

COUNCIL REGULATION (EC) No 1453/2001**of 28 June 2001****introducing specific measures for certain agricultural products for the Azores and Madeira and repealing Regulation (EEC) No 1600/92 (Poseima)**

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Articles 36, 37 and 299(2) thereof,

Having regard to the proposal from the Commission,

Having regard to the Opinion of the European Parliament ⁽¹⁾,

Whereas:

(1) By Decision 91/315/EEC ⁽²⁾ the Council adopted a programme of options specific to the remote and insular nature of Madeira and the Azores (Poseima) in accordance with the Community's policy of assistance for the outermost regions. The purpose of the programme is to facilitate the economic and social development of those regions and enable them to benefit from the advantages of the single market of which they are an integral part despite the objective factors leaving them geographically and economically isolated. The programme calls for the CAP to be applied in those regions and provides for special measures to be adopted, in particular to improve the conditions in which agricultural products are produced and marketed there and to mitigate the effects of their exceptional geographical situation and constraints as since recognised in Article 299(2) of the Treaty.

(2) The particular geographical situation of Madeira and the Azores imposes additional transport costs in supplying essential products for human consumption, for processing and as agricultural inputs. In addition, objective factors arising as a result of insularity impose further constraints on economic operators and producers in these islands that severely handicap their activities. These handicaps can be alleviated by lowering the price of these essential products. It is therefore appropriate to introduce specific supply arrangements to guarantee supply to these islands and compensate for the additional costs arising from their remoteness, insularity and outermost location.

(3) To that end, notwithstanding Article 23 of the Treaty, imports of the products concerned from third countries should be exempt from the applicable import duties. To take account of their origin and the customs treatment accorded to them under the Community provisions, products which have entered the Community's customs territory under inward processing or customs warehousing arrangements should be considered as direct imports, for the purpose of granting the benefits of the specific supply arrangements.

(4) In order to achieve the goal of lowering prices in these regions and mitigating the additional costs of their remoteness, insularity and outermost location while maintaining the competitiveness of Community products, aid should be granted for the supply to the islands of products of Community origin. Such aid should take account of the additional cost of transport to Madeira and the Azores and the prices applied to exports to third countries and, in the case of agricultural inputs and products intended for processing, the additional costs of insularity and outermost location.

(5) Since the quantities covered by the specific supply arrangements are limited to the supply requirements of these regions, those arrangements do not impair the proper functioning of the internal market. In addition, the economic advantages of the specific supply arrangements should not provoke deflections of trade in the products concerned. Re-dispatching or re-exportation of those products from the Azores and Madeira should therefore be prohibited. However, this prohibition does not apply to trade flows between the regions of Madeira and the Azores. Nor does it apply, where processing is concerned, subject to certain conditions, to exports to third countries to promote regional trade or to traditional consignments to the rest of the Community.

(6) The economic advantages of the specific supply arrangements should be passed on so as to reduce production costs and bring down prices throughout the production and distribution chain to the end user, culminating in lower consumer prices. They should therefore be granted only on condition that they are actually passed on, and monitoring must be carried out to that end.

(7) The area aid scheme for fruit and edible vegetables, roots and tubers, flowers and live plants has proved unsuitable, especially because of the slowness and

⁽¹⁾ Opinion delivered on 14 June 2001 (not yet published in the Official Journal).

⁽²⁾ OJ L 171, 29.6.1991, p. 10.

complexity of procedures and the way the proposed aid was structured. Lessons should be learned from the encouraging results of the Poseidom reform in that sector, and marketing and processing aid should be envisaged with a view to supplying the market in Madeira and the Azores. Such aid should help local produce compete with products from elsewhere on high-growth markets, better satisfy the requirements of consumers and new distribution channels, improve the productivity of farms and upgrade the quality of products. The marketing of these products, both fresh and processed, should be continued and they should be promoted on the Community market. An economic study of each region will help to refine the structure of the sector in these two regions.

