STATUTORY RULES OF NORTHERN IRELAND

---

**2003 No. 533**

**Packaging, Labelling and Carriage of Radioactive  
Material by Rail Regulations (Northern Ireland) 2003**

**PART II  
GENERAL**

**Determination of radioactive material**

6.—(1) Before a consignor of radioactive material consigns the radioactive material for carriage, he shall determine whether the radioactive material is either –

- (a) LSA-I;
- (b) LSA-II;
- (c) LSA-III, applying the test specified in RID paragraph 2.2.7.3;
- (d) special form radioactive material, using the criteria contained in, and applying the tests and assessments specified in, RID paragraph 2.2.7.4;
- (e) SCO-I; or
- (f) SCO-II,

and, if it is, the consignor shall then determine which type of package shall be used in accordance with the provisions of RID Section 2.2.7 for the carriage of that radioactive material.

(2) If a consignor of radioactive material determines that the radioactive material for carriage –

- (a) is neither LSA-I, LSA-II nor LSA-III;
- (b) is not special form radioactive material; and
- (c) is neither SCO-I nor SCO-II,

then he shall ascertain the activity level of the radioactive material in accordance with the table, and other requirements specified, in RID sub-paragraph 2.2.7.7.2 in order to determine which type of package described in RID sub-paragraph 2.2.7.7.1 shall be used for the carriage of that radioactive material.
