cut at the tenth rib; and hindquarters comprising all the bones and the thigh and sirloin, and cut at the third rib, or*
 - *forequarters comprising all the bones and the scrag, neck and shoulder, and cut at the fifth rib, with the whole of the flank and breast attached; and hindquarters comprising all the bones and the thigh and sirloin, and cut at the eighth cut rib.*

The forequarters and the hindquarters constituting 'compensated quarters' must be imported at the same time and in equal numbers, and the total weight of the forequarters must be the same as that of the hindquarters; however, a difference between the weights of the two parts of the consignment is allowed provided that this does not exceed 5 % of the weight of the heavier part (forequarters or hindquarters).

- (d) *'unseparated forequarters', for the purposes of subheadings 0201 20 30 and 0202 20 30: the front part of a carcass comprising all the bones and the scrag, neck and shoulder, with a minimum of four pairs of ribs and a maximum of 10 pairs of ribs (the first four pairs of ribs must be whole, the others may be cut) with or without the thin flank;*
- (e) *'separated forequarters', for the purposes of subheadings 0201 20 30 and 0202 20 30: the front part of a half-carcass comprising all the bones and*

- (h) 11. *'crop' and 'chuck and blade' cuts, for the purposes of subheading 0202 30 50: the dorsal part of the forequarter, including the upper part of the shoulder, obtained from a forequarter with a minimum of four ribs and a maximum of 10 ribs by a cut along a straight line through the point where the first rib joins the first sternal segment to the point of reflection of the diaphragm on the tenth rib;*
22. *'brisket' cut, for the purposes of subheading 0202 30 50: the lower part of the forequarter comprising the brisket navel end and the brisket point end.*

B. *In determining the number of whole or cut ribs referred to in paragraph 1 A, only those attached to the backbone shall be taken into consideration.*

2.

These carcasses and half-carcasses may be with or without head, feet, flare fat, kidneys, tail or diaphragm. Half-carcasses may be with or without spinal cord, brain or tongue. CHAPTER 11

PRODUCTS OF THE MILLING INDUSTRY; MALT; STARCHES; INULIN; WHEAT GLUTEN

Notes

1. This chapter does not cover:
 - (a) roasted malt put up as coffee substitutes (heading No 0901 or 2101);
 - (b) prepared flours, meals or starches of heading No 1901;
 - (c) corn flakes and other products of heading No 1904;
 - (d) vegetables, prepared or preserved, of heading No 2001, 2004 or 2005;
 - (e) pharmaceutical products (Chapter 30); or
 - (f) starches having the character of perfumery, cosmetic or toilet preparations (Chapter 33).

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

2.

(A) Products from the milling of the cereals listed in the table below fall within this chapter if they have, by weight on the dry product:

- (a) a starch content (determined by the modified Ewers polarimetric method) exceeding that indicated in column 2; and
- (b) an ash content (after deduction of any added minerals) not exceeding that indicated in column 3.

Otherwise, they fall within heading No 2302.

However, germ of cereals, whole, rolled, flaked or ground, falls in all cases within heading No 1104.

(B) Products falling within this chapter under the above provisions shall be classified within heading No 1101 or 1102 if the percentage passing through a woven metal wire cloth sieve with the aperture indicated in column 4 or 5 is not less, by weight, than that shown against the cereal concerned.

Otherwise, they fall within heading No 1103 or 1104.

Cereal	Starch content	Ash content	Rate of passage through a sieve with an aperture of	
			315 micrometres (microns)	500 micrometres (microns)
(1)	(2)	(3)	(4)	(5)
Wheat and rye	45 %	2,5 %	80 %	—
Barley	45 %	3 %	80 %	—
Oats	45 %	5 %	80 %	—
Maize (corn) and grain sorghum	45 %	2 %	—	90 %
Rice	45 %	1,6 %	80 %	—
Buckwheat	45 %	4 %	80 %	—
<i>Other cereals</i>	45 %	2 %	50 %	—

3. For the purposes of heading No 1103, the terms ‘groats’ and ‘meal’ mean products obtained by the fragmentation of cereal grains, of which:

- (a) in the case of maize (corn) products, at least 95 % by weight passes through a woven metal wire cloth sieve with an aperture of 2 mm;
- (b) in the case of other cereal products, at least 95 % by weight passes through a woven metal wire cloth sieve with an aperture of 1,25 mm.

Additional notes

1. *In accordance with Regulation (EEC) No 3324/80, the import duty applicable to mixtures falling within this chapter shall be calculated as follows:*

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

- (a) *in mixtures where one of the components represents at least 90 % by weight, the rate applicable to that component applies;*
- (b) *in other mixtures, the rate applicable shall be that of the component which results in the highest amount of import duty.*
2. *For the purposes of heading No 1106, the terms 'flour', 'meal' and 'powder' mean products obtained by milling or some other fragmentation process from dried leguminous vegetables of heading No 0713, from sago or roots or tubers of heading No 0714 or from products of Chapter 8, of which:*
- (a) *in the case of dried leguminous vegetables, sago, roots, tubers and products of Chapter 8 (excluding nuts of heading Nos 0801 and 0802), at least 95 % by weight passes through a woven metal wire cloth sieve with an aperture of 2 mm.*
- (b) *in the case of nuts of heading Nos 0801 and 0802, at least 50 % by weight passes through a woven metal wire cloth sieve with an aperture of 2,5 mm.*

higher than 0,11. In point of fact some oils having a free fatty acid content, expressed as oleic acid, of more than 3,3 g per 100 g may, after passage through activated alumina, in accordance with the method set out in Annex IX to Regulation (EEC) No 2568/91, may have a K_{270} extinction coefficient higher than 0,10. If so, after neutralization and decolorization in the laboratory, in accordance with the method set out in Annex XIII to the aforementioned Regulation, they must have the following characteristics:

- a K_{270} extinction coefficient not higher than 1,20,
- an extinction coefficient variation (ΔK) in the 270 nm region, higher than 0,01 but not higher than 0,16, i.e.:

ΔK	= $K_m - 0,5 (K_{m-4} + K_{m+4})$
K_m	= the extinction coefficient at the wavelength of the maximum of the absorption curve in the 270 nm region, and
K_{m-4} and K_{m+4}	= the extinction coefficients at wavelengths 4 nm lower and higher than the K_m wavelength;

4. organoleptic characteristics which include detectable defects exceeding the limits of acceptability and a panel test score lower than 3,5 in accordance with Annex XII to Regulation (EEC) No 2568/91.

II. For the purposes of subheading 1509 10 90, 'virgin oil' means olive oil having the following characteristics:

- (a) an acid content, expressed as oleic acid, not exceeding 3,3 g per 100 g;
- (b) a peroxide number not exceeding 20 meq O_2 /kg;
- (c) a wax content not exceeding 250 mg/kg;
- (d) a content in volatile halogenated solvents not exceeding 0,2 mg/kg overall and not exceeding 0,1 mg/kg for each solvent;
- (e) a K_{270} extinction coefficient not higher than 0,250 and, after treatment of the oil with activated alumina, not higher than 0,10;

SECTION IV

PREPARED FOODSTUFFS; BEVERAGES, SPIRITS AND VINEGAR; TOBACCO AND MANUFACTURED TOBACCO SUBSTITUTES

Note

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

1. In this section the term 'pellets' means products which have been agglomerated either directly by compression or by the addition of a binder in a proportion not exceeding 3 % by weight.

CHAPTER 16

PREPARATIONS OF MEAT, OF FISH OR OF CRUSTACEANS, MOLLUSCS OR OTHER AQUATIC INVERTEBRATES

Notes

1. This chapter does not cover meat, meat offal, fish, crustaceans, molluscs or other aquatic invertebrates, prepared or preserved by the processes specified in Chapter 2 or 3.
2. Food preparations fall in this chapter provided that they contain more than 20 % by weight of sausage, meat, meat offal, blood, fish or crustaceans, molluscs or other aquatic invertebrates, or any combination thereof. In cases where the preparation contains two or more of the products mentioned above, it is classified within the heading of Chapter 16 corresponding to the component or components which predominate by weight. These provisions do not apply to the stuffed products of heading No 1902 or to the preparations of heading No 2103 or 2104.

For preparations containing liver, the provisions of the second sentence shall not apply in determining the subheadings within heading No 1601 or 1602.

Subheading notes

1. For the purposes of subheading 1602 10, the expression 'homogenized preparations' means preparations of meat, meat offal or blood, finely homogenized, put up for retail sale as infant food or for dietetic purposes, in containers of a net weight content not exceeding 250 g. For the application of this definition no account is to be taken of small quantities of any ingredients which may have been added to the preparation for seasoning, preservation or other purposes. These preparations may contain a small quantity of visible pieces of meat or meat offal. This subheading takes precedence over all other subheadings of heading No 1602.
2. The fish and crustaceans specified in the subheadings of heading No 1604 or 1605 under their common names only, are of the same species as those mentioned in Chapter 3 under the same name.

Additional notes

1. *For the purposes of subheadings 1602 31 11, 1602 39 11, 1602 50 10, 1602 90 61, 1602 90 72 and 1602 90 74, the term 'uncooked' shall apply to products which have not been subjected to any heat treatment or which have been subjected to a heat treatment insufficient to ensure the coagulation of meat proteins in the whole of the product and which therefore, in the case of subheadings 1602 50 10, 1602 90 61, 1602 90 72 and 1602 90 74 show traces of a pinkish liquid on the cut surface when the product is cut along a line passing through its thickest part.*
2. *For the purposes of subheadings 1602 41 10, 1602 42 10 and 1602 49 11 to 1602 49 15, the expression 'parts thereof' applies only to prepared or preserved meat which, due to the size and the characteristics of the coherent muscle tissue, is identifiable as having been obtained from hams, shoulders, loins, or collars of domestic swine, as the case may be.*

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

CHAPTER 17

SUGARS AND SUGAR CONFECTIONERY

Note

1. This chapter does not cover:
 - (a) sugar confectionery containing cocoa (heading No 1806);
 - (b) chemically pure sugars (other than sucrose, lactose, maltose, glucose and fructose) or other products of heading No 2940; or
 - (c) medicaments or other products of Chapter 30.

Subheading note

1. For the purposes of subheadings 1701 11 and 1701 12, 'raw sugar' means sugar whose content of sucrose by weight, in the dry state, corresponds to a polarimeter reading of less than 99,5 %.

Additional notes

1. *For the purposes of subheadings 1701 11 10, 1701 11 90, 1701 12 10 and 1701 12 90, 'raw sugar' means sugar, not flavoured or coloured or containing any other added substances, containing, in the dry state, less than 99,5 % by weight of sucrose determined by the polarimetric method.*
2. *For the purposes of subheading 1701 99 10, 'white sugar' means sugar, not flavoured or coloured or containing any other added substances, containing, in the dry state, 99,5 % or more by weight of sucrose, determined by the polarimetric method.*
3. *For the purposes of subheadings 1702 30 10, 1702 40 10, 1702 60 10 and 1702 90 30, 'isoglucose' means the product obtained from glucose or its polymers with a content by weight in the dry state of at least 10 % fructose.*
4. *For the purposes of subheading 1702 90 80, 'inulin syrup' means the immediate product, other than that falling within subheading 1702 60 90, obtained by hydrolysis of inulin or oligofructoses, containing in the dry state at least 10 % fructose in free form or as sucrose.*

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

5. *When imported in the form of an assortment, goods falling within subheading 1704 90 are subject to a variable component (MOB) fixed according to the average content in milk fats, milk proteins, sucrose, isoglucose, glucose and starch of the assortment as a whole.*

Notes

1. This chapter does not cover:
 - (a) products of this chapter (other than those of heading No 2209) prepared for culinary purposes and thereby rendered unsuitable for consumption as beverages (generally heading No 2103);
 - (b) sea water (heading No 2501);
 - (c) distilled or conductivity water or water of similar purity (heading No 2851);
 - (d) acetic acid of a concentration exceeding 10 % by weight of acetic acid (heading No 2915);
 - (e) medicaments of heading No 3003 or 3004; or
 - (f) perfumery or toilet preparations (Chapter 33).
2. For the purposes of this chapter and of Chapters 20 and 21, the alcoholic strength by volume shall be determined at a temperature of 20 °C.
3. For the purposes of heading No 2202, the term ‘non-alcoholic beverages’ means beverages of an alcoholic strength by volume not exceeding 0,5 % vol. Alcoholic beverages are classified within heading Nos 2203 to 2206 or heading No 2208 as appropriate.

