**COMMISSION REGULATION (EC) No 1152/2009****of 27 November 2009****imposing special conditions governing the import of certain foodstuffs from certain third countries due to contamination risk by aflatoxins and repealing Decision 2006/504/EC****(Text with EEA relevance)**

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Regulation (EC) No 178/2002 of the European Parliament and of the Council of 28 January 2002 laying down the general principles and requirements of food law, establishing the European Food Safety Authority and laying down procedures in matters of food safety <sup>(1)</sup>, and in particular Article 53(1)(b)(ii) thereof,

Whereas:

- (1) Commission Decision 2006/504/EC of 12 July 2006 on special conditions governing certain foodstuffs imported from certain third countries due to contamination risks of these products by aflatoxins <sup>(2)</sup>, has been amended substantially several times. It is necessary to amend again certain provisions substantially to take into account particularly developments as regards aflatoxin contamination of certain products covered by that Decision. At the same time, the provisions should have a direct application and be binding in their entirety, therefore Decision 2006/504/EC should be replaced by this Regulation.
- (2) Commission Regulation (EC) No 1881/2006 of 19 December 2006 setting maximum levels for certain contaminants in foodstuffs <sup>(3)</sup> lays down permitted maximum levels of aflatoxins in foodstuffs for the protection of public health. It can be observed that these maximum levels of aflatoxins are frequently exceeded in certain foodstuffs from certain countries. Such contamination constitutes a serious threat to public health within the Community and it is therefore appropriate to adopt special conditions at the Community level.

<sup>(1)</sup> OJ L 31, 1.2.2002, p. 1.

<sup>(2)</sup> OJ L 199, 21.7.2006, p. 21.

<sup>(3)</sup> OJ L 364, 20.12.2006, p. 5.

- (3) For the protection of public health it is important that compound foodstuffs containing to a significant amount the foodstuffs covered by this Regulation are also within the scope of this Regulation. To facilitate the enforcement of controls of processed and compound foodstuffs whilst maintaining a high level of effectiveness of controls, it is appropriate to increase the threshold for control of compound products. For the same reason, the limit of 5 kg for consignments falling out of scope should be increased to 20 kg. Competent authorities may control at random for the presence of aflatoxins the compound foodstuffs containing less than 20 % of foodstuffs covered by this Regulation. When monitoring data indicate that compound foodstuffs containing less than 20 % of foodstuffs covered by this Regulation have been found in several cases to be non-compliant with the Community legislation on maximum levels for aflatoxins, these thresholds should be reviewed.
- (4) The Combined Nomenclature (CN) code has changed for certain food categories covered by this Regulation. It is appropriate to change the CN codes in this Regulation accordingly.
- (5) Experience has shown that the additional conditions for non-compliant shipments of unshelled Brazil nuts imported from Brazil are no longer necessary, since such shipments can be handled in accordance with the general provisions for non-compliant shipments and those additional conditions should therefore be repealed. As regards the imports of foodstuffs from the United States of America, since the transitional provisions for non-USDA approved laboratories for aflatoxin analysis are no longer needed, those transitional provisions should be repealed.
- (6) Commission Regulation (EC) 669/2009 of 24 July 2009 implementing Regulation (EC) No 882/2004 of the European Parliament and of the Council as regards the increased level of official controls on imports of certain feed and food of non-animal origin and amending Decision 2006/504/EC <sup>(1)</sup> provides for the use of a Common Entry Document for prior notification of arrival of consignments and information on the official checks performed. It is appropriate to provide for the use of that document and to lay down specific guidance notes for the completion thereof in application of this Regulation.
- (7) In the light of the number and nature of notifications in the Rapid Alert System for Food and Feed, trade volumes, the outcome of inspections of the Food and Veterinary Office and the outcome of controls, the existing control frequencies should be reviewed.
- (8) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on the Food Chain and Animal Health,

HAS ADOPTED THIS REGULATION:
