EXPLANATORY NOTE

(This note is not part of the Regulations.)

These Regulations make further amendments to the Specified Risk Material Regulations (Northern Ireland) 1997 (S.R. 1997 No. 552, as already amended — “the principal Regulations”). They reflect the provisions of Annex XIA to Regulation (EC) No. 999/2001 of the European Parliament and of the Council laying down rules for the prevention, control and eradication of certain transmissible spongiform encephalopathies (O.J. No. L147, 31.5.2001, p. 1). That Annex imposes transitional measures with regard to the removal of specified risk material and was inserted into Regulation (EC) No. 999/2001 by Article 3 of Commission Regulation (EC) No. 1326/2001 (O.J. No. L177, 30.6.2001, p. 60).

The substantive amendments made by these Regulations to the principal Regulations are as follows—

- (a) in the light of the transitional measures referred to above—
 - (i) regulation 3 of the principal Regulations (which defines “specified sheep and goat material”) is amended to exclude from the scope of the definition material derived from sheep and goats born, continuously reared and slaughtered in certain third countries (*regulation 2(4) and (5)*),
 - (ii) regulation 4 of the principal Regulations (which defines “specified bovine material”) is substantially revised so that, in particular, material derived from bovine animals born, continuously reared and slaughtered in certain third countries is now outside the scope of the definition (*regulation 2(6) to (8)*),
 - (iii) regulation 7 of the principal Regulations (prohibition applying to the vertebral column of ruminant animals) is replaced with a provision prohibiting the use of bovine, ovine and caprine bones in the production of mechanically recovered meat (*regulation 2(10)*) and regulation 8 (registration of premises on which meat is recovered by mechanical means from ruminant animals) is revoked (*regulation 2(11)*), and
 - (iv) a new regulation, 15A, dealing with the treatment of imported carcasses containing vertebral column which is specified bovine material, is inserted into the principal Regulations (*regulation 2(12)*); and
- (b) regulation 26 (power to give directions) is amended to enable the Food Standards Agency or the Department of Agriculture and Rural Development to give directions relating to the disposal of specified risk material (*regulation 2(13) and (14)*).

These Regulations also make consequential amendments to the principal Regulations in the light of certain of the substantive amendments referred to above and the enactment of the Food Standards Act 1999 (1999 c. 28) (*regulation 2(2), (3) and (9)*).