Subheading note

1. For the purposes of subheading 2204 10, the expression ‘sparkling wine’ means wine which, when kept at a temperature of 20 °C in closed containers, has an excess pressure of not less than 3 bar.

Additional notes

1. *For the purposes of heading Nos 2204 and 2205 and subheading 2206 00 10:*
 - (a) *‘actual alcoholic strength by volume’ means the number of volumes of pure alcohol contained at a temperature of 20°C in 100 volumes of the product at that temperature;*
 - (b) *‘potential alcoholic strength by volume’ means the number of volumes of pure alcohol at a temperature of 20°C capable of being produced by total fermentation of the sugars contained in 100 volumes of the product at that temperature;*
 - (c) *‘total alcoholic strength by volume’ means the sum of the actual and potential alcoholic strengths;*
 - (d) *‘natural alcoholic strength by volume’ means the total alcoholic strength by volume of a product before any enrichment;*
 - (e) *‘% vol’ is the symbol for alcoholic strength by volume.*

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

2. *For the purposes of subheading 2204 30 10, 'grape must in fermentation' means the product derived from the fermentation of grape must, having an actual alcoholic strength by volume of more than 1 % vol and less than three-fifths of its total alcoholic strength by volume.*
3. *For the purposes of subheadings 2204 21 and 2204 29:*
 - A. *'total dry extract' means the content in grams per litre of all the substances in a product which, under given physical conditions, do not volatilize.*

The total dry extract must be determined with the densimeter at 20°C;
 - B. (a) *the presence in the products falling within subheadings 2204 21 11 to 2204 21 99 and 2204 29 12 to 2204 29 99 of the quantities of total dry extract per litre indicated in I, II, III and IV does not affect their classification:*
 - I. *products of an actual alcoholic strength by volume of not more than 13 % vol: 90 g or less of total extract per litre;*
 - II. *products of an actual alcoholic strength by volume of more than 13 % vol but not more than 15 % vol: 130 g or less of total dry extract per litre;*
 - III. *products of an actual alcoholic strength by volume of more than 15 % vol but not more than 18 % vol: 130 g or less of total dry extract per litre;*
 - IV. *products of an actual alcoholic strength by volume of more than 18 % vol but not more than 22 % vol: 330 g or less of total dry extract per litre.*

Products with a total dry extract exceeding the maximum quantity shown above in each category are to be classified in the next following category, except that if the total dry extract exceeds 330 g/l the products are to be classified in subheadings 2204 21 99 and 2204 29 99;
 - (b) *the above rules do not apply to products falling within subheadings 2204 21 93, 2204 21 97, 2204 29 93 and 2204 29 97.*
4. *Subheadings 2204 21 11 to 2204 21 99 and 2204 29 12 to 2204 29 99 shall be taken to include:*
 - (a) *grape must with fermentation arrested by the addition of alcohol, that is to say a product:*
 - *having an actual alcoholic strength by volume of not less than 12 % vol but less than 15 % vol,*
 - and*
 - *obtained by the addition to unfermented grape must having a natural alcoholic strength by volume of not less than 8,5 % vol of a product derived from the distillation of wine;*
 - (b) *wine fortified for distillation, that is to say a product:*
 - *having an actual alcoholic strength by volume of not less than 18 % vol but not more than 24 % vol,*

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

- obtained exclusively by the addition to wine containing no residual sugar of an unrectified product derived from the distillation of wine and having a maximum actual alcoholic strength by volume of 86 % vol,
 - and
 - having a maximum volatile acidity of 1,5 g/l, expressed as acetic acid;
- (c) *liqueur wine, that is to say a product:*
- having a total alcoholic strength by volume of not less than 17,5 % vol and an actual alcoholic strength by volume of not less than 15 % vol but not more than 22 % vol,
 - and
 - obtained from grape must or wine, which must come from vine varieties approved in the third country of origin for the production of liqueur wine and have a minimum natural alcoholic strength by volume of 12 % vol,
 - by freezing,
 - or
 - by the addition during or after fermentation:
 - of a product derived from the distillation of wine, or
 - of concentrated grape must or, in the case of certain quality liqueur wines appearing on a list to be adopted of wines for which such practice is traditional, of grape must concentrated by direct heat, which, apart from this operation, corresponds to the definition of concentrated grape must, or
 - of a mixture of these products.

However, certain quality liqueur wines appearing on a list to be adopted may be obtained from unfermented fresh grape must which does not need to have a minimum natural alcoholic strength by volume of 12 % vol.

5. *For the purposes of subheadings 2204 21 11 to 2204 21 78, 2204 21 81, 2204 21 82 and 2204 29 12 to 2204 29 58, 2204 29 81 and 2204 29 82, 'quality wines produced in specified regions' are wines produced in the European Community which comply with the provisions of Council Regulation (EEC) No 823/87 of 16 March 1987 laying down special provisions relating to quality wines produced in specified regions (OJ No L 84, 27. 3. 1987, p. 59) and the provisions adopted in implementation of the aforesaid Regulation and defined in national regulations.*
6. *For the purposes of subheadings 2204 30 92 and 2204 30 96, 'concentrated grape must' means grape must for which the figure indicated by a refractometer (used in accordance with the method prescribed in the Annex to Regulation (EEC) No 558/93) at a temperature of 20°C is not less than 50,9 %.*
7. *Only vermouth and other wine of fresh grapes flavoured with plants or aromatic substances having an actual alcoholic strength by volume of not less than 7 % vol shall be regarded as products falling within heading No 2205.*
8. *For the purposes of subheading 2206 00 10, the expression 'piquette' means the product obtained by the fermentation of untreated grape marc macerated in water or by the extraction of fermented grape marc with water.*

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

9. For the purposes of subheadings 2206 00 31 and 2206 00 39, the following are regarded as 'sparkling':
- fermented beverages in bottles with 'mushroom' stoppers held in place by ties or fastenings,
 - fermented beverages otherwise put up, with an excess pressure of not less than 1,5 bar, measured at a temperature of 20°C.
10. For the purposes of subheadings 2209 00 11 and 2209 00 19, the expression 'wine vinegar' means vinegar obtained exclusively by acetous fermentation of wine and having a total acidity of not less than 60 g/l, expressed as acetic acid.

CHAPTER 23

RESIDUES AND WASTE FROM THE FOOD INDUSTRIES; PREPARED ANIMAL FODDER

Note

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

1. Heading No 2309 includes products of a kind used in animal feeding, not elsewhere specified or included, obtained by processing vegetable or animal materials to such an extent that they have lost the essential characteristics of the original material, other than vegetable waste, vegetable residues and by-products of such processing.

Additional notes

1. *Subheading 2303 10 19 includes only residues from the manufacture of starch from maize and does not cover blends of such residues with products derived from other plants or products derived from maize otherwise than in the course of the production of starch by the wet process.*

These residues may, however, contain residues from the extraction of maize germ oil by the wet milling process, screenings from maize used in the wet process in a proportion not exceeding 15 % by weight and residues of maize steep-water, from the wet process, including residues of steep-water used for the manufacture of alcohol or of other starch derived products.

Their starch content may not exceed 28 % by weight on the dry product in accordance with the method contained in Annex I. I to Commission Directive 72/199/EEC and their fat content cannot exceed 4,5 % by weight on the dry product determined in accordance with method A contained in Annex I to Commission Directive 84/4/EEC.

2. *Subheading 2306 90 91 includes only residues from the extraction of oil from the germs of maize, excluding products containing components from parts of maize grains which have been added after processing and have not been subjected to the oil extraction process.*
3. *For the purposes of subheadings 2307 00 11, 2307 00 19, 2308 90 11 and 2308 90 19, the following expressions shall have the meanings hereby assigned to them:*
 - *‘actual alcoholic strength by mass’: the number of kilograms of pure alcohol contained in 100 kg of the product,*
 - *‘potential alcoholic strength by mass’: the number of kilograms of pure alcohol capable of being produced by total fermentation of the sugars contained in 100 kg of the product,*
 - *‘total alcoholic strength by mass’: the sum of the actual and potential alcoholic strengths by mass,*
 - *‘% mas’: the symbol for alcoholic strength by mass.*
4. *For the purposes of subheadings 2309 10 11 to 2309 10 70 and 2309 90 31 to 2309 90 70, the expression ‘milk products’ means the products falling within heading Nos 0401, 0402, 0404, 0405 and 0406 and within subheadings 0403 10 02 to 0403 10 36, 0403 90 11 to 0403 90 69, 1702 10 and 2106 90 51.*

Notes

1. Except where their context or note 4 to this chapter otherwise requires, the headings of this chapter cover only products which are in the crude state or which have been washed (even with chemical substances eliminating the impurities without changing the structure of the product), crushed, ground, powdered, levigated, sifted, screened, concentrated by flotation, magnetic separation or other mechanical or physical processes (except crystallization), but not products which have been roasted, calcined, obtained by mixing or subjected to processing beyond that mentioned in each heading.

The products of this chapter may contain an added anti-dusting agent, provided that such addition does not render the product particularly suitable for specific use rather than for general use.

2. This chapter does not cover:
 - (a) sublimed sulphur, precipitated sulphur or colloidal sulphur (heading No 2802);
 - (b) earth colours containing 70 % or more by weight of combined iron evaluated as Fe_2O_3 (heading No 2821);

 - (h) billiard chalks (heading No 9504); or
 - (ij) writing or drawing chalks or tailors' chalks (heading No 9609).

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

3. Any products classifiable within heading No 2517 and any other heading of the chapter are to be classified within heading No 2517.
4. Heading No 2530 applies *inter alia* to: vermiculite, perlite and chlorites, unexpanded; earth colours, whether or not calcined or mixed together; natural micaceous iron oxides; meerschaum (whether or not in polished pieces); amber; agglomerated meerschaum and agglomerated amber, in plates, rods, sticks or similar forms, not worked after moulding; jet; strontianite (whether or not calcined), other than strontium oxide; broken pottery.

1. This chapter does not cover:
 - (a) slag or similar industrial waste prepared as macadam (heading No 2517);
 - (b) natural magnesium carbonate (magnesite), whether or not calcined (heading No 2519);
 - (c) basic slag of Chapter 31;

2. For the purposes of heading Nos 2601 to 2617, the term 'ores' means minerals of mineralogical species actually used in the metallurgical industry for the extraction of mercury, of the metals of heading No 2844 or of the metals of Section XIV or XV, even if the are intended for non-metallurgical purposes. Heading Nos 2601 to 2617 do not, however, include minerals which have been submitted to processes not normal to the metallurgical industry.
3. Heading No 2620 applies only to ash and residues of a kind used in industry either for the extraction of metals or as a basis for the manufacture of chemical compounds of metals.