- (8) It is essential, for both economic and environmental reasons, to keep vines, the most widespread crop, on Madeira. In order to help support domestic production, a flat-rate area aid is granted for the cultivation of vines for producing quality wines produced in specified regions. That aid also applies in the Azores.
- (9) Likewise, market regulation mechanisms and abandonment premiums do not apply in these two regions.
- (10) Agricultural producers in the Azores and Madeira should be encouraged to supply quality products and the marketing of these should be assisted. Using the Community's graphic symbol might help achieve this.
- (11) Traditional livestock farming activities should be supported in Madeira in order to help meet local consumption needs. To that end, derogations are needed from some of the provisions of the common market organisations which restrict production, to take account of the development and particular conditions of local production, which are quite different from those in the rest of the Community. This objective may also be pursued indirectly by financing genetic improvement programmes involving the purchase of pure-bred breeding animals, by purchasing commercial breeds more suited to local conditions and by supplementing the suckler cow premium and the slaughter premium, and, pending the development of local livestock farming, temporary provision should be made for the supply of male animals for fattening, the number of such animals to be supplied each year being limited so as not to compromise the abovementioned objective. The estimate of local consumption requirements is drawn up in a periodic balance. To ensure that Community support can be mobilised effectively, a comprehensive programme to support local activities in the livestock and milk products sectors should enable

the sectors concerned to define and implement strategies tailored to the local context for economic development, spatial organisation of production and increasing the professionalism of producers.

- (12) In Madeira, aid for human consumption of fresh cow's milk products is paid to the dairies. This aid has not succeeded in maintaining the balance between domestic and external supply, chiefly because of the serious structural difficulties affecting the sector and its poor capacity to adapt to new economic environments. Consequently, it is planned to direct this aid, in the context of a supply balance, towards the collection of local production linked with an authorisation to produce reconstituted UHT milk from milk powder of Community origin, with a view to covering local consumption more fully.
- (13) The need to maintain local production by way of incentives justifies not applying Regulation (EEC) No 3950/92⁽¹⁾. This exemption should be established within the limit of 4 000 tonnes, corresponding to the current production of 2 000 tonnes and to a reasonable possibility of increased production estimated at present at a maximum of 2 000 tonnes.
- (14) Potato production is essential in Madeira, for both economic and social and environmental reasons. The small size of farms and the cost of inputs make for very high production costs. Specific aid is granted for growing potatoes for human consumption in order to support domestic production to satisfy the islands' consumption patterns.
- (15) The aid for the cane-sugar-rum sector in Madeira is granted to support local production of the sugar cane needed to manufacture the products processed from it, within the limits of the requirements arising from the methods traditionally used in the region.
- (16) Liqueur wines should continue to be prepared using traditional methods in the islands by facilitating the purchase of concentrated musts and wine alcohol produced in the rest of the Community and by granting aid for the ageing of such wines. To assist the efforts made to maintain the quality and authenticity of these products, aid should be granted for marketing them.
- (17) Aid should be granted in Madeira for the production of wicker, which is important as a supplement to farming

⁽¹⁾ Council Regulation (EEC) No 3950/92 of 28 December 1992 establishing an additional levy in the milk and milk products sector (OJ L 405, 31.12.1992, p. 1). Regulation as last amended by Commission Regulation (EC) No 1256/1999 (OJ L 160, 26.6.1999, p. 73).

and provides a livelihood for family craft businesses in the most disadvantaged areas of the islands.

