- 1 Paddy or rough rice, husked rice and semi-milled or wholly milled rice.
- 2 Other cereals do not include rice.
- 3 Levels are measured on fat, except in the case of foods with a fat content of 10% or less by weight. In these cases the residue is related to the total weight of the boned foodstuff and the MRL is one tenth of the value given in the table, but must be no less than 0.01 mg/kg.
- 4 These levels are for fresh raw cow's milk and fresh whole cream cow's milk expressed on the whole milk.
- 5 For preserved, concentrated or sweetened cow's milk; for raw milk and whole cream milk of another animal origin; and for butter, cheese or curd whether made from cow's milk or other milk or a combination, the following levels apply:
 - if the fat content is less than 2% by weight, the MRL is taken as half that set for raw milk and whole cream milk;
 - if the fat content is 2% or more by weight, the MRL is expressed in mg/kg of fat and is set at 25 times that set for raw milk and whole cream milk.
- 6 Birds' eggs in shell (other than eggs for hatching) and whole egg products and egg yolk products (whether fresh, dried or otherwise prepared). For eggs and egg products with a fat content higher than 10% the maximum level is expressed in mg/kg fat. In this case the maximum level is 10 times higher than the maximum level for fresh eggs.
- 7 Poultrymeat only.
- 8 With the exception of meat and other ovine, bovine and caprine products.
- 9 Footnotes 3, 5 and 6 do not apply in cases where the lower limit of analytical determination is indicated.

EXPLANATORY NOTE

(This note is not part of the Regulations.)

These Regulations, are made under section 2(2) of the European Communities Act 1972 and amend the Pesticides (Maximum Residue Levels in Crops, Food and Feeding Stuff) (EEC Limits) Regulations (Northern Ireland) 1995 (“the principal Regulations”) (S.R. 1995/33, amended by S.R. 1995/461).

The Regulations specify maximum levels of pesticides residues which may be left in crops, food and feeding stuffs in implementation of Council Directives 95/38/EC (O.J. No. L197, 22.8.95, p. 14), 95/39/EC (O.J. No. L197, 22.8.95, p. 29) and 95/61/EC (O.J. No. L292, 7.12.95, p. 27): Directives 95/38/EC and 95/39/EC set Community maximum residue levels for the pesticides concerned for the first time and Directive 95/61/EC sets Community maximum residue levels in substitution for levels (known as open positions) which were set for the pesticides concerned by Council Directive 93/58/EEC (O.J. No. L211, 23.8.93, p. 6) (regulations 3, 5 and 6).

Additionally, the Regulations—

Status: This is the original version (as it was originally made). This item of legislation is currently only available in its original format.

- (a) correct an error in Schedule 2 to the principal Regulations (regulation 4); and
- (b) in implementation of Directive [95/38/EC](#), add spices to the list of groups of products to which Community maximum residue levels apply (regulation 7).

Maximum levels in these Regulations which are followed by * will, when inserted into Schedule 2 to the principal Regulations, connect with the explanation of that symbol given there.