CHAPTER 27

MINERAL FUELS, MINERAL OILS AND PRODUCTS OF THEIR DISTILLATION; BITUMINOUS SUBSTANCES; MINERAL WAXES

Notes

1. This chapter does not cover:
 - (a) separate chemically defined organic compounds, other than pure methane and propane which are to be classified within heading No 2711;
 - (b) medicaments of heading No 3003 or 3004; or
 - (c) mixed unsaturated hydrocarbons of heading No 3301, 3302 or 3805.

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

2. References in heading No 2710 to ‘petroleum oils and oils obtained from bituminous minerals’ include not only petroleum oils and oils obtained from bituminous minerals but also similar oils, as well as those consisting mainly of mixed unsaturated hydrocarbons, obtained by any process, provided that the weight of the non-aromatic constituents exceeds that of the aromatic constituents.

However, the references do not include liquid synthetic polyolefins of which less than 60 % by volume distils at 300 °C, after conversion to 1 013 mbar when a reduced-pressure distillation method is used (Chapter 39).

Subheading notes

1. For the purposes of subheading 2701 11, ‘anthracite’ means coal having a volatile matter limit (on a dry, mineral-matter-free basis) not exceeding 14 %.
2. For the purposes of subheading 2701 12, ‘bituminous coal’ means coal having a volatile matter limit (on a dry, mineral-matter-free basis) exceeding 14 % and a calorific value limit (on a moist, mineral-matter-free basis) equal to or greater than 5 833 kcal/kg.
3. For the purposes of subheadings 2707 10, 2707 20, 2707 30, 2707 40 and 2707 60, the terms ‘benzole’, ‘toluole’, ‘xylole’, ‘naphthalene’ and ‘phenols’ apply to products which contain more than 50 % by weight of benzene, toluene, xylene, naphthalene or phenols, respectively.

 - (g) *‘fuel oils’ (subheadings 2710 00 71 to 2710 00 78) means heavy oils as defined in paragraph (e) (other than gas oils as defined in paragraph (f)) which, for a corresponding diluted colour C, have a viscosity V:*

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

- not exceeding that shown in line I of the following table when the sulphated ashes content is less than 1 % by the ASTM D 874 method and the saponification index is less than 4 by the ASTM D 939-54 method,
- exceeding that shown in line II when the pour point is not less than 10° C by the ASTM D 97 method,

These provisions apply only to oils having a diluted colour C of less than 2.

Diluted colour C/Viscosity V concordance table

Colour C	0	0,5	1	1,5	2	2,5	3	3,5	4	4,5	5	5,5	6	6,5	7	7,5 and above
Viscosity V	4	4	4	5,4	9	15,1	25,3	42,4	71,1	119	200	335	562	943	1 580	2 650
II	7	7	7	7	9	15,1	25,3	42,4	71,1	119	200	335	562	943	1 580	2 650

The term 'viscosity V' means the kinematic viscosity at 50 °C expressed in 10⁻⁶ m² s⁻¹ by the ASTM D 445 method.

The term 'diluted colour C' means the colour of a product, as determined by the ASTM D 1500 method, after one part of such product has been mixed with 99 parts by volume of carbon tetrachloride. The colour must be determined immediately after dilution.

Subheadings 2710 00 71 to 2710 00 78 cover only fuel oils of natural colour.

These subheadings do not cover heavy oils defined in paragraph (e) for which it is not possible to determine:

- the distillation percentage at 250 °C by the ASTM D 86 method (zero shall be deemed to be a percentage),
- the kinematic viscosity at 50° C by the ASTM D 445 method,
- or the diluted colour C by the ASTM D 1500 method.

Such products fall within subheadings 2710 00 81 to 2710 00 98.

2. For the purposes of heading No 2712, the expression 'crude petroleum jelly' (subheading 2712 10 10) shall be taken to apply to petroleum jelly of a natural colour higher than 4,5 by the ASTM D 1500 method.
3. For the purposes of subheadings 2712 90 31 to 2712 90 39), the term 'crude' shall be taken to apply to products:
 - (a) with an oil content of 3,5 or higher by the ASTM D 721 method, if their viscosity at 100°C is lower than 9x 10⁻⁶ m² s⁻¹ by the ASTM D 445 method;
 or

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

- (b) *of a natural colour higher than 3 by the ASTM D 1500 method, if their viscosity at 100° C is $9 \times 10^{-6} \text{ m}^2 \text{ s}^{-1}$ or higher by the ASTM D 445 method.*
4. *For the purposes of heading Nos 2710, 2711 and 2712, the term 'specific process' shall be taken to apply to the following operations:*
- (a) *vacuum distillation;*
- (b) *redistillation by a very thorough fractionation process;*
- (c) *cracking;*
- (d) *reforming;*
- (e) *extraction by means of selective solvents;*
- (f) *the process comprising all the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralization with alkaline agents; decolorization and purification with naturally active earth, activated earth, activated charcoal or bauxite;*
- (g) *polymerization;*
- (h) *alkylation;*
- (ij) *isomerization;*
- (k) *(in respect of products of subheadings 2710 00 61 to 2710 00 98 only) desulphurization with hydrogen resulting in a reduction of at least 85 % of the sulphur content of the products processed (ASTM D 1266-59 T method);*
- (l) *(in respect of products of heading No 2710 only) deparaffining by a process other than filtering;*
- (m) *(in respect of products of subheadings 2710 00 61 to 2710 00 98 only) treatment with hydrogen at a pressure of more than 20 bar and a temperature of more than 250° C with the use of a catalyst, other than to effect desulphurization, when the hydrogen constitutes an active element in a chemical reaction. The further treatment with hydrogen of lubricating oils of subheadings 2710 00 81 to 2710 00 98 (e.g. hydrofinishing or decolorization) in order, more especially, to improve colour or stability shall not, however, be deemed to be a specific process;*
- (n) *(in respect of products of subheadings 2710 00 71 to 2710 00 78 only) atmospheric distillation, on condition that less than 30 % of these products distils, by volume, including losses, at 300°C by the ASTM D 86 method. If 30 % or more by volume, including losses, of such products distils at 300°C by the ASTM D 86 method, the quantities of products which may be obtained during the atmospheric distillation and which fall within subheadings 2710 00 11 to 2710 00 39 or 2710 00 41 to 2710 00 59 shall be dutiable at the same rates as those provided for under subheadings 2710 00 74 to 2710 00 78 according to the kind and value of the products used and on the net weight of the products obtained. This rule shall not apply to products so obtained which, within a period of six months and subject to such other conditions as may be determined by the competent authorities, are to undergo a specific process or chemical transformation by a process not being a specific process;*
- (o) *(in respect of products of subheadings 2710 00 81 to 2710 00 98 only) treatment by means of a high-frequency electrical brush-discharge.*

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

Should any preparatory treatment prior to the abovementioned treatments be necessary by reason of technical requirements, the customs exemption shall apply only to the quantities of the products intended for and actually subjected to such abovementioned treatments; any waste products arising during preparatory treatment shall also be exempt from customs duty.

5. *The quantities of products which may be obtained during chemical transformation, or during preparatory treatment which may be necessary by reason of technical requirements, and which fall within heading Nos or subheadings 2707 10 10, 2707 20 10, 2707 30 10, 2707 50 10, 2710, 2711, 2712 10, 2712 20, 2712 90 31 to 2712 90 90, 2713 90, 2901 10 10, 2902 20 10, 2902 30 10 and 2902 44 10 shall be dutiable at the same rates as those provided for in respect of products for other purposes', according to the kind and value of the products used and on the net weight of the products obtained. This rule shall not apply to such products falling within heading Nos 2710 to 2712 which, within a period of six months and subject to such other conditions as may be determined by the competent authorities, are to undergo a specific process or further chemical transformation.*
6. *Subheading 2710 00 85 covers only oils to be mixed with other oils, with the products of heading No 3811 or with thickeners in order to produce oils, greases or lubricating preparations, by enterprises which, because of the plant with which they are equipped, cannot claim exemption from customs duty under the terms of additional note 5 relating to heading No 2710, and which process such oils for resale in plants equipped with all the following:*
 - *at least two storage tanks for the basic oils in bulk,*
 - *at least one mixing tank, with power-driven mixing equipment, with or without heating equipment, and with provision for the incorporation of additives, and*
 - *packaging equipment.*

These last three requirements concerning plant equipment are also applicable when the mixing is carried out in rented plants or by a subcontractor.

SECTION VII

PLASTICS AND ARTICLES THEREOF; RUBBER AND ARTICLES THEREOF Notes

1. Goods put up in sets consisting of two or more separate constituents, some or all of which fall in this section and are intended to be mixed together to obtain a product of Section VI or VII, are to be classified in the heading appropriate to that product, provided that the constituents are:
 - (a) having regard to the manner in which they are put up, clearly identifiable as being intended to be used together without first being repacked;

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

- (b) presented together; and
 - (c) identifiable, whether by their nature or by the relative proportions in which they are present, as being complementary one to another.
2. Except for the goods of heading No 3918 or 3919, plastics, rubber, and articles thereof, printed with motifs, characters or pictorial representations, which are not merely incidental to the primary use of the goods, fall within Chapter 49.

CHAPTER 39

PLASTICS AND ARTICLES THEREOF

Notes

1. Throughout the nomenclature the expression 'plastics' means those materials of heading Nos 3901 to 3914 which are or have been capable, either at the moment of polymerization or at some subsequent stage, of being formed under external influence (usually heat and pressure, if necessary with a solvent or plasticizer) by moulding, casting, extruding, rolling or other process into shapes which are retained on the removal of the external influence.

Throughout the nomenclature any reference to 'plastics' also includes vulcanized fibre. The expression, however, does not apply to materials regarded as textile materials of Section XI.

2. This chapter does not cover:
- (a) waxes of heading No 2712 or 3404;
 - (b) separate chemically defined organic compounds (Chapter 29);
 - (c) heparin or its salts (heading No 3001);
 - (d) stamping foils of heading No 3212;
 - (e) organic surface-active agents or preparations of heading No 3402;
 - (f) run gums or ester gums (heading No 3806);
 - (g) synthetic rubber, as defined for the purposes of Chapter 40, or articles thereof;
 - (h) saddlery or harness (heading No 4201) or trunks, suitcases, handbags or other containers of heading No 4202;
 - (ij) plaits, wickerwork or other articles of Chapter 46;
 - (k) wall coverings of heading No 4814;
 - (l) goods of Section XI (textiles and textile articles);

 - (p) parts of aircraft or vehicles of Section XVII;

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

- (q) articles of Chapter 90 (for example, optical elements, spectacle frames, drawing instruments);

 - (v) articles of Chapter 96 (for example, brushes, buttons, slide fasteners, combs, mouthpieces or stems for smoking pipes, cigarette-holders or the like, parts of vacuum flasks or the like, pens, propelling pencils).
3. Heading Nos 3901 to 3911 apply only to goods of a kind produced by chemical synthesis, falling in the following categories:
- (a) liquid synthetic polyolefins of which less than 60 % by volume distils at 300 °C, after conversion to 1 013 mbar when a reduced-pressure distillation method is used (heading Nos 3901 and 3902);

4. For the purposes of this chapter, except where the context otherwise requires, copolymers (including co-polycondensates, co-polyaddition products, block copolymers and graft copolymers) and polymer blends are to be classified in the heading covering polymers of that comonomer which predominates by weight over every other single comonomer, comonomers whose polymers fall within the same heading being regarded as constituting a single comonomer.
- If no single comonomer predominates, copolymers or polymer blends, as the case may be, are to be classified in the heading which occurs last in numerical order among those which equally merit consideration.
- The expression 'copolymers' covers all polymers in which no single monomer contributes 95 % or more by weight to the total polymer content.
5. Chemically modified polymers, that is those in which only appendages to the main polymer chain have been changed by chemical reaction, are to be classified in the heading appropriate to the unmodified polymer. This provision does not apply to graft copolymers.
6. In heading Nos 3901 to 3914, the expression 'primary forms' applies only to the following forms:
- (a) liquids and pastes, including dispersions (emulsions and suspensions) and solutions;
 - (b) blocks of irregular shape, lumps, powders (including moulding powders), granules, flakes and similar bulk forms.