- (18) Technical and socio-economic difficulties have prevented the full conversion, on time, of areas planted with hybrid vine varieties prohibited by the common organisation of the market in wine. The wine produced by such vineyards is intended solely for traditional local consumption; additional time will allow such vineyards to be converted while preserving a regional economic fabric very heavily reliant upon wine-growing. Portugal should notify the Commission, each year, of the progress made in converting the areas concerned.
- (19) Milk production and cattle farming are the mainstay of the agricultural economy of the Azores, and support for the sector should take account of the crucial importance of these activities in both social and economic terms, especially for small farmers. To ensure the survival of traditional activity in this sector, the suckler cow premium and the aid for dairy cows should continue to be supplemented, within the limit of the available local quota. A supplement to the slaughter premium should be introduced and aid granted for the disposal of surplus male bovines for which no normal outlets can be found in the islands and which must be shipped to the rest of the Community at considerable additional cost, given the particular geographical situation of the region. To ensure that Community support can be mobilised effectively, a comprehensive programme to support local activities in the livestock and milk products sectors should enable the sectors concerned to define and implement strategies tailored to the local context for economic development, spatial organisation of production and increasing the professionalism of producers.
- (20) Agricultural activity in the Azores is highly dependent on milk production. This dependence, combined with other handicaps linked to their outermost location and the absence of viable alternative production, is detrimental to their economic development. The needs of local consumption in those islands covered by local production should be taken into account and some of the provisions of the common market organisation for milk and milk products on limiting output should be derogated from for a period of four marketing years beginning in 1999/2000 in order to take account of the level of development of and the conditions for local production. Although this measure derogates from the second subparagraph of Article 34(2) of the Treaty, it is restricted to milk producers in the Azores and is of marginal economic impact when compared with the total quota for Portugal. It should enable the sector in the Azores to continue being restructured over the period of application of this measure without interfering with the milk market and without appreciably affecting the sound working of the levy scheme at Portuguese or Community level.
- (21) With regard to crop cultivation in the Azores, the small cultivatable area, the small size and fragmentation of farms and the extensive nature of production all make for high production costs. It is vital that these crops (beet, chicory, potatoes, tobacco, pineapples, wine, tea, etc.) continue to be cultivated as an alternative to counterbalance the predominance of livestock farming, and to ensure this the aid granted to the local processing industry should be continued.
- (22) Furthermore, the making of liqueur wines in the Azores by traditional methods should be continued, by granting aid for the ageing of 'verdelho' wine.
- (23) The plant health of agricultural crops in Madeira is subject to particular problems associated with the climate and the inadequacy of the control measures hitherto applied there. Programmes should be implemented to combat harmful organisms including by organic methods. The Community's financial contribution towards such programmes should be specified.
- (24) Regulation (EC) No 1257/1999 ⁽¹⁾ lays down rural development measures that may be granted Community support and sets out the conditions for obtaining such support.
- (25) This Regulation seeks to remedy the handicaps due to the remote and insular nature of these regions.
- (26) The structures of certain agricultural holdings or processing and marketing enterprises located in these regions show serious shortcomings and are beset with specific difficulties. Provision should accordingly be made for derogations for certain types of investments from the provisions limiting or preventing the grant of some structural aid provided for in Regulation (EC) No 1257/1999.
- (27) Article 29(3) of Regulation (EC) No 1257/1999 restricts the grant of forestry support to forests and wooded areas belonging to private owners and municipalities

⁽¹⁾ Council Regulation (EC) No 1257/1999 of 17 May 1999 on support for rural development from the European Agricultural Guidance and Guarantee Fund (EAGGF) and amending and repealing certain Regulations (OJ L 160, 26.6.1999, p. 80).

and associations thereof. Part of the forests and wooded areas located in these regions belong to public authorities other than municipalities. Under these circumstances, the conditions laid down in the said Article should be made more flexible.

(28) The Community financial contribution for three of the accompanying measures referred to in Article 35(1) of Regulation (EC) No 1257/1999 may amount in the outermost regions to up to 85 % of the total eligible cost. On the other hand, in accordance with the third indent of the second subparagraph of Article 47(2) of Regulation (EC) No 1257/1999, the Community financial contribution for agri-environmental measures, which constitutes the fourth accompanying measure, should be limited to 75 % for all areas covered by Objective 1. In view of the importance attributed to agri-environment within the context of rural development, the rate of the Community financial contribution should be harmonised for all accompanying measures in the outermost regions.

(29) Article 24(2) of Regulation (EC) No 1257/1999 and the Annex thereto determine the maximum amounts per year eligible for Community agri-environmental aid. To take into account the specific environmental situation of certain very sensitive pasture areas in the Azores and the preservation of the landscape and traditional features of agricultural land, in particular the areas of terrace cultivation in Madeira, provision should be made for the possibility, in the case of certain specific measures, of increasing those amounts up to twofold.

(30) Pursuant to Article 14 of Regulation (EC) No 1260/1999 ⁽¹⁾, each plan, Community support framework, operational programme and single programming document should cover a period of seven years, and the programming period should begin on 1 January 2000. In the interests of cohesiveness and to avoid discrimination between beneficiaries of the same programme, the derogations provided for in this Regulation should, exceptionally, be applicable to the whole programming period.

(31) A derogation may be granted from the Commission's consistent policy of not authorising State operating aid for the production, processing and marketing of agricultural products covered by Annex I to the Treaty in order to mitigate the specific constraints on farming in the Azores and Madeira as a result of their remoteness, insularity and outermost location, small area, mountainous terrain, climate and their economic dependency on a small number of products.

⁽¹⁾ Council Regulation (EC) No 1260/1999 of 21 June 1999 laying down general provisions on the Structural Funds (OJ L 161, 26.6.1999, p. 1).

(32) The measures necessary for the implementation of this Regulation should be adopted in accordance with Council Decision 1999/468/EC of 28 June 1999 laying down the procedures for the exercise of implementing powers conferred on the Commission ⁽²⁾,

HAS ADOPTED THIS REGULATION:

Article 1

This Regulation lays down specific measures to remedy the difficulties caused by the remoteness, insularity and outermost location of the Azores and Madeira in respect of certain agricultural products.

TITLE I

SPECIFIC SUPPLY ARRANGEMENTS

Article 2

Specific supply arrangements are hereby introduced for the agricultural products listed in Annexes I and II to this Regulation, which are essential for human consumption, for processing and as agricultural inputs in the Azores and Madeira.

A forecast supply balance shall be drawn up stating the quantity of the agricultural products listed in Annexes I and II needed to meet supply requirements each year. A separate forecast balance may be drawn up for the requirements of the industries processing and packaging products intended for the local market, for export under certain conditions to third countries or for traditional consignment to the rest of the Community.

Article 3

1. No duties shall apply to direct imports into the Azores and Madeira of products covered by the specific supply arrangements if they originate in third countries, within the limit of the quantities determined in the supply balance.

Products which have entered the Community's customs territory under inward processing or customs warehousing arrangements shall be considered as direct imports for the purposes of this Title.

2. To ensure coverage of the requirements established in accordance with Article 2 in terms of quantity, price and quality, while taking care to maintain the Community's share in supplies, aid shall be granted to supply the Azores and Madeira with Community products held in public intervention storage or available on the Community market.

⁽²⁾ OJ L 184, 17.7.1999, p. 23.

Such aid shall be fixed to take account of the additional cost of transport to the Azores and Madeira and the prices applied to exports to third countries and, in the case of agricultural inputs and products intended for processing, the additional costs of insularity and outermost location.

3. In implementing the specific supply arrangements, account shall be taken, in particular, of the following:

- the specific requirements of the Azores and Madeira and, in the case of products intended for processing and agricultural inputs, the specific quality requirements,
- trade flows with the rest of the Community,
- the economic aspect of the proposed aid.

4. Entitlement under the specific supply arrangements shall be subject to the condition that the economic advantage derived either from exemption from import duties or from aid in the case of supply from the rest of the Community is actually passed on to the end user.

5. Products covered by the specific supply arrangements may not be re-exported to third countries or re-dispatched to the rest of the Community. This prohibition shall not apply to trade flows between the Azores and Madeira.

Where the products concerned are processed in the Azores or Madeira, the aforesaid prohibition shall not apply to exports of the processed products from the Azores or Madeira to third countries, in accordance with the conditions laid down by the Commission under the procedure referred to in Article 35(2).

Where the products concerned are processed in the Azores or Madeira, the aforesaid prohibition shall not apply to traditional shipments of the processed products to the rest of the Community.

No export refund shall be granted.

6. Detailed rules for applying this Title shall be adopted in accordance with the procedure referred to in Article 35(2). These shall include:

- the fixing of aid for supply from the rest of the Community,
- provisions to ensure that the advantages granted are actually passed on to the end user,
- introduction if necessary of a system of import or delivery licences.

The Commission shall draw up supply balances in accordance with the procedure referred to in Article 35(2). It may revise those balances, and the list of products in Annexes I and II, in

accordance with the same procedure, in the light of changes in the Azores' and Madeira's requirements.

