

SCHEDULE 2

Dangerous Occurrences

Part II

Dangerous Occurrences which are Reportable in Relation to Mines

Failure of plant or equipment

28. The breakage or unintentional uncoupling of any rope, chain, coupling, rope tensioning system or other gear used for or in connection with the transport of persons below ground, or breakage of any belt, rope or other gear used for or in connection with a belt conveyor designated by the mine manager as a man-riding conveyor.