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

7. Heading No 3915 does not apply to waste, parings and scrap of a single thermoplastic material, transformed into primary forms (heading Nos 3901 to 3914).
8. For the purposes of heading No 3917, the expression ‘tubes, pipes and hoses’ means hollow products, whether semi-manufactured or finished products, of a kind generally used for conveying, conducting or distributing gases or liquids (for example, ribbed garden hose, perforated tubes). This expression also includes sausage casings and other lay-flat tubing. However, except for the last mentioned, those having an internal cross-section other than round, oval, rectangular (in which the length does not exceed one-and-a-half times the width) or in the shape of a regular polygon are not to be regarded as tubes, pipes and hoses but as profile shapes.
9. For the purposes of heading No 3918, the expression ‘wall or ceiling coverings of plastics’ applies to products in rolls, of a width not less than 45 cm, suitable for wall or ceiling decoration, consisting of plastics fixed permanently on a backing of any material other than paper, the layer of plastics (on the face side) being grained, embossed, coloured, design-printed or otherwise decorated.
10. In heading Nos 3920 and 3921, the expression ‘plates, sheets, film, foil and strip’ applies only to plates, sheets, film, foil and strip (other than those of Chapter 54) and to blocks of regular geometric shape, whether or not printed or otherwise surface-worked, uncut or cut into rectangles (including squares) but not further worked (even if when so cut they become articles ready for use).
11. Heading No 3925 applies only to the following articles, not being products covered by any of the earlier headings of sub-chapter II:
 - (a) reservoirs, tanks (including septic tanks), vats and similar containers, of a capacity exceeding 300 litres;
 - (b) structural elements used, for example, in floors, walls or partitions, ceilings or roofs;

 - (g) large-scale shelving for assembly and permanent installation, for example, in shops, workshops, warehouses;
 - (h) ornamental architectural features, for example, flutings, cupolas, dovecotes;
 - (ij) fittings and mountings intended for permanent installation in or on doors, windows, staircases, walls or other parts of buildings, for example, knobs, handles, hooks, brackets, towel rails, switch-plates and other protective plates.

Subheading note

1. Within any one heading of this chapter, copolymers (including co-polycondensates, co-polyaddition products, block copolymers and graft copolymers) are to be classified in the same subheading as homopolymers of the predominant comonomer and chemically modified polymers of the kind specified in note 5 to this chapter are to be classified in the same subheading as the unmodified polymer, provided that such copolymers or chemically modified polymers are not more specifically covered by any

Status: Point in time view as at 20/12/1994.

other subheading and that there is no residual subheading named 'Other' in the series of subheadings concerned. Polymer blends are to be classified in the same subheading as copolymers (or homopolymers, as the case may be) of the same monomers in the same proportions.

CHAPTER 40

RUBBER AND ARTICLES THEREOF

Notes

1. Except where the context otherwise requires, throughout the nomenclature the expression 'rubber' means the following products, whether or not vulcanized or hard: natural rubber, balata, gutta-percha, guayule, chicle and similar natural gums, synthetic rubber, factice derived from oils, and such substances reclaimed.
2. This chapter does not cover:
 - (a) goods of Section XI (textiles and textile articles);
 - (b) footwear or parts thereof of Chapter 64;
 - (c) headgear or parts thereof (including bathing caps) of Chapter 65;
 - (d) mechanical or electrical appliances or parts thereof of Section XVI (including electrical goods of all kinds), of hard rubber;

 - (b) blocks of irregular shape, lumps, bales, powders, granules, crumbs and similar bulk forms.
4. In note 1 to this chapter and in heading No 4002, the expression 'synthetic rubber' applies to:
 - (a) unsaturated synthetic substances which can be irreversibly transformed by vulcanization with sulphur into non-thermoplastic substances which, at a temperature between 18 and 29 °C, will not break on being extended to three times their original length and will return, after being extended to twice their original length, within a period of five minutes, to a length not greater than one-and-a-half times their original length. For the purposes of this test, substances necessary for the cross-linking, such as vulcanizing activators or accelerators, may be added; the presence of substances as provided for by note 5 (b) (ii) and (iii) is also permitted. However, the presence of

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

- any substances not necessary for the cross-linking, such as extenders, plasticizers and fillers, is not permitted;
- (b) thioplasts (TM); and
- (c) natural rubber modified by grafting or mixing with plastics, depolymerized natural rubber, mixtures of unsaturated synthetic substances with saturated synthetic high polymers provided that all the abovementioned products comply with the requirements concerning vulcanization, elongation and recovery in (a).
- 5.
- (a) Heading Nos 4001 and 4002 do not apply to any rubber or mixture of rubbers which has been compounded, before or after coagulation, with:
- (i) vulcanizing agents, accelerators, retarders or activators (other than those added for the preparation of pre-vulcanized rubber latex);
- (ii) pigments or other colouring matter, other than those added solely for the purpose of identification;
- (iii) plasticizers or extenders (except mineral oil in the case of oil-extended rubber), fillers, reinforcing agents, organic solvents or any other substances, except those permitted under (b).
- (b) The presence of the following substances in any rubber or mixture of rubbers shall not affect its classification in heading No 4001 or 4002, as the case may be, provided that such rubber or mixture of rubbers retains its essential character as a raw material:
- (i) emulsifiers or anti-tack agents;
- (ii) small amounts of breakdown products of emulsifiers;
- (iii) very small amounts of the following: heat-sensitive agents (generally for obtaining thermosensitive rubber latexes), cationic surface-active agents (generally for obtaining electro-positive rubber latexes), antioxidants, coagulants, crumbling agents, freeze-resisting agents, peptizers, preservatives, stabilizers, viscosity-control agents, or similar special-purpose additives.
6. For the purposes of heading No 4004, the expression 'waste, parings and scrap' means rubber waste, parings and scrap from the manufacture or working of rubber and rubber goods definitely not usable as such because of cutting-up, wear or other reasons.
7. Thread wholly of vulcanized rubber, of which any cross-sectional dimension exceeds 5 mm, is to be classified as strip, rods or profile shapes, of heading No 4008.

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

In heading No 4008, the expressions 'rods' and 'profile shapes' apply only to such products, whether or not cut to length or surface-worked but not otherwise worked.

Except where heading No 4803 otherwise requires, these headings do not apply to paper, paperboard, cellulose wadding or webs of cellulose fibres which have been otherwise processed, for example, by coating or impregnation.

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

3. In this chapter, the expression ‘newsprint’ means uncoated paper of a kind used for the printing of newspapers, of which not less than 65 % by weight of the total fibre content consists of wood fibres obtained by a mechanical process, unsized or very lightly sized, having a smoothness on each side not exceeding 200 seconds Bekk, weighing not less than 40 g/m² and not more than 57 g/m² and having an ash content by weight not exceeding 8 %.
4. In addition to handmade paper and paperboard, heading No 4802 covers only paper and paperboard made mainly from bleached pulp or from pulp obtained by a mechanical process and satisfying any of the following criteria:

5. Subject to note 3 to this chapter, heading No 4901 does not cover publications which are essentially devoted to advertising (for example, brochures, pamphlets, leaflets, trade catalogues, year books published by trade associations, tourist propaganda). Such publications are to be classified in heading No 4911.
6. For the purposes of heading No 4903, the expression 'children's picture books' means books for children in which the pictures form the principal interest and the text is subsidiary.

2.

- (A) Goods classifiable in Chapters 50 to 55 or in heading No 5809 or 5902 and of a mixture of two or more textile materials are to be classified as if consisting wholly of that one textile material which predominates by weight over any other single textile material.

When not one textile material predominates by weight, the goods are to be classified as if consisting wholly of that one textile material which is covered by the heading which occurs last in numerical order among those which equally merit consideration.

- (B) For the purposes of the above rule:
 - (a) gimped horsehair yarn (heading No 5110) and metallized yarn (heading No 5605) are to be treated as a single textile material the weight of which is to be taken as the aggregate of the weights of its components; for the classification of woven fabrics, metal thread is to be regarded as a textile material;
 - (b) the choice of the appropriate heading shall be effected by determining *first* the chapter and *then* the applicable heading within that chapter, disregarding any materials not classified in that chapter;
 - (c) when both Chapters 54 and 55 are involved with any other chapter, Chapters 54 and 55 are to be treated as a single chapter;
 - (d) where a chapter or a heading refers to goods of different textile materials, such materials are to be treated as a single textile material.
- (C) The provisions of paragraphs (A) and (B) above apply also to the yarns referred to in notes 3, 4, 5 or 6 below.

3.

- (A) For the purposes of this section, and subject to the exceptions in paragraph (B) below, yarns (single, multiple (folded) or cabled) of the following descriptions are to be treated as 'twine, cordage, ropes and cables':

 - (e) of other vegetable fibres, measuring more than 20 000 decitex; or

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

- (f) reinforced with metal thread.
- (B) Exceptions:
- (a) yarn of wool or other animal hair and paper yarn, other than yarn reinforced with metal thread;

- (A) For the purposes of Chapters 50, 51, 52, 54 and 55, the expression 'put up for retail sale' in relation to yarn means, subject to the exceptions in paragraph (B) below, yarn (single, multiple (folded) or cabled) put up:
- (a) on cards, reels, tubes or similar supports, of a weight (including support) not exceeding:
 - (i) 85 g in the case of silk, waste silk or man-made filament yarn; or
 - (ii) 125 g in other cases;
 - (b) in balls, hanks or skeins of a weight not exceeding:
 - (i) 85 g in the case of man-made filament yarn of less than 3 000 decitex, silk or silk waste;
 - (ii) 125 g in the case of all other yarns of less than 2 000 decitex; or
 - (iii) 500 g in other cases;
 - (c) in hanks or skeins comprising several smaller hanks or skeins separated by dividing threads which render them independent one of the other, each of uniform weight not exceeding:

 - (ii) put up on supports or in some other manner indicating its use in the textile industry (for example, on cops, twisting mill tubes, pirns, conical bobbins or spindles, or reeled in the form of cocoons for embroidery looms).
5. For the purposes of heading Nos 5204, 5401 and 5508, the expression ‘sewing thread’ means multiple (folded) or cabled yarn:
- (a) put up on supports (for example, reels, tubes) of a weight (including support) not exceeding 1 000 grams;
 - (b) dressed; and
 - (c) with a final ‘Z’ twist.
6. For the purposes of this section, the expression ‘high tenacity yarn’ means yarn having a tenacity, expressed in cN/tex (centinewtons per tex), greater than the following:

— single yarn of nylon or other polyamides, or of polyesters:	60 cN/tex,
— multiple (folded) or cabled yarn of nylon or other polyamides, or of polyesters:	53 cN/tex,
— single, multiple (folded) or cabled yarn of viscose rayon:	27 cN/tex.

7. For the purposes of this section, the expression ‘made up’ means:
- (a) cut otherwise than into squares or rectangles;
 - (b) produced in the finished state, ready for use (or merely needing separation by cutting dividing threads) without sewing or other working (for example, certain dusters, towels, table cloths, scarf squares, blankets);
 - (c) hemmed or with rolled edges, or with a knotted fringe at any of the edges, but excluding fabrics the cut edges of which have been prevented from unravelling by whipping or by other simple means;
 - (d) cut to size and having undergone a process of drawn thread work;
 - (e) assembled by sewing, gumming or otherwise (other than piece goods consisting of two or more lengths of identical material joined end to end and piece goods composed of two or more textiles assembled in layers, whether or not padded);

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

- (f) knitted or crocheted to shape, presented in the form of a number of items in the length.
8. Chapters 50 to 55 and, except where the context otherwise requires, Chapters 56 to 60, do not apply to goods made up within the meaning of note 7 above. Chapters 50 to 55 do not apply to goods of Chapters 56 to 59.
9. The woven fabrics of Chapters 50 to 55 include fabrics consisting of layers of parallel textile yarns superimposed on each other at acute or right angles. These layers are bonded at the intersections of the yarns by adhesive or by thermal bonding.
10. Elastic products consisting of textile materials combined with rubber threads are classified in this section.
11. For the purposes of this section, the expression ‘impregnated’ includes ‘dipped’.
12. For the purposes of this section, the expression ‘polyamides’ includes ‘aramids’.
13. Unless the context otherwise requires, textile garments of different headings are to be classified in their own headings even if put up in sets for retail sale.

Subheading notes

1. In this section and, where applicable, throughout the nomenclature, the following expressions have the meanings hereby assigned to them:
- (a) ‘*Elastomeric yarn*’:
 Filament yarn, including monofilament, of synthetic textile material, other than textured yarn, which does not break on being extended to three times its original length and which returns, after being extended to twice its original length, within a period of five minutes, to a length not greater than one-and-a-half times its original length.
- (b) ‘*Unbleached yarn*’:
 Yarn which:
- (i) has the natural colour of its constituent fibres and has not been bleached, dyed (whether or not in the mass) or printed; or
- (ii) is of indeterminate colour (grey yarn), manufactured from garnetted stock.
- Such yarn may have been treated with a colourless dressing or fugitive dye (which disappears after simple washing with soap) and, in the case of man-made fibres, treated in the mass with delustring agents (for example, titanium dioxide).
- (c) ‘*Bleached yarn*’:
 Yarn which:
- (i) has undergone a bleaching process, is made of bleached fibres or, unless the context otherwise requires, has been dyed white (whether or not in the mass) or treated with a white dressing;
- (ii) consists of a mixture of unbleached and bleached fibres; or
- (iii) is multiple (folded) or cabled and consists of unbleached and bleached yarns.
- (d) ‘*Coloured (dyed or printed) yarn*’:
 Yarn which:

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

- (i) is dyed (whether or not in the mass) other than white or in a fugitive colour or printed, or made from dyed or printed fibres;
- (ii) consists of a mixture of dyed fibres of different colours or of a mixture of unbleached or bleached fibres with coloured fibres (marl or mixture yarns), or is printed in one or more colours at intervals to give the impression of dots;
- (iii) is obtained from slivers or rovings which have been printed; or
- (iv) is multiple (folded) or cabled and consists of unbleached or bleached yarn and coloured yarn.

The above definitions also apply *mutatis mutandis* to monofilament and to strip or the like of Chapter 54.

(e) '*Unbleached woven fabric*':

Woven fabric made from unbleached yarn and which has not been bleached, dyed or printed. Such fabric may have been treated with a colourless dressing or a fugitive dye.

(f) '*Bleached woven fabric*':

Woven fabric which:

- (i) has been bleached or, unless the context otherwise requires, dyed white or treated with a white dressing, in the piece;
- (ii) consists of bleached yarn; or
- (iii) consists of unbleached and bleached yarn.

(g) '*Dyed woven fabric*':

Woven fabric which:

- (i) is dyed a single uniform colour other than white (unless the context otherwise requires) or has been treated with a coloured finish other than white (unless the context otherwise requires), in the piece; or
- (ii) consists of coloured yarn of a single uniform colour.

(h) '*Woven fabric of yarns of different colours*':

Woven fabric (other than printed woven fabric) which:

- (i) consists of yarns of different colours or yarns of different shades of the same colour (other than the natural colour of the constituent fibres);
- (ii) consists of unbleached or bleached yarn and coloured yarn; or
- (iii) consists of marl or mixture yarns.

(In all cases, the yarn used in selvages and piece ends is not taken into consideration.)

(ij) '*Printed woven fabric*':

Woven fabric which has been printed in the piece, whether or not made from yarns of different colours.

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

(The following are also regarded as printed woven fabrics: woven fabrics bearing designs made, for example, with a brush or spray gun, by means of transfer paper, by flocking or by the batik process.)

The process of mercerization does not affect the classification of yarns or fabrics within the above categories.

(k) 'Plain weave':

A fabric construction in which each yarn of the weft passes alternately over and under successive yarns of the warp and each yarn of the warp passes alternately over and under successive yarns of the weft.

2.

(A) Products of Chapters 56 to 63 containing two or more textile materials are to be regarded as consisting wholly of that textile material which would be selected under note 2 to this section for the classification of a product of Chapters 50 to 55 consisting of the same textile materials.

(B) For the application of this rule:

- (a) where appropriate, only the part which determines the classification under interpretative rule 3 shall be taken into account;
- (b) in the case of textile products consisting of a ground fabric and a pile or looped surface no account shall be taken of the ground fabric;
- (c) in the case of embroidery of heading No 5810 only the ground fabric shall be taken into account. However, embroidery without visible ground shall be classified with reference to the embroidering threads alone.

Additional note

1. For the application of note 13 to this section, the term 'textile garments' means garments of heading Nos 6101 to 6114 and 6201 to 6211.

CHAPTER 51

WOOL, FINE OR COARSE ANIMAL HAIR; HORSEHAIR YARN AND WOVEN FABRIC

Note

1. Throughout the nomenclature:
 - (a) 'wool' means the natural fibre grown by sheep or lambs;
 - (b) 'fine animal hair' means the hair of alpaca, llama, vicuna, camel, yak, Angora, Tibetan, Kashmir or similar goats (but not common goats), rabbit (including Angora rabbit), hare, beaver, nutria or musk-rat;
 - (c) 'coarse animal hair' means the hair of animals not mentioned above, excluding brush-making hair and bristles (heading No 0502) and horsehair (heading No 0503).

Additional note

1. For the purposes of subheadings 5111 11 11, 5111 11 19, 5111 19 11 and 5111 19 19, the expression 'Loden fabrics' means plain-weave fabrics weighing 250 g/m² or more but not exceeding 450 g/m², fullled, single-coloured or with mixed or mottled yarns, made from single yarns of carded wool mixed with fine animal hair; the fabrics may also contain coarse animal hair or man-made fibres. The fibres are laid or oriented in the same direction by a surface treatment which renders the fabrics waterproof

CHAPTER 54

MAN-MADE FILAMENTS

Notes

1. Throughout the nomenclature, the term 'man-made fibres' means staple fibres and filaments of organic polymers produced by manufacturing processes, either:
 - (a) by polymerization of organic monomers, such as polyamides, polyesters, polyurethanes or polyvinyl derivatives; or
 - (b) by chemical transformation of natural organic polymers (for example, cellulose, casein, proteins or algae), such as viscose rayon, cellulose acetate, cupro or alginates.

The terms 'synthetic' and 'artificial', used in relation to fibres, mean: synthetic: fibres as defined at (a); artificial: fibres as defined at (b).

The terms 'man-made', 'synthetic' and 'artificial' shall have the same meanings when used in relation to 'textile materials'.

2. Heading Nos 5402 and 5403 do not apply to synthetic or artificial filament tow of Chapter 55.

CHAPTER 55

MAN-MADE STAPLE FIBRES

Note

1. Heading Nos 5501 and 5502 apply only to man-made filament tow, consisting of parallel filaments of a uniform length equal to the length of the tow, meeting the following specifications:
 - (a) length of tow exceeding 2 m;
 - (b) twist less than five turns per metre;
 - (c) measuring per filament less than 67 decitex;
 - (d) synthetic filament tow only: the tow must be drawn, that is to say, be incapable of being stretched by more than 100 % of its length;
 - (e) total measurement of tow more than 20 000 decitex.

Tow of a length not exceeding 2 m is to be classified within heading No 5503 or 5504.

CHAPTER 56

WADDING, FELT AND NONWOVENS; SPECIAL YARNS; TWINE, CORDAGE, ROPES AND CABLES AND ARTICLES THEREOF

Notes

1. This chapter does not cover:
 - (a) wadding, felt or nonwovens, impregnated, coated or covered with substances or preparations (for example, perfumes or cosmetics of Chapter 33, soaps or detergents of heading No 3401, polishes, creams or similar preparations of heading No 3405, fabric softeners of heading No 3809) where the textile material is present merely as a carrying medium;
 - (b) textile products of heading No 5811;
 - (c) natural or artificial abrasive powder or grain, on a backing of felt or nonwovens (heading No 6805);
 - (d) agglomerated or reconstituted mica, on a backing of felt or nonwovens (heading No 6814); or
 - (e) metal foil on a backing of felt or nonwovens (Section XV).
2. The term 'felt' includes needleloom felt and fabrics consisting of a web of textile fibres the cohesion of which has been enhanced by a stitch-bonding process using fibres from the web itself.
3. Heading Nos 5602 and 5603 cover respectively felt and nonwovens, impregnated, coated, covered or laminated with plastics or rubber whatever the nature of these materials (compact or cellular).

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

Heading No 5603 also includes nonwovens in which plastics or rubber forms the bonding substance.

Heading Nos 5602 and 5603 do not, however, cover:

- (a) felt impregnated, coated, covered or laminated with plastics or rubber, containing 50 % or less by weight of textile material or felt completely embedded in plastics or rubber (Chapter 39 or 40);
 - (b) nonwovens, either completely embedded in plastics or rubber, or entirely coated or covered on both sides with such materials, provided that such coating or covering can be seen with the naked eye with no account being taken of any resulting change of colour (Chapter 39 or 40); or
 - (c) plates, sheets or strip of cellular plastics or cellular rubber combined with felt or nonwovens, where the textile material is present merely for reinforcing purposes (Chapter 39 or 40).
4. Heading No 5604 does not cover textile yarn, or strip or the like of heading No 5404 or 5405, in which the impregnation, coating or covering cannot be seen with the naked eye (usually Chapters 50 to 55); for the purpose of this provision, no account should be taken of any resulting change of colour.

Notes

1. This chapter does not apply to textile fabrics referred to in note 1 to Chapter 59, impregnated, coated, covered or laminated, or to other goods of Chapter 59.
2. Heading No 5801 also includes woven weft pile fabrics which have not yet had the floats cut, at which stage they have no pile standing up.
3. For the purposes of heading No 5803, 'gauze' means a fabric with a warp composed wholly or in part of standing or ground threads and crossing or doup threads which cross the standing or ground threads making a half turn, a complete turn or more to form loops through which weft threads pass.
4. Heading No 5804 does not apply to knotted net fabrics of twine, cordage or rope, of heading No 5608.
5. For the purposes of heading No 5806, the expression 'narrow woven fabrics' means:

Status: Point in time view as at 20/12/1994.

- (a) woven fabrics of a width not exceeding 30 cm, whether woven as such or cut from wider pieces, provided with selvages (woven, gummed or otherwise made) on both edges;
- (b) tubular woven fabrics of a flattened width not exceeding 30 cm; and
- (c) bias binding with folded edges, of a width when unfolded not exceeding 30 cm.

Narrow woven fabrics with woven fringes are to be classified in heading No 5808.

- 6. In heading No 5810, the expression 'embroidery' means *inter alia* embroidery with metal or glass thread on a visible ground of textile fabric, and sewn *appliqué* work of sequins, beads or ornamental motifs of textile or other materials. The heading does not apply to needlework tapestry (heading No 5805).
- 7. In addition to the products of heading No 5809, this chapter also includes articles made of metal thread and of a kind used in apparel, as furnishing fabrics or for similar purposes.

