

## SCHEDULE 3

### **Production and placing on the market Conditions for fishery products**

#### Chapter VIII

##### Storage and Transport

4. Vehicles used for the transport of fishery products must be constructed and equipped in such a way that the temperatures laid down in these Regulations can be maintained throughout the period of transport. If ice is used to chill fishery products, adequate drainage must be provided in order to ensure that water from melted ice does not stay in contact with the products. The inside surfaces of the means of transport must be finished in such a way that they do not adversely affect the fishery products. They must be smooth and easy to clean and disinfect.
