

Commission Regulation (EU) No 142/2011 of 25 February 2011 implementing Regulation (EC) No 1069/2009 of the European Parliament and of the Council laying down health rules as regards animal by-products and derived products not intended for human consumption and implementing Council Directive 97/78/EC as regards certain samples and items exempt from veterinary checks at the border under that Directive (Text with EEA relevance)

## CHAPTER I

### GENERAL PROVISIONS

- Article 1 Subject matter and scope
- Article 2 Definitions
- Article 3 End point in the manufacturing chain for certain derived products
- Article 4 Serious transmissible diseases

## CHAPTER II

### DISPOSAL AND USE OF ANIMAL BY-PRODUCTS AND DERIVED PRODUCTS

- Article 5 Restrictions on the use of animal by-products and derived products
- Article 6 Disposal by incineration, disposal or recovery by co-incineration and use as a fuel for combustion
- Article 7 Landfilling of certain Category 1 and 3 materials
- Article 8 Requirements for processing plants and other establishments
- Article 9 Hygiene and processing requirements for processing plants and other establishments
- Article 10 Requirements regarding the transformation of animal by-products and derived products into biogas and composting

## CHAPTER III

### DEROGATIONS FROM CERTAIN PROVISIONS OF REGULATION (EC) No 1069/2009

- Article 11 Special rules on research and diagnostic samples
- Article 12 Special rules on trade samples and display items
- Article 13 Special feeding rules
- Article 14 Feeding of certain species in and outside feeding stations and in zoos
- Article 15 Special rules on collection and disposal

## CHAPTER IV

### AUTHORISATIONS OF ALTERNATIVE METHODS

- Article 16 Standard format for applications for authorisation of alternative methods

## CHAPTER V

### COLLECTION, TRANSPORT, IDENTIFICATION AND TRACEABILITY

- Article 17 Requirements regarding commercial documents and health certificates, identification, the collection and transport of animal by-products and traceability

## CHAPTER VI

### REGISTRATION AND APPROVAL OF ESTABLISHMENTS AND PLANTS

- Article 18 Requirements regarding the approval of one or more establishments and plants handling animal by-products on the same site
- Article 19 Requirements concerning certain approved establishments and plants handling animal by-products and derived products
- Article 20 Requirements concerning certain registered establishments and plants handling animal by-products and derived products
- Article 20a Lists of establishments, plants and operators ...

## CHAPTER VII

### PLACING ON THE MARKET

- Article 21 Processing and placing on the market of animal by-products and derived products for feeding to farmed animals, excluding fur animals
- Article 22 Placing on the market and use of organic fertilisers and soil improvers
- Article 23 Intermediate products
- Article 24 Petfood and other derived products

## CHAPTER VIII

### IMPORT, TRANSIT AND EXPORT

- Article 24A Special transitional import arrangements
- Article 25 Import from a third country, transit and export of animal by-products and of derived products
- Article 26 Placing on the market, including importation, and export of certain Category 1 materials
- Article 27 Importation from a third country and transit of research and diagnostic samples
- Article 28 Importation from a third country and transit of trade samples and display items
- Article 29 Specific requirements for certain movements of animal by-products between territories of the Russian Federation
- Article 29a Specific requirements for transit through Croatia of animal by-products coming from Bosnia and Herzegovina and destined to third countries
- Article 30 Lists of establishments and plants in third countries

Article 31 Models of health certificates and declarations for importation from a third country and transit

## CHAPTER IX

### OFFICIAL CONTROLS

Article 32 Official controls

Article 33 Reapproval of plants and establishments after the grant of a temporary approval

## CHAPTER X

### FINAL PROVISIONS

Article 34 Restrictions on the placing on the market of certain animal by-products and derived products for reasons of public and animal health

Article 35 Repeal

Article 36 Transitional measures

Article 37 This Regulation shall enter into force on the 20th day...

Signature

---

## ANNEX I

### DEFINITIONS AS REFERRED TO IN ARTICLE 2

For the purpose of this Regulation, the following definitions shall...

‘fur animals’ means animals kept or reared for the production...