CHAPTER 59

IMPREGNATED, COATED, COVERED OR LAMINATED TEXTILE FABRICS; TEXTILE ARTICLES OF A KIND SUITABLE FOR INDUSTRIAL USE

Notes

1. Except where the context otherwise requires, for the purposes of this chapter, the expression 'textile fabrics' applies only to the woven fabrics of Chapters 50 to 55 and heading Nos 5803 and 5806, the braids and ornamental trimmings in the piece of heading No 5808 and the knitted or crocheted fabrics of heading No 6002.
2. Heading No 5903 applies to:
 - (a) textile fabrics, impregnated, coated, covered or laminated with plastics, whatever the weight per square metre and whatever the nature of the plastic material (compact or cellular), other than:
 - (1) fabrics in which the impregnation, coating or covering cannot be seen with the naked eye (usually Chapters 50 to 55, 58 or 60); for the purpose of this provision, no account should be taken of any resulting change of colour;
 - (2) products which cannot, without fracturing, be bent manually around a cylinder of a diameter of 7 mm, at a temperature between 15 and 30 °C (usually Chapter 39);
 - (3) products in which the textile fabric is either completely embedded in plastics or entirely coated or covered on both sides with such material, provided that such coating or covering can be seen with the naked eye with no account being taken of any resulting change of colour (Chapter 39);
 - (4) fabrics partially coated or partially covered with plastics and bearing designs resulting from these treatments (usually Chapters 50 to 55, 58 or 60);
 - (5) plates, sheets or strip of cellular plastics, combined with textile fabric, where the textile fabric is present merely for reinforcing purposes (Chapter 39); or
 - (6) textile products of heading No 5811;
 - (b) fabrics made from yarn, strip or the like, impregnated, coated, covered or sheathed with plastics, of heading No 5604.
3. For the purposes of heading No 5905, the expression 'textile wall coverings' applies to products in rolls, of a width of not less than 45 cm, suitable for wall or ceiling

This heading does not, however, apply to wall coverings consisting of textile flock or dust fixed directly on a backing of paper (heading No 4814) or on a textile backing (generally heading No 5907).

4. For the purposes of heading No 5906, the expression 'rubberized textile fabrics' means:
 - (a) textile fabrics impregnated, coated, covered or laminated with rubber:
 - (i) weighing not more than 1 500 g/m²; or
 - (ii) weighing more than 1 500 g/m² and containing more than 50 % by weight of textile material;
 - (b) fabrics made from yarn, strip or the like, impregnated, coated, covered or sheathed with rubber, of heading No 5604;
 - (c) fabrics composed of parallel textile yarns agglomerated with rubber, irrespective of their weight per square metre; and
 - (d) plates, sheets or strip of cellular rubber, combined with textile fabric, where the textile fabric is more than mere reinforcement, other than textile products of heading No 5811.
5. Heading No 5907 does not apply to:
 - (a) fabrics in which the impregnation, coating or covering cannot be seen with the naked eye (usually Chapters 50 to 55, 58 or 60); for the purpose of this provision, no account should be taken of any resulting change of colour;
 - (b) fabrics painted with designs (other than painted canvas being theatrical scenery, studio back-cloths or the like);
 - (c) fabrics partially covered with flock, dust, powdered cork or the like and bearing designs resulting from these treatments.

However, imitation pile fabrics remain classified in this heading;

 - (d) fabrics finished with normal dressings having a basis of amylaceous or similar substances;
 - (e) wood veneered on a backing of textile fabrics (heading No 4408);
 - (f) natural or artificial abrasive powder or grain, on a backing of textile fabrics (heading No 6805);
 - (g) agglomerated or reconstituted mica, on a backing of textile fabrics (heading No 6814); or
 - (h) metal foil on a backing of textile fabrics (Section XV).
6. Heading No 5910 does not apply to:

CHAPTER 61

ARTICLES OF APPAREL AND CLOTHING ACCESSORIES, KNITTED OR CROCHETED

Notes

1. This chapter applies only to made up knitted or crocheted articles.
2. This chapter does not cover:
 - (a) goods of heading No 6212;
 - (b) worn clothing or other worn articles of heading No 6309; or
 - (c) orthopaedic appliances, surgical belts, trusses or the like (heading No 9021).
3. For the purposes of heading Nos 6103 and 6104:
 - (a) Title term 'suit' means a set of garments composed of two or three pieces made up in identical fabric and comprising:
 - one garment designed to cover the lower part of the body and consisting of trousers, breeches or shorts (other than swimwear), a skirt or a divided skirt, having neither braces nor bibs, and

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

- one suit coat or jacket the outer shell of which, exclusive of sleeves, consists of four or more panels, designed to cover the upper part of the body, possibly with a tailored waistcoat in addition.

All of the components of a suit must be of the same fabric construction, style, colour and composition; they must also be of corresponding or compatible size. If several separate components to cover the lower part of the body are presented together (for example, trousers and shorts, or a skirt or divided skirt and trousers), the constituent lower part shall be the trousers, or, in the case of women's or girls' suits, the skirt or divided skirt, the other garments being considered separately.

The term 'suit' includes the following sets of garments, whether or not they fulfil all the above conditions:

- morning dress, comprising a plain jacket (cutaway) with rounded tails hanging well down at the back and striped trousers,
- evening dress (tailcoat), generally made of black fabric, the jacket of which is relatively short at the front, does not close and has narrow skirts cut in at the hips and hanging down behind,
- dinner jacket suits, in which the jacket is similar in style to an ordinary jacket (though perhaps revealing more of the shirt front), but has shiny silk or imitation silk lapels;

- (b) The term 'ensemble' means a set of garments (other than suits and articles of heading No 6107, 6108 or 6109), composed of several pieces made up in identical fabric, put up for retail sale, and comprising:

- one garment designed to cover the upper part of the body, with the exception of pullovers which may form a second upper garment in the sole context of twin sets, and of waistcoats which may also form a second upper garment, and
- one or two different garments, designed to cover the lower part of the body and consisting of trousers, bib and brace overalls, breeches, shorts (other than swimwear), a skirt or a divided skirt.

All of the components of an ensemble must be of the same fabric construction, style, colour and composition; they also must be of corresponding or compatible size. The term 'ensemble' does not apply to track suits or ski suits, of heading No 6112.

4. Heading Nos 6105 and 6106 do not cover garments with pockets below the waist, with a ribbed waistband or other means of tightening at the bottom of the garment, or garments having an average of less than 10 stitches per linear centimetre in each direction counted on an area measuring at least 10 cm x 10 cm. Heading No 6105 does not cover sleeveless garments.
5. For the purposes of heading No 6111:
 - (a) The expression 'babies' garments and clothing accessories' means articles for young children of a body height not exceeding 86 cm; it also covers babies' napkins;
 - (b) Articles which are *prima facie* classifiable both within heading No 6111 and within other headings of this chapter are to be classified within heading No 6111.
6. For the purposes of heading No 6112 'ski suits' means garments or sets of garments which, by their general appearance and texture, are identifiable as intended to be worn principally for skiing (cross-country or alpine). They consist either of:

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

- (a) a 'ski overall', that is, a one-piece garment designed to cover the upper and the lower parts of the body; in addition to sleeves and a collar the ski overall may have pockets or footstraps; or
- (b) a 'ski ensemble', that is, a set of garments composed of two or three pieces, put up for retail sale and comprising:
- one garment such as an anorak, wind-cheater, wind-jacket or similar article, closed by a slide fastener (zipper), possibly with a waistcoat in addition, and
 - one pair of trousers whether or not extending above waist level, one pair of breeches or one bib and brace overall.

The 'ski ensemble' may also consist of an overall similar to the one mentioned in paragraph (a) above and a type of padded, sleeveless jacket worn over the overall.

All the components of a 'ski ensemble' must be made up in a fabric of the same texture, style and composition whether or not of the same colour; they also must be of corresponding or compatible size.

7. Garments which are *prima facie* classifiable both within heading No 6113 and within other headings of this chapter, excluding heading No 6111, are to be classified within heading No 6113.
8. Garments of this chapter designed for left over right closure at the front shall be regarded as men's or boys' garments, and those designed for right over left closure at the front as women's or girls' garments. These provisions do not apply where the cut of the garment clearly indicates that it is designed for one or other of the sexes.

Garments which cannot be identified as either men's or boys' garments or as women's or girls' garments are to be classified in the headings covering women's or girls' garments.

9. Articles of this chapter may be made of metal thread.

Additional notes

1. *For the application of note 3 (b) of this chapter the components of an ensemble must be made up entirely in a single identical fabric, subject to compliance with the other conditions laid down in the said note.*

For this purpose the fabric used can be unbleached, bleached, dyed, of yarns of different colours or printed.

Sets of garments are not regarded as ensembles when their components are made up in different fabrics, even if the difference is due only to their respective colours.

All the components of an ensemble must be presented together for retail sale as a single unit. Individual wrapping or separate labelling of each component of such a single unit does not influence its classification as an ensemble.

2. *For the purposes of heading No 6109, the terms 'singlets' and 'other vests' include garments, even if of a fancy design, worn next to the body, without collar, with or without sleeves, including those with shoulder straps.*

These garments, which are intended to cover the upper part of the body, often possess many characteristics in common with those of T-shirts or with more traditional kinds of singlets and other vests of heading No 6109.

However, garments having a drawstring, ribbed waistband or other means of tightening at the bottom are excluded from heading No 6109.

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

CHAPTER 62

ARTICLES OF APPAREL AND CLOTHING ACCESSORIES, NOT KNITTED OR CROCHETED

Notes

1. This chapter applies only to made-up articles of any textile fabric other than wadding, excluding knitted or crocheted articles (other than those of heading No 6212).
2. This chapter does not cover:
 - (a) worn clothing or other worn articles of heading No 6309; or
 - (b) orthopaedic appliances, surgical belts, trusses or the like (heading No 9021).
3. For the purposes of heading Nos 6203 and 6204:
 - (a) The term 'suit' means a set of garments composed of two or three pieces made up in identical fabric and comprising:
 - one garment designed to cover the lower part of the body and consisting of trousers, breeches or shorts (other than swimwear), a skirt or a divided skirt, having neither braces nor bibs, and
 - one suit coat or jacket the outer shell of which, exclusive of sleeves, consists of four or more panels, designed to cover the upper part of the body, possibly with a tailored waistcoat in addition.

All of the components of a suit must be of the same fabric construction, style, colour and composition; they must also be of corresponding or compatible size. If several separate components to cover the lower part of the body are presented together (for example, trousers and shorts, or a skirt or divided skirt and trousers), the constituent lower part shall be the trousers, or, in the case of women's or girls' suits, the skirt or divided skirt, the other garments being considered separately.

The term 'suit' includes the following sets of garments, whether or not they fulfil all the above conditions:

- morning dress, comprising a plain jacket (cutaway) with rounded tails hanging well down at the back and striped trousers,
- evening dress (tailcoat), generally made of black cloth, the jacket of which is relatively short at the front, does not close and has narrow skirts cut in at the hips and hanging down behind,

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

— dinner jacket suits, in which the jacket is similar in style to an ordinary jacket (though perhaps revealing more of the shirt front), but has shiny silk or imitation silk lapels.

(b) The term ‘ensemble’ means a set of garments (other than suits and articles of heading No 6207 or 6208) composed of several pieces made up in identical fabric, put up for retail sale, and comprising:

- one garment designed to cover the upper part of the body, with the exception of waistcoats which may also form a second upper garment, and
- one or two different garments, designed to cover the lower part of the body and consisting of trousers, bib and brace overalls, breeches, shorts (other than swimwear), a skirt or a divided skirt.

All of the components of an ensemble must be of the same fabric construction, style, colour and composition; they also must be of corresponding or compatible size. The term ‘ensemble’ does not apply to track suits or ski suits, of heading No 6211.

4. For the purposes of heading No 6209:

- (a) The expression ‘babies’ garments and clothing accessories’ means articles for young children of a body height not exceeding 86 cm; it also covers babies’ napkins;
- (b) Articles which are *prima facie* classifiable both within heading No 6209 and within other headings of this chapter are to be classified within heading No 6209.

5. Garments which are *prima facie* classifiable both within heading No 6210 and within other headings of this chapter, excluding heading No 6209, are to be classified within heading No 6210.

6. For the purposes of heading No 6211, ‘ski suits’ means garments or sets of garments which, by their general appearance and texture, are identifiable as intended to be worn principally for skiing (cross-country or alpine). They consist either of:

- (a) a ‘ski overall’, that is, a one-piece garment designed to cover the upper and the lower parts of the body; in addition to sleeves and a collar the ski overall may have pockets or footstraps; or
- (b) a ‘ski ensemble’, that is, a set of garments composed of two or three pieces, put up for retail sale and comprising:
 - one garment such as an anorak, wind-cheater, wind-jacket or similar article, closed by a slide fastener (zipper), possibly with a waistcoat in addition, and
 - one pair of trousers whether or not extending above waist level, one pair of breeches or one bib and brace overall.

The ‘ski ensemble’ may also consist of an overall similar to the one mentioned in paragraph (a) above and a type of padded, sleeveless jacket worn over the overall.

All the components of a ‘ski ensemble’ must be made up in a fabric of the same texture, style and composition whether or not of the same colour; they also must be of corresponding or compatible size.

7. Scarves and articles of the scarf type, square or approximately square, of which no side exceeds 60 cm, are to be classified as handkerchiefs (heading No 6213). Handkerchiefs of which any side exceeds 60 cm are to be classified within heading No 6214.

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

8. Garments of this chapter designed for left over right closure at the front shall be regarded as men's or boys' garments, and those designed for right over left closure at the front as women's or girls' garments. These provisions do not apply where the cut of the garment clearly indicates that it is designed for one or other of the sexes.

Garments which cannot be identified as either men's or boys' garments or as women's or girls' garments are to be classified in the headings covering women's or girls' garments.

9. Articles of this chapter may be made of metal thread.

Additional note

1. *For the application of note 3 (b) of this chapter the components of an ensemble must be made up entirely in a single identical fabric, subject to compliance with the other conditions laid down in the said note.*

For this purpose the fabric used can be unbleached, bleached, dyed, of yarns of different colours or printed.

Sets of garments are not regarded as ensembles when their components are made up in different fabrics, even if the difference is due only to their respective colours.

All the components of an ensemble must be presented together for retail sale as a single unit. Individual wrapping or separate labelling of each component of such a single unit does not influence its classification as an ensemble.

CHAPTER 70

GLASS AND GLASSWARE

Notes

1. This chapter does not cover:
 - (a) goods of heading No 3207 (for example, verifiable enamels and glazes, glass frit, other glass in the form of powder, granules or flakes);
 - (b) articles of Chapter 71 (for example, imitation jewellery);
 - (c) optical fibre cables of heading No 8544, electrical insulators (heading No 8546) or fittings of insulating material of heading No 8547;
 - (d) optical fibres, optically worked optical elements, hypodermic syringes, artificial eyes, thermometers, barometers, hydrometers or other articles of Chapter 90;
 - (e) lamps or lighting fittings, illuminated signs, illuminated name-plates or the like, having a permanently fixed light source, or parts thereof of heading No 9405;
 - (f) toys, games, sports requisites, Christmas tree ornaments or other articles of Chapter 95 (excluding glass eyes without mechanisms for dolls or for other articles of Chapter 95); or
 - (g) buttons, fitted vacuum flasks, scent or similar sprays or other articles of Chapter 96.
2. For the purposes of headings Nos 7003, 7004 and 7005:
 - (a) Glass is not regarded as 'worked' by reason of any process it has undergone before annealing.
 - (b) Cutting to shape does not affect the classification of glass in sheets.
 - (c) The expression 'absorbent or reflecting layer' means a microscopically thin coating of metal or of a chemical compound (for example, metal oxide) which absorbs, for example, infra-red light or improves the reflecting qualities of the glass while still allowing it to retain a degree of transparency or translucency.
3. The products referred to in heading No 7006 remain classified in that heading whether or not they have the character of articles.
4. For the purposes of heading No 7019, the expression 'glass wool' means:
 - (a) mineral wools with a silica (SiO₂) content not less than 60 % by weight;
 - (b) mineral wools with a silica (SiO₂) content less than 60 % but with an alkaline oxide (K₂O or Na₂O) content exceeding 5 % by weight or a boric oxide (B₂O₃) content exceeding 2 % by weight.

Mineral wools which do not comply with the above specifications fall within heading No 6806.

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

5. Throughout the nomenclature, the expression 'glass' includes fused quartz and other fused silica.

Subheading note

1. For the purposes of subheadings 7013 21, 7013 31 and 7013 91, the expression 'lead crystal' means only glass having a minimum lead monoxide (PbO) content by weight of 24 %.

2. For the classification of ferro-alloys in the subheadings of heading No 7202, the following rule should be observed:

A ferro-alloy is considered as binary and classified under the relevant subheading (if it exists) if only one of the alloy elements exceeds the minimum percentage laid down in note 1 (c) to this chapter; by analogy, it is considered respectively as ternary or quaternary if two or three alloy elements exceed the minimum percentage.

CHAPTER 73

ARTICLES OF IRON OR STEEL

Notes

- In this chapter the expression 'cast iron' applies to products obtained by casting in which iron predominates by weight over each of the other elements and which do not comply with the chemical composition of steel as defined in note 1 (d) to Chapter 72.
- In this chapter the word 'wire' means hot- or cold-formed products of any cross-sectional shape, of which no cross-sectional dimension exceeds 16 mm.

CHAPTER 74

COPPER AND ARTICLES THEREOF

Note

1. In this chapter the following expressions have the meanings hereby assigned to them:

(a) Refined copper:

Metal containing at least 99,85 % by weight of copper;

or

Metal containing at least 97,5 % by weight of copper, provided that the content by weight of any other element does not exceed the limit specified in the following table:

Other elements		Limiting content % by weight
Elements		
Ag	Silver	0,25
As	Arsenic	0,5
Cd	Cadmium	1,3
Cr	Chromium	1,4
Mg	Magnesium	0,8
Pb	Lead	1,5
S	Sulphur	0,7
Sn	Tin	0,8
Te	Tellurium	0,8
Zn	Zinc	1
Zr	Zirconium	0,3
Other elements ^a , each		0,3

^a Other elements are, for example, Al, Be, Co, Fe, Mn, Ni, Si.

(b) Copper alloys:

Metallic substances other than unrefined copper in which copper predominates by weight over each of the other elements, provided that:

(i) the content by weight of at least one of the other elements is greater than the limit specified in the foregoing table;

or

(ii) the total content by weight of such other elements exceeds 2,5 %.

(c) Master alloys:

Alloys containing with other elements more than 10 % by weight of copper, not usefully malleable and commonly used as an additive in the manufacture of other

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

alloys or as de-oxidants, de-sulphurizing agents or for similar uses in the metallurgy of non-ferrous metals. However, copper phosphide (phosphor copper) containing more than 15 % by weight of phosphorus falls within heading No 2848.

(d) Bars and rods:

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including 'flattened circles' and 'modified rectangles', of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including 'modified rectangular') cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

Wire-bars and billets with their ends tapered or otherwise worked simply to facilitate their entry into machines for converting them into, for example, drawing stock (wire-rod) or tubes, are however to be taken to be unwrought copper of heading No 7403.

(e) Profiles:

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

(f) Wire:

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including 'flattened circles' and 'modified rectangles', of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including 'modified rectangular') cross-section exceeds one-tenth of the width.

In the case of heading No 7414, however, the term 'wire' applies only to products, whether or not in coils, of any cross-sectional shape, of which no cross-sectional dimension exceeds 6 mm.

(g) Plates, sheets, strip and foil:

Flat-surfaced products (other than the unwrought products of heading No 7403), coiled or not, of solid rectangular (other than square) cross-section with or without rounded corners (including 'modified rectangles' of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Heading Nos 7409 and 7410 apply *inter alia* to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

(h) Tubes and pipes:

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be taken to be tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

Subheading note

1. In this chapter the following expressions have the meanings hereby assigned to them:

(a) Copper-zinc base alloys (brasses):

Alloys of copper and zinc, with or without other elements. When other elements are present:

- zinc predominates by weight over each of such other elements,
- any nickel content by weight is less than 5 % (see copper-nickel-zinc alloys (nickel silvers)), and
- any tin content by weight is less than 3 % (see copper-tin alloys (bronzes)).

(b) Copper-tin base alloys (bronzes):

Alloys of copper and tin, with or without other elements. When other elements are present, tin predominates by weight over each of such other elements, except that when the tin content is 3 % or more the zinc content by weight may exceed that of tin but must be less than 10 %.

(c) Copper-nickel-zinc base alloys (nickel silvers):

Alloys of copper, nickel and zinc, with or without other elements. The nickel content is 5 % or more by weight (see copper-zinc alloys (brasses)).

(d) Copper-nickel base alloys:

Alloys of copper and nickel, with or without other elements but in any case containing by weight not more than 1 % of zinc. When other elements are present, nickel predominates by weight over each of such other elements.

NICKEL AND ARTICLES THEREOF

Note

1. In this chapter the following expressions have the meanings hereby assigned to them:

(a) Bars and rods:

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including 'flattened circles' and 'modified rectangles', of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including 'modified rectangular') cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

(b) Profiles:

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

(c) Wire:

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including 'flattened circles' and 'modified rectangles', of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including 'modified rectangular') cross-section exceeds one-tenth of the width.

(d) Plates, sheets, strip and foil:

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

Flat-surfaced products (other than the unwrought products of heading No 7502), coiled or not, of solid rectangular (other than square) cross-section with or without rounded corners (including 'modified rectangles' of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,
- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Heading No 7506 applies *inter alia* to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

(e) Tubes and pipes:

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular, or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Heading No 7804 applies *inter alia* to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

(e) Tubes and pipes:

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

4. Where a machine (including a combination of machines) consists of individual components (whether separate or interconnected by piping, by transmission devices, by electric cables or by other devices) intended to contribute together to a clearly defined function covered by one of the headings in Chapter 84 or 85, then the whole falls to be classified within the heading appropriate to that function.
5. For the purposes of these notes, the expression 'machine' means any machine, machinery, plant, equipment, apparatus or appliance cited in the headings of Chapter 84 or 85.

Additional notes

- 1. *Tools necessary for the assembly or maintenance of machines are to be classified with those machines if imported with them. Interchangeable tools imported with machines are also to be classified therewith if they form part of the normal equipment of the machines and are normally sold with them.*
- 2. *Should the customs so require, the declarant shall produce, in support of his declaration, an illustrated document (for example, instructions, prospectus, a page from a catalogue, a photograph) giving the normal description of the machine, its uses and essential characteristics and, in respect of an unassembled or disassembled machine, an assembly plan and a list of the contents of the various packages.*

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

3. *The provisions of general rule 2 (a) are also applicable, at the request of the declarant and subject to conditions stipulated by the competent authorities, to machines imported in split consignments.*
4. *Tractors coupled, even by means of special devices, to machines and mechanical appliances of this section are in all cases to be classified separately (heading No 8701).*

CHAPTER 84

NUCLEAR REACTORS, BOILERS, MACHINERY AND MECHANICAL APPLIANCES; PARTS THEREOF

Notes

1. This chapter does not cover:
 - (a) millstones, grindstones or other articles of Chapter 68;
 - (b) appliances or machinery (for example, pumps) or parts thereof, of ceramic material (Chapter 69);
 - (c) laboratory glassware (heading No 7017); machinery, appliances or other articles for technical uses or parts thereof, of glass (heading No 7019 or 7020);
 - (d) articles of heading No 7321 or 7322 or similar articles of other base metals (Chapters 74 to 76 or 78 to 81);
 - (e) electro-mechanical tools for working in the hand, of heading No 8508 or electro-mechanical domestic appliances of heading No 8509; or
 - (f) hand-operated mechanical floor sweepers, not motorized (heading No 9603).
2. Subject to the operation of note 3 to Section XVI, a machine or appliance which answers to a description within one or more of the heading Nos 8401 to 8424 and at the same time to a description within one or other of the heading Nos 8425 to 8480 is to be classified under the appropriate heading of the former group and not the latter.

