

SCHEDULE 2

Regulation 18(2) and 27(3)

Descriptions of dangerous fluids

1. A fluid which—
 - (a) is flammable in air;
 - (b) has a boiling point below 5°C, at 1 bar absolute; and
 - (c) is, or is to be, conveyed in the pipeline as a liquid.
2. A fluid which is flammable in air and is, or is to be, conveyed in the pipeline as a gas at above 8 bar absolute.
3. A liquid which has a vapour pressure greater than 1.5 bar absolute when in equilibrium with its vapour at either the actual temperature of the liquid or at 20°C.
4. A toxic or very toxic fluid which—
 - (a) is a gas at 20°C and 1 bar absolute; and
 - (b) is, or is to be, conveyed as a liquid or a gas.
5. A toxic fluid which—
 - (a) at 20°C has a saturated vapour pressure greater than 0.4 bar; and
 - (b) is, or is to be, conveyed in the pipeline as a liquid.
6. Acrylonitrile.
7. A very toxic fluid which—
 - (a) at 20°C has a saturated vapour pressure greater than 0.001 bar; or
 - (b) is, or is to be, conveyed in the pipeline as a liquid at a pressure greater than 4.5 bar absolute.
8. An oxidising fluid which is, or is to be, conveyed as a liquid.
9. A fluid which reacts violently with water.
10. For the purposes of this Schedule—
 - (a) a liquid is oxidising; and
 - (b) a fluid is toxic or very toxic, or reacts violently with water,

if it has been, or is liable to be classified, pursuant to regulation 5 of the Chemicals (Hazard Information and Packaging for Supply) Regulations (Northern Ireland) 1995(1), as the case may be, oxidising, toxic, very toxic or as reacting violently with water.

(1) S.R. 1995 c. 60 to which there are amendments not relevant to these Regulations