## ANNEX II

### RESTRICTIONS ON THE USE OF ANIMAL BY-PRODUCTS

#### CHAPTER I

##### Intra-species recycling of fur animals

1. In Estonia, Latvia and Finland, the following fur animals may...
2. In Estonia and Latvia, fur animals of the species American...
3. The feeding referred to in points 1 and 2 shall...

#### CHAPTER II

##### Feeding of farmed animals with herbage

## ANNEX III

### DISPOSAL, RECOVERY AND USE AS A FUEL

#### CHAPTER I

#### GENERAL REQUIREMENTS FOR INCINERATION AND CO-INCINERATION

##### Section 1

###### General conditions

1. Operators of incineration and co-incineration plants referred to in Article...
2. The operator of an incineration or co-incineration plant shall take...
3. Animals must not have access to the plants, animal by-products...
4. If the incineration or co-incineration plant is located on a...
5. The storage of animal by-products and derived products that are...
6. Incompletely incinerated animal by-products must be reincinerated or disposed of...

##### Section 2

###### Operating conditions

##### Section 3

###### Incineration and co-incineration residues

1. Incineration and co-incineration residues shall be minimised in their amount...
2. Transport and intermediate storage of dry residues, including dust, shall...

##### Section 4

###### Measurement of temperature and of other parameters

1. Techniques shall be used to monitor the parameters and conditions...
2. The approval issued by the competent authority, or conditions attached...
3. The functioning of any automated monitoring equipment shall be subject...
4. Temperature measurement results shall be recorded and presented in an...

##### Section 5

###### Abnormal operating

## CHAPTER II

### HIGH-CAPACITY INCINERATION AND CO-INCINERATION PLANTS

#### Section 1

##### Specific operating conditions

#### Section 2

##### Water discharges

1. Sites of high capacity plants, including associated storage areas for...
2. Storage capacity shall be provided for contaminated rainwater run-off from...

## CHAPTER III

### LOW-CAPACITY INCINERATION AND CO-INCINERATION PLANTS

## CHAPTER IV

### GENERAL REQUIREMENTS FOR THE USE OF ANIMAL BY-PRODUCTS AND DERIVED...

#### Section 1

##### General requirements regarding the combustion of animal by-products and derived...

1. Operators of combustion plants referred to in Article 6(6) shall...
2. Operators of the combustion plants shall take all necessary precautions...
3. Animals must not have access to the combustion plant or...
4. Where the combustion plant is located on a holding keeping...
5. The animal by-products and derived products that are awaiting combustion...
6. The combustion of animal by-products or derived products shall be...

#### Section 2

##### Operating conditions of combustion plants

1. Combustion plants must be designed, built, equipped and operated in...
2. The gas resulting from the process is raised in a...
3. Automated techniques shall be used to monitor the parameters and...
4. Temperature measurement results shall be recorded automatically and presented in...

5. The operator of a combustion plant shall ensure that the...

### Section 3

#### Combustion residues

1. Combustion residues shall be minimised in their amount and harmfulness....
2. The transport and intermediate storage of dry residues, including dust,...

### Section 4

#### Breakdown or abnormal operating conditions

1. The combustion plant shall be equipped with facilities which automatically...
2. Incompletely combusted animal by-products and derived products must be combusted...

## CHAPTER V

### TYPES OF PLANTS AND FUELS THAT MAY BE USED FOR...

- A. Stationary internal combustion engines
  1. Starting material:
  2. Methodology:
  3. Operating conditions:
- B. On-farm combustion plants in which poultry manure is used as...
  1. Type of plant:
  2. Starting material and scope:
  3. Specific requirements for poultry manure used as a fuel for...
  4. Emission limit values and monitoring requirements:
  5. Changes of operation and breakdowns:
- C. Combustion plants in which manure of farmed animals other than...
  1. Type of plant:
  2. Starting material:
  3. Methodology:
  4. Derogation and transitional period:
- D. Combustion plants in which meat-and-bone meal is used as a...

## ANNEX IV PROCESSING

### CHAPTER I

#### REQUIREMENTS FOR PROCESSING PLANTS AND CERTAIN OTHER PLANTS AND ESTABLISHMENTS...

##### Section 1

###### General conditions

1. Processing plants shall meet the following requirements, for processing by...
2. The processing plant must have adequate facilities for cleaning and...
3. Adequate facilities must be provided for the disinfecting of vehicle...
4. All processing plants must have a waste-water disposal system meeting...
5. The processing plant must have its own laboratory or make...
6. If on the basis of a risk assessment, the volume...