Heading No 8419 does not, however, cover;

- (a) germination plant, incubators or brooders (heading No 8436);
- (b) grain dampening machines (heading No 8437);
- (c) diffusing apparatus for sugar juice extraction (heading No 8438);
- (d) machinery for the heat-treatment of textile yarns, fabrics or made up textile articles (heading No 8451); or
- (e) machinery or plant, designed for mechanical operation, in which a change of temperature, even if necessary, is subsidiary.

Heading No 8422 does not cover:

- (a) sewing machines for closing bags or similar containers (heading No 8452); or
- (b) office machinery of heading No 8472.

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

3. A machine-tool for working any material which answers to a description within heading No 8456 and at the same time to a description in heading No 8457, 8458, 8459, 8460, 8461, 8464 or 8465 is to be classified within heading No 8456.
4. Heading No 8457 applies only to machine-tools for working metal (other than lathes) which can carry out different types of machining operations either:
 - (a) by automatic tool change from a magazine or the like in conformity with a machining programme (machining centres);
 - (b) by the automatic use, simultaneously or sequentially, of different unit heads working on a fixed position workpiece (unit construction machines, single station); or
 - (c) by the automatic transfer of the workpiece to different unit heads (multi-station transfer machines).
5.
 - (A) For the purposes of heading No 8471, the expression 'automatic data-processing machines' means:
 - (a) digital machines, capable of
 - (1) storing the processing program or programs and at least the data immediately necessary for the execution of the program;
 - (2) being freely programmed in accordance with the requirements of the user;
 - (3) performing arithmetical computations specified by the user; and
 - (4) executing, without human intervention, a processing program which requires them to modify their execution, by logical decision during the processing run;
 - (b) analogue machines capable of simulating mathematical models and comprising at least: analogue elements, control elements and programming elements;
 - (c) hybrid machines consisting of either a digital machine with analogue elements or an analogue machine with digital elements.
 - (B) Automatic data-processing machines may be in the form of systems consisting of a variable number of separately housed units. A unit is to be regarded as being a part of the complete system if it meets all the following conditions:
 - (a) it is connectable to the central processing unit either directly or through one or more other units;
 - (b) it is specifically designed as part of such a system (it must, in particular, unless it is a power supply unit, be able to accept or deliver data in a form (code or signals) which can be used by the system).

Such units presented separately are also to be classified within heading No 8471.

Heading No 8471 does not cover machines incorporating or working in conjunction with an automatic data-processing machine and performing a specific function. Such machines are classified in the headings appropriate to their respective functions or, failing that, in residual headings.

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

6. Heading No 8482 applies *inter alia* to polished steel balls, the maximum and minimum diameters of which do not differ from the nominal diameter by more than 1 % or by more than 0,05 mm, whichever is less.

Other steel balls are to be classified within heading No 7326.

7. A machine which is used for more than one purpose is, for the purposes of classification, to be treated as if its principal purpose were its sole purpose.

Subject to note 2 to this chapter and note 3 to Section XVI, a machine the principal purpose of which is not described in any heading or for which no one purpose is the principal purpose is, unless the context otherwise requires, to be classified in heading No 8479. Heading No 8479 also covers machines for making rope or cable (for example, stranding, twisting or cabling machines) from metal wire, textile yarn or any other material or from a combination of such materials.

Subheading note

1. Subheading 8482 40 applies only to bearings with cylindrical rollers of a uniform diameter not exceeding 5 mm and having a length which is at least three times the diameter. The ends of the rollers may be rounded.

Additional note

1. *For the purposes of subheadings 8407 10 and 8409 10, the expression 'aircraft engines' shall apply only to engines designed for fitting with an airscrew or rotor.*

CHAPTER 85

ELECTRICAL MACHINERY AND EQUIPMENT AND PARTS THEREOF; SOUND RECORDERS AND REPRODUCERS, TELEVISION IMAGE AND SOUND RECORDERS AND REPRODUCERS, AND PARTS AND ACCESSORIES OF SUCH ARTICLES

Notes

1. This chapter does not cover:
 - (a) electrically warmed blankets, bed pads, foot-muffs or the like; electrically warmed clothing, footwear or ear pads or other electrically warmed articles worn on or about the person;
 - (b) articles of glass of heading No 7011; or

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

- (c) electrically heated furniture of Chapter 94.
- 2. Heading Nos 8501 to 8504 do not apply to goods described in heading No 8511, 8512, 8540, 8541 or 8542.

However, metal tank mercury arc rectifiers remain classified within heading No 8504.

- 3. Heading No 8509 covers only the following electro-mechanical machines of the kind commonly used for domestic purposes:
 - (a) vacuum cleaners, floor polishers, food grinders and mixers, and fruit or vegetable juice extractors, of any weight;
 - (b) other machines provided the weight of such machines does not exceed 20 kg.

The heading does not, however, apply to fans or ventilating or recycling hoods incorporating a fan, whether or not fitted with filters (heading No 8414), centrifugal clothes-dryers (heading No 8421), dish washing machines (heading No 8422), household washing machines (heading No 8450), roller or other ironing machines (heading No 8420 or 8451), sewing machines (heading No 8452), electric scissors (heading No 8508) or to electro-thermic appliances (heading No 8516).

- 4. For the purposes of heading No 8534, 'printed circuits' are circuits obtained by forming on an insulating base, by any printing process (for example, embossing, plating-up, etching) or by the 'film circuit' technique, conductor elements, contacts or other printed components (for example, inductances, resistors, capacitors) alone or interconnected according to a pre-established pattern, other than elements which can produce, rectify, modulate or amplify an electrical signal (for example, semiconductor elements).

The term 'printed circuits' does not cover circuits combined with elements other than those obtained during the printing process. Printed circuits may, however, be fitted with non-printed connecting elements.

Thin or thick-film circuits comprising passive and active elements obtained during the same technological process are to be classified within heading No 8542.

- 5. For the purposes of heading Nos 8541 and 8542:
 - (A) 'Diodes, transistors and similar semiconductor devices' are semiconductor devices the operation of which depends on variations in resistivity on the application of an electric field;
 - (B) 'Electronic integrated circuits and microassemblies' are:
 - (a) monolithic integrated circuits in which the circuit elements (diodes, transistors, resistors, capacitors, interconnections, etc.) are created in the mass (essentially) and on the surface of a semiconductor material (doped silicon, for example) and are inseparably associated;
 - (b) hybrid integrated circuits in which passive elements (resistors, capacitors, interconnections, etc.), obtained by thin-or thick-film technology, and active elements (diodes, transistors, monolithic integrated circuits, etc.), obtained by semiconductor technology, are combined to all intents and purposes indivisibly, on a single insulating substrate (glass, ceramic, etc.). These circuits may also include discrete components;

Status: Point in time view as at 20/12/1994.

Changes to legislation: There are currently no known outstanding effects for the Commission Regulation (EC) No 3115/94 of. (See end of Document for details)

- (c) microassemblies of the moulded module, micromodule or similar types, consisting of discrete, active or both active and passive, components which are combined and interconnected.

For the classification of the articles defined in this note, heading Nos 8541 and 8542 shall take precedence over any other heading in the nomenclature which might cover them by reference to, in particular, their function.

6. Records, tapes and other media of heading No 8523 or 8524 remain classified within those headings, whether or not they are presented with the apparatus for which they are intended.

Additional notes

1. *Subheadings 8519 10, 8519 21, 8519 29, 8519 31 and 8519 39 are to be taken not to apply to sound reproducing apparatus with laser optical reading system, which fall within subheading 8519 99 11 or 8519 99 19.*
2. *Subheading 8524 10 is to be taken not to apply to 'compact discs', which fall within subheading 8524 90 10.*

2. The expressions 'parts' and 'parts and accessories' do not apply to the following articles, whether or not they are identifiable as for the goods of this section:
 - (a) joints, washers and the like of any material (classified according to their constituent material or in heading No 8484) or other articles of vulcanized rubber other than hard rubber (heading No 4016);
 - (b) parts of general use, as defined in note 2 to Section XV, of base metal (Section XV), or similar goods of plastics (Chapter 39);
 - (c) articles of Chapter 82 (tools);
 - (d) articles of heading No 8306;
 - (e) machines or apparatus of heading Nos 8401 to 8479, or parts thereof; articles of heading No 8481 or 8482 or, provided they constitute integral parts of engines or motors, articles of heading No 8483;

3. References in Chapters 86 to 88 to 'parts' or 'accessories' do not apply to parts or accessories which are not suitable for use solely or principally with the articles of those chapters. A part or accessory which answers to a description in two or more of the headings of those chapters is to be classified within that heading which corresponds to the principal use of that part or accessory.
4. Aircraft specially constructed so that they can also be used as road vehicles are classified as aircraft.

Amphibious motor vehicles are classified as motor vehicles.

5. Air-cushion vehicles are to be classified within this section with the vehicles to which they are most akin as follows:
 - (a) in Chapter 86 if designed to travel on a guide-track (hovertrains);
 - (b) in Chapter 87 if designed to travel over land or over both land and water;
 - (c) in Chapter 89 if designed to travel over water, whether or not able to land on beaches or landing-stages or also able to travel over ice.

CHAPTER 91

CLOCKS AND WATCHES AND PARTS THEREOF

Notes

1. This chapter does not cover:
 - (a) clock or watch glasses or weights (classified according to their constituent material);
 - (b) watch chains (heading No 7113 or 7117, as the case may be);
 - (c) parts of general use defined in note 2 to Section XV, of base metal (Section XV), or similar goods of plastics (Chapter 39) or of precious metal or metal clad with precious metal (generally heading No 7115); clock or watch springs are, however, to be classified as clock or watch parts (heading No 9114);
 - (d) bearing balls (heading No 7326 or 8482, as the case may be);
 - (e) articles of heading No 8412 constructed to work without an escapement;
 - (f) ball bearings (heading No 8482); or
 - (g) articles of Chapter 85, not yet assembled together or with other components into watch or clock movements or into articles suitable for use solely or principally as parts of such movements (Chapter 85).
2. Heading No 9101 covers only watches with case wholly of precious metal or of metal clad with precious metal, or of the same materials combined with natural or cultured pearls, or precious or semi-precious stones (natural, synthetic or reconstructed) of heading Nos 7101 to 7104. Watches with case of base metal inlaid with precious metal fall within heading No 9102.
3. For the purposes of this chapter, the expression 'watch movements' means devices regulated by a balance-wheel and hairspring, quartz crystal or any other system capable of determining intervals of time, with a display or a system to which a mechanical display can be incorporated. Such watch movements shall not exceed 12 mm in thickness and 50 mm in width, length or diameter.
4. Except as provided in note 1, movements and other parts suitable for use both in clocks or watches and in other articles (for example, precision instruments) are to be classified within this chapter.
