—Mixtures of plastic wastes, consisting of polyethylene (PE), polypropylene (PP) or polyethylene terephthalate (PET), provided they are destined for separate recycling/reclamation of each material and in an environmentally sound manner, and almost free from contamination and other types of wastes

In this entry, “recycling/reclamation” means either of the following, as evidenced by contractual or relevant official documentation—

- (a) the recycling/reclamation of organic substances which are not used as solvents, or
- (b) if needed, temporary storage limited to one operation, provided that it is followed by the recycling/reclamation of organic substances which are not used as solvents]