##### Section 2

###### Wastewater treatment

1. Processing plants processing Category 1 material and other premises where...
2. Wastewater from the premises as referred to in point 1...
3. All animal material retained in the pre-treatment process in premises...
4. Wastewater having passed the pre-treatment process in premises referred to...
5. In addition to the requirements laid down in point 4,...
6. Without prejudice to points 1 to 5, the disposal of...

##### Section 3

Specific requirements for the processing of Category 1 and Category...

##### Section 4

Specific requirements for the processing of Category 3 materials

## CHAPTER II

### HYGIENE AND PROCESSING REQUIREMENTS

#### Section 1

##### General hygiene requirements

#### Section 2

##### General processing requirements

1. Accurately calibrated gauges/recorders must be used to monitor continuously the...
2. Material that may not have received the specified heat treatment,...

#### Section 3

##### Processing methods for Category 1 and Category 2 material

#### Section 4

##### Processing of Category 3 material

1. The critical control points that determine the extent of the...
2. In the case of chemical treatments which have been authorised...
3. Records shall be maintained for at least two years to...
4. Category 3 material shall be processed in accordance with any...

## CHAPTER III

### STANDARD PROCESSING METHODS

- A. Processing method 1 (pressure sterilisation)
  - Reduction
    1. If the particle size of the animal by-products to be...  
Time, temperature and pressure
    2. The animal by-products with the particle size of no greater...
    3. The processing may be carried out in batch or continuous...
- B. Processing method 2
  - Reduction
    1. If the particle size of the animal by-products to be...  
Time, temperature and pressure
    2. After reduction the animal by-products must be heated in a...
    3. The processing must be carried out in a batch system....
- C. Processing method 3
  - Reduction
    1. If the particle size of the animal by-products to be...

- Time, temperature and pressure
  - 2. After reduction the animal by-products must be heated in a...
  - 3. The processing may be carried out in batch or continuous...
- D. Processing method 4
- Reduction
  - 1. If the particle size of the animal by-products to be...  
Time, temperature and pressure
  - 2. After reduction the animal by-products must be placed in a...
  - 3. The processing may be carried out in batch or continuous...
- E. Processing method 5
- Reduction
  - 1. If the particle size of the animal by-products to be...  
Time, temperature and pressure
  - 2. After reduction the animal by-products must be heated until they...
  - 3. The processing may be carried out in batch or continuous...
- F. Processing method 6 (for Category 3 animal by-products originating from...)
- Reduction
  - 1. The animal by-products must be reduced to a particle size...  
Time, temperature and pressure
  - 2. After reduction, the mixture must be heated to:
  - 3. The processing may be carried out in batch or continuous...
- G. Processing method 7
- 1. Any processing method authorised by the competent authority where the...
  - 2. Details of the critical control points under which each processing...
  - 3. By way of derogation from point 1, the competent authority...
  - 4. The competent authority shall permanently or temporarily suspend the application...
  - 5. The competent authority of a constituent nation shall inform the...

## CHAPTER IV

### ALTERNATIVE PROCESSING METHODS

#### Section 1

##### General provisions

- 1. Materials resulting from the processing of Category 1 and 2...
- 2. The competent authority of a constituent nation shall make the...

#### Section 2

##### Processing standards

- A. Alkaline hydrolysis process
- 1. Starting material
- 2. Processing method

- B. High pressure high temperature hydrolysis process
1. Starting material
  2. Processing method
- C. High pressure hydrolysis biogas process
1. Starting material
  2. Processing method
- D. Biodiesel production process
1. Starting material
  2. Processing method
- E. Brookes' gasification process
1. Starting material
  2. Processing method
- F. Combustion of animal fat in a thermal boiler process
1. Starting material
  2. Processing method
- G. Thermomechanical biofuel production process
1. Starting material
  2. Processing method
- H. Hydrolysis with subsequent disposal
1. Member States concerned
  2. Starting materials
  3. Methodology
- I. Lime treatment for pig and poultry manure
1. Starting materials
  2. Processing method
    - (a) The dry matter content of the manure must be determined...
    - (b) The amount of lime which has to be added must...
    - (c) The particle size of the animal by-products to be processed...
    - (d) The manure must be mixed with quick lime (CaO) which...
    - (e) The mixture must be mixed for a period of at...
    - (f) At monitoring points which must be introduced into the stockpile,...
    - (g) The process must be carried out in a batch mode....
    - (h) A permanent written procedure based on the HACCP principles must...
    - (i) Operators may demonstrate to the competent authority, by way of...
- J. Multi-step catalytic process for the production of renewable fuels
1. Starting materials
    - (a) For this process, the following materials may be used:
    - (b) The use of rendered fats derived from Category 1 material...
  2. Processing method
    - (a) The rendered fat must be submitted to a pre-treatment which...
    - (b) The pre-treated materials must be submitted to a multi-step catalytic...
- K. Ensilage of fish material
1. Starting materials
  2. Processing method

- 2.1. The materials to be treated shall be collected at aquaculture...
  - 2.2. At the processing plant the ensiled material of aquatic animals...
  - 2.3. Before authorisation is given, the operator's permanent written procedure referred...
- L. Multiple-step catalytic hydro-treatment for the production of renewable fuels
1. Starting materials
  2. Processing method

### Section 3

#### Disposal and use of derived products

1. Products derived from the processing of:
2. Materials resulting from processing in accordance with:
3. Any waste other than animal by-products and derived products provided...

## ANNEX V

### TRANSFORMATION OF ANIMAL BY-PRODUCTS AND DERIVED PRODUCTS INTO BIOGAS, COMPOSTING

#### CHAPTER I

#### REQUIREMENTS APPLICABLE TO PLANTS

##### Section 1

###### Biogas plants

1. A biogas plant must be equipped with a pasteurisation/hygienisation unit,...
2. By way of derogation from point 1, a pasteurisation /hygienisation...
3. If the biogas plant is located on or next to...
4. Each biogas plant must have its own laboratory or make...

##### Section 2

###### Composting plants

1. A composting plant must be equipped with a closed composting...
2. By way of derogation from point 1, other types of...
3. If the composting plant is located on or next to...
4. Each composting plant must have its own laboratory or make...

## CHAPTER II

### HYGIENE REQUIREMENTS APPLICABLE TO BIOGAS AND COMPOSTING PLANTS

1. Animal by-products must be transformed as soon as possible after...
2. Containers, receptacles and vehicles used for transporting untreated material must...
3. Preventive measures against birds, rodents, insects or other vermin must...
4. Cleaning procedures must be documented and established for all parts...
5. Hygiene control must include regular inspections of the environment and...
6. Installations and equipment must be kept in a good state...
7. Digestion residues and compost must be handled and stored at...

## CHAPTER III

### TRANSFORMATION PARAMETERS

#### Section 1

##### Standard transformation parameters

1. Category 3 material which is used as raw material in...
2. Category 3 material which is used as raw material in...

#### Section 2

##### Alternative transformation parameters for biogas and composting plant

1. The competent authority may authorise the use of parameters other...
2. By way of derogation from point 1, pending the adoption...
3. Where the materials referred to in point 2(b) or derived...
4. Operators may place on the market digestion residues and compost,...

#### Section 3

##### Standards for digestion residues and compost

1. Representative samples of the digestion residues or compost taken during...
2. Digestion residues or compost other than those referred to in...
3. When animal by-products are transformed into biogas or composted together...

## ANNEX VI

### SPECIAL RULES ON RESEARCH, FEEDING AND COLLECTION AND DISPOSAL

#### CHAPTER I

##### SPECIAL RULES ON SAMPLES FOR RESEARCH AND OTHER PURPOSES

###### Section 1

###### Research and diagnostic samples

1. Operators shall ensure that consignments of research and diagnostic samples...
2. Users that handle research and diagnostic samples shall take all...
3. Any subsequent use of research and diagnostic samples for purposes...
4. Unless they are kept for reference purposes, research and diagnostic...
5. Users that handle research and diagnostic samples shall keep a...
6. By way of derogation from points 1, 4 and 5,...

###### Section 2

###### Trade samples and display items

1. Trade samples and display items may only be transported, used...
2. Unless trade samples are kept for reference purposes, they shall...
3. After the exhibition or after the artistic activity has been...