When determining the Azores' raw sugar requirements, account shall be taken of the development of local production of sugar beet. The quantities covered by the supply arrangements shall be determined so as to ensure that the total volume of sugar refined in the Azores each year does not exceed 10 000 tonnes.

Article 9 of Regulation (EEC) No 2038/1999 ⁽¹⁾ shall not apply to the Azores.

TITLE II

MEASURES TO ASSIST LOCAL PRODUCTS

CHAPTER I

MEASURES COMMON TO BOTH REGIONS

SECTION 1

Livestock

Article 4

1. In the livestock sector, aid shall be granted for the supply to the Azores and Madeira of pure-bred animals, animals of commercial breeds and livestock products, originating in the Community, excluding pure-bred bovine animals to the Azores.

2. The terms for granting aid shall be laid down taking account, in particular, of the supply requirements of the Azores and Madeira for starting up production and genetic improvement of livestock and the need for the breeds best suited to local conditions. The aid shall be paid for the delivery of goods which fulfil the requirements specified in Community rules.

3. The following shall be taken into account when aid is being fixed:

- the conditions and in particular the costs of supply to the Azores and Madeira resulting from their geographical situation;
- the price of products on the Community market and on the world market;
- whether or not duties are charged on imports from third countries;
- the economic aspect of the proposed aid.

This aid shall not be granted for bananas grown in Madeira.

The aid shall be granted for products which conform to common standards fixed by Community legislation or, where no such standards exist, to specifications written into the supply contracts.

Grant of the aid shall be subject to the conclusion of supply contracts lasting one or more years between individual producers or producer groups, or producer organisations as referred to in Articles 11, 13 and 14 of Regulation (EC) No 2200/96 ⁽¹⁾ and the food industry or distributors, restaurants and the like or local authorities.

The aid shall be paid out to the abovementioned individual producers, producer groups or producer organisations within the limits of annual quantities established for each product category.

The amount of the aid shall be fixed on a flat-rate basis for each of the product categories to be determined, based on the average value of the products covered. The amount of aid shall be differentiated according to whether or not the beneficiary is one of the producer organisations referred to in Articles 11, 13 and 14 of Regulation (EC) No 2200/96.

2. This Article shall not apply to pineapples produced in the Azores.

3. The aid shall be granted to sellers who have concluded a contract as referred to in paragraph 1 with an operator established in the rest of the Community.

4. Where the measures provided for in paragraph 1 are undertaken by joint ventures constituted, with the aim of marketing produce from the regions concerned, by producers or producer organisations or associations in those regions and natural or legal persons established in the rest of the Community, and where the partners undertake to pool the knowledge and know-how required to achieve the objective of the joint venture over a minimum period of three years, the amount of the aid specified in paragraph 2 shall be increased to 13 % of the value of the annual production marketed jointly.

5. Detailed rules for applying this Article shall be adopted in accordance with the procedure referred to in Article 35(2).

international level, having regard to competition on the world market.

2. Detailed rules for applying this Article shall be adopted in accordance with the procedure referred to in Article 35(2).

SECTION 3

Wine

Article 8

Chapter II of Title II and Chapters I and II of Title III of Regulation (EC) No 1493/1999 ⁽¹⁾ and Chapter III of Regulation (EC) No 1227/2000 ⁽²⁾, shall not apply to the Azores and Madeira.

Article 9

1. A flat-rate aid per hectare shall be granted for the continued cultivation of vines for the production of quality wines psr in the traditional production zones.

The following areas shall be eligible for aid:

- (a) areas planted to vine varieties included among the varieties classified by the Member States as being suitable for the production of each of the quality wines psr produced in their territory, as referred to in Article 19 of Regulation (EC) No 1493/1999, and

Article 10

1. Notwithstanding Article 19(1) of Regulation (EC) No 1493/1999, grapes from prohibited direct-producer hybrid vine varieties (Noah, Othello, Isabelle, Jacquez, Clinton and Herbemont) harvested in the Azores and Madeira may be used for the production of wine which must remain within those regions.

2. By 31 December 2006 Portugal shall have gradually eliminated vineyards planted with prohibited direct-producer hybrid vine varieties, with, where appropriate, the support provided for in Chapter III, Title II, of Regulation (EC) No 1493/1999.

3. Portugal shall notify the Commission, each year, of the progress made in converting and restructuring areas planted with prohibited direct-producer hybrid vine varieties.

The conditions for using the graphic symbol introduced with a view to ensuring greater awareness and consumption of quality agricultural products, whether natural or processed, specific to the Azores and Madeira as outermost regions, shall be proposed by the professional organisations. The Portuguese authorities shall forward such proposals, with their opinion, to the Commission for approval.

Use of the symbol shall be monitored by an official authority or a body approved by the competent Portuguese authorities.

CHAPTER II

MEASURES TO ASSIST LOCAL PRODUCTS IN MADEIRA

SECTION 1

Livestock and milk products

Article 12

1. Until the local numbers of young male bovines reach a level sufficient to maintain traditional beef production, and within the limit of the balance referred to in Article 12:

- (a) the customs duties referred to in Article 30 of Regulation (EC) No 1254/1999 ⁽¹⁾ shall not be applied to imports of bovine animals from third countries for on-site fattening and consumption in the islands;
- (b) aid shall be granted for the supply of animals as referred to in (a) originating in the Community, up to a limit of 1 000 head. Priority shall be given to producers holding animals for fattening at least 50 % of which are of local origin.

Article 3(4) and (5) shall apply to goods qualifying for the measures referred to in the first subparagraph of this Article.

2. The numbers of animals qualifying for the measures referred to in paragraph 1 of this Article shall be determined in a periodic forecast supply balance, taking account of the development of local production. These numbers, the amount of the aid referred to in paragraph 1(b) of this Article and detailed rules for applying this Article, including in particular the minimum duration of the fattening period, shall be fixed in accordance with the procedure referred to in Article 35(2).

Article 13

1. The aid provided for in paragraphs 2 and 3 of this Article shall be granted to assist traditional activities connected with beef and veal production and measures to improve product quality, within the limits of the consumption needs of Madeira as assessed in the context of a periodic supply balance. The balance shall also take account of breeding animals supplied under Article 4 and animals covered by the specific supply arrangements provided for in Article 12.

2. A supplement to the slaughter premium provided for under Article 11 of Regulation (EC) No 1254/1999 shall be paid to producers for each locally fattened animal slaughtered. The amount of the supplement shall be EUR 25 per head. The supplement to the premium shall be granted annually within the limit of 2 500 slaughtered animals.

3. A supplement to the premium for maintaining suckler cows provided for in Article 6 of Regulation (EC) No 1254/1999 shall be paid to beef and veal producers. The amount of this supplement shall be EUR 50 per suckler cow held by the producer on the day on which the application is submitted.

4. The provisions relating to:

- (a) the regional ceiling laid down by Article 4 of Regulation (EC) No 1254/1999 as regards the special premium;
- (b) the individual ceiling for animals kept on the holding as laid down in Article 6 of Regulation (EC) No 1254/1999, as regards the basic suckler cow premium;

⁽¹⁾ Council Regulation (EC) No 1254/1999 of 17 May 1999 on the common organisation of the market in beef and veal (OJ L 160, 26.6.1999, p. 21).

- (c) the national ceiling referred to in Article 11 of Regulation (EC) No 1254/1999 as regards the basic slaughter premium

shall not apply in Madeira in the case of the special premium, the suckler cow premium, the slaughter premium or the supplementary premiums referred to in paragraphs 2 and 3 of this Article.

5. The basic premiums and the supplementary premiums referred to in paragraph 3 shall be granted each year for a maximum of 2 000 male bovine animals, 1 000 suckler cows and 6 000 slaughtered animals, respectively.

6. Detailed rules for applying this Article shall be adopted in accordance with the procedure referred to in Article 35(2). They shall cover drawing up the balances referred to in paragraph 1 of this Article and any reviews to take account of changing requirements and,

- (a) as regards the special premium for male bovine animals, they shall provide for:

— the 'freezing', within the regional ceiling set in Article 4 of Regulation (EC) No 1254/1999, of the number of animals for which the special premium was granted in Madeira for the year 2000,

— the grant of premiums within the limit of 90 animals per age group, per calendar year and per holding;