#### CHAPTER II

##### SPECIAL FEEDING RULES

###### Section 1

###### General requirements

###### Section 2

###### Feeding of certain species in feeding stations

1. The competent authority may authorise the use of Category 1...
2. When a Member State applies to the Commission to be...

###### Section 3

###### Feeding of wild animals outside feeding stations

## Section 4

### Feeding of zoo animals with Category 1 material

## CHAPTER III

### SPECIAL RULES ON COLLECTION AND DISPOSAL

## Section 1

### Special disposal rules for animal by-products

1. If the competent authority authorises the disposal of animal by-products...
2. The burning of animal by-products on the sites referred to...
3. The burial of animal by-products on the sites referred to...
4. In the case of disposal in accordance with Article 19(1)(a),...

## Section 2

### Burning and burial of animal by-products in remote areas

## Section 3

### Burning and burial of bees and apiculture by-products

## CHAPTER IV

### DISPOSAL BY OTHER MEANS

## ANNEX VII

### STANDARD FORMAT FOR APPLICATIONS FOR ALTERNATIVE METHODS

## CHAPTER I

### Language regime

1. Applications for authorisation of an alternative method of use or...
2. Interested parties that submit such applications in a language other...

## CHAPTER II

### Content of applications

1. Applications shall contain all the necessary information to allow the...
2. The application referred to in paragraph 1 shall moreover:

3. Validated direct measurements as referred to in paragraph 2(d) above...
4. The HACCP plan referred to in paragraph 2(b) must be...
5. The applications shall also contain sufficient information on:
6. Applications shall be submitted with documentary evidence, in particular:
7. Applications shall include a contact address for the interested party,...

## ANNEX VIII

### COLLECTION, TRANSPORT AND TRACEABILITY

#### CHAPTER I

#### COLLECTION AND TRANSPORT

##### Section 1

##### Vehicles and containers

1. As from the starting point in the manufacturing chain referred...
2. Vehicles and reusable containers, and all reusable items of equipment...
3. Reusable containers must be dedicated to the carriage of a...
4. Packaging material must be disposed of, by incineration or by...

##### Section 2

##### Temperature conditions

1. The transport of animal by-products destined for the production of...
2. Unprocessed Category 3 material destined for the production of feed...
3. The design of vehicles used for refrigerated transport must ensure...

##### Section 3

Derogation for collection and transport of Category 3 material comprising...

##### Section 4

Derogation for collection and transport of manure

## CHAPTER II

### IDENTIFICATION

1. All necessary measures must be taken to ensure that:
2. During transport and storage, a label attached to the packaging,...
3. Nothing in this Regulation prevents the appropriate authority from establishing...
4. Nothing in this Regulation prevents the appropriate authority from establishing...
5. By way of derogation from points 3 and 4, nothing...
6. However:

## CHAPTER III

### COMMERCIAL DOCUMENTS AND HEALTH CERTIFICATES

1. During transportation, a commercial document in accordance with the model...
2. The commercial document must be produced at least in triplicate...
3. Health certificates must be issued and signed by the competent...
4. A commercial document in accordance with the model made available...
5. Records and related commercial documents or health certificates shall be...
6. Model commercial document
  - Notes
    - (a) Commercial documents shall be produced, according to the layout of...
    - (b) It shall be drawn up in English, and may also...
    - (c) The original of each commercial document shall consist of a...
    - (d) If for reasons of identification of the items of the...
    - (e) When the commercial document, including additional sheets of paper referred...
    - (f) The original of the commercial document must be completed and...
    - (g) The colour of the signature of the responsible person shall...
    - (h) The document reference number and the local reference number shall...
    - (i) The competent authority responsible for the place of destination referred...

Commercial document

## CHAPTER IV

### RECORDS

#### Section 1

##### General provisions

1. The records as referred to in Article 22(1) of Regulation...
2. By way of derogation from point 1 of this Section,...
3. Operators of incineration plants and co-incineration plants shall keep records...

#### Section 2

Additional requirements in case of use for special feeding purposes...

#### Section 3

Requirements in case of certain fur animals

#### Section 4

Requirements for the application of certain organic fertilisers and soil...

#### Section 5

Requirements for animal by-products derived from aquatic animals and feeding...

#### Section 6

Requirements for the burning and burial of animal by-products

#### Section 7

Requirements for photogelatine

## CHAPTER V

### MARKING OF CERTAIN DERIVED PRODUCTS

1. In processing plants for the processing of Category 1 or...
2. The operators of processing plants referred to in point 1...
3. The marking with GTH shall not be required for:

## CHAPTER VI

### TRANSPORT OF DEAD PET ANIMALS

## CHAPTER VII

## TRANSPORT TO A DETOXIFICATION PLANT OF FISH OILS AND FISHMEAL...

## ANNEX IX

## REQUIREMENTS APPLICABLE TO CERTAIN APPROVED AND REGISTERED ESTABLISHMENTS AND PLANTS...

## CHAPTER I

## MANUFACTURING OF PETFOOD

## CHAPTER II

## HANDLING OF ANIMAL BY-PRODUCTS AFTER THEIR COLLECTION

## Section 1

## General requirements

1. Premises and facilities where intermediate operations are carried out shall...
2. The plant shall be equipped with adequate facilities for cleaning...

## Section 2

## Hygiene requirements

1. The sorting of animal by-products shall be carried out in...
2. At all times during storage, animal by-products shall be handled...
3. Animal by-products shall be stored properly, including under appropriate temperature...

## Section 3

## Processing standards for hygienisation/pasteurisation

## CHAPTER III

## REQUIREMENTS FOR STORAGE OF DERIVED PRODUCTS

## Section 1

## General requirements

## Section 2

## Specific requirements for storage of certain milk, milk-based products and...

1. The storage of the products referred to in Part II...
2. Samples of the final products taken during storage or at...

## CHAPTER IV

### REGISTERED OPERATORS

1. Operators of registered plants or establishments or other registered operators...
2. Operators shall keep records in a form which is accessible...
3. Registered operators transporting animal by-products or derived products, other than...

## CHAPTER V

### CONTAINMENT METHODS

#### Section 1

##### General provisions

1. Materials resulting from a containment method may be used or...
2. The competent authority of a constituent nation shall make the...

#### Section 2

##### Methodology

- A. Aerobic maturation and storage of dead-on-farm pigs and certain other...
  1. Application
  2. Starting materials
  3. Methodology
    - 3.1. General principles
    - 3.2. Phases
      - 3.2.1. Filling and storage phase
      - 3.2.2. Maturing phase
      - 3.2.3. Transport and incineration or co-incineration
- B. Hydrolysis with subsequent disposal
  1. Application
  2. Starting materials
  3. Methodology

## ANNEX X

### FEED MATERIALS

#### CHAPTER I

##### GENERAL REQUIREMENTS FOR THE PROCESSING AND PLACING ON THE MARKET...

## CHAPTER II

### SPECIFIC REQUIREMENTS FOR PROCESSED ANIMAL PROTEIN AND OTHER DERIVED PRODUCTS...

#### Section 1

##### Specific requirements for processed animal protein

- A. Raw materials
  - 1. Only animal by-products which are Category 3 material or products...
  - 2. Processed animal protein derived from farmed insects, intended for the...
- B. Processing standards
  - 1. Processed animal protein of mammalian origin must have been submitted...
  - 2. Non-mammalian processed animal protein, with the exception of fishmeal, must...
  - 3. Fishmeal must have been submitted to:
- C. Storage
  - 1. Processed animal protein must be packed and stored in new...
  - 2. Products in conveyors, elevators and bins must be protected from...
  - 3. Equipment for handling processed animal protein must be maintained in...
  - 4. Processed animal protein must be kept dry.

#### Section 2

##### Specific requirements for blood products

- A. Raw material
- B. Processing standards

#### Section 3

##### Specific requirements for rendered fats, fish oil and fat derivatives...

- A. Raw materials
  - 1. Rendered fats
  - 2. Fish oil
- B. Processing standards
- C. Hygiene requirements

## Section 4

Specific requirements for milk, colostrum and certain other products derived...

### Part I

#### General requirements

- A. Raw material
- B. Processing standards
  - 1. Milk must be subjected to one of the following treatments:...
  - 2. Milk-based products and milk-derived products must either be subjected to...
  - 3. Whey to be fed to animals of species susceptible to...
  - 4. In addition to the requirements set out in points 1,...
  - 5. Raw milk must be produced under conditions offering adequate guarantees...
  - 6. Colostrum and colostrum products must:

### Part II

Derogation for the placing on the market of milk processed...

- 1. The requirements laid down in points 2 and 3 of...
- 2. The competent authority shall authorise milk processing establishments approved or...
- 3. Milk, milk-based products and milk-derived products may be supplied and...
- 4. The competent authority may authorise the supply of colostrum which...

### Part III

Special requirements for centrifuge or separator sludge

## Section 5

Specific requirements for gelatine and hydrolysed protein

- A. Raw materials
- B. Processing standards for gelatine
  - 1. Unless the gelatine has been produced in accordance with Section...
  - 2. After having been subjected to the processes referred to in...
  - 3. The use of preservatives, other than sulphur dioxide and hydrogen...
- C. Other requirements for gelatine
- D. Processing standards for hydrolysed protein

## Section 6

Specific requirements for dicalcium phosphate

- A. Raw materials

- B. Processing standards
  - 1. Dicalcium phosphate must be produced by a process that comprises...
  - 2. Where dicalcium phosphate is derived from defatted bones, it shall...

#### Section 7

##### Specific requirements for tricalcium phosphate

- A. Raw materials
- B. Processing standards

#### Section 8

##### Specific requirements for collagen

- A. Raw materials
- B. Processing standards
  - 1. Unless the collagen has been produced in accordance with the...
  - 2. The use of preservatives, other than those permitted under retained...
- C. Other requirements

#### Section 9

##### Specific requirements for egg products

- A. Raw materials
- B. Processing standards

#### Section 10

##### Specific requirements for feeding to farmed animals, other than fur...

### CHAPTER III

#### REQUIREMENTS FOR CERTAIN FISH FEED AND FISHING BAITS

- 1. Animal by-products from fish or aquatic invertebrates and derived products...
- 2. The competent authority may lay down conditions, aimed at preventing...

ANNEX XI  
ORGANIC FERTILISERS AND SOIL IMPROVERS  
CHAPTER I  
REQUIREMENTS FOR UNPROCESSED MANURE,  
PROCESSED MANURE AND DERIVED PRODUCTS FROM...

Section 1

Unprocessed manure

1. Trade in unprocessed manure of species other than poultry or...
2. Trade in unprocessed poultry manure between Member States shall be...
3. Model health attestation to be added to the commercial document:...
4. Unprocessed manure of equidae may be traded between Member States,...
5. In accordance with Article 48(1)(c)(ii) of Regulation (EC) No 1069/2009,...
6. The competent authority may authorise the dispatch of manure transported...

Section 2

Guano from bats, processed manure and derived products from processed...

CHAPTER II  
REQUIREMENTS FOR CERTAIN ORGANIC FERTILISERS AND SOIL IMPROVERS

Section 1

Conditions for the production

1. Organic fertilisers and soil improvers, other than manure, digestive tract...
2. Organic fertilisers and soil improvers which consist of or which...
3. The competent authority shall authorise the component referred to in...
4. However, the requirements referred to in point 2 shall not...
5. Producers of organic fertilisers and soil improvers must ensure that...

Section 2

Storage and transport

### Section 3

#### Requirements for approval of establishments or plants

#### ANNEX XII

#### INTERMEDIATE PRODUCTS

In accordance with Article 34(2) of Regulation (EC) No 1069/2009,...

The import from a third country and transit of intermediate...

#### ANNEX XIII

#### PETFOOD AND CERTAIN OTHER DERIVED PRODUCTS

#### CHAPTER I

#### General requirements

#### CHAPTER II

#### Specific requirements for petfood, including dogchews

1. Raw petfood
2. Raw material for processed petfood and for dogchews
3. Processed petfood
4. Dogchews must be subjected to a treatment that is sufficient...
5. Random samples must be taken from dogchews and from processed...
6. Random samples must be taken from raw petfood during production...
7. End point for processed petfood and dogchews

#### CHAPTER III

#### Specific requirements for flavouring innards for the manufacture of petfood...

1. Operators may only use animal by-products which may be used...
2. Flavouring innards must have been submitted to a treatment method...
3. The end product must be:

#### CHAPTER IV
