EXPLANATORY NOTE

(This note is not part of the Regulations.)

These Regulations amend the Pig Carcase (Grading) Regulations (Northern Ireland) 1994 (“the 1994 Regulations”). The 1994 Regulations provide for the administration and enforcement of the Community system of grading pig carcasses established by Council Regulation (EEC) No. 3220/84 (O.J. No. L301, 20.11.84 p.1) as amended, the detailed rules for which are set out in Commission Regulation (EEC) No. 2976/85 (O.J. No. L285, 25.10.85, p.39) and Commission Decision 2004/370/EC (O.J. No. L116, 22.4.2004, p.32), as amended.

These Regulations amend the 1994 Regulations so as to take account of Commission Decision 2004/370/EC. This Decision sets out the methods which are authorised for use for grading pig carcasses pursuant to Regulation (EEC) No. 3220/84. It authorises two new methods of grading the composition of pig carcasses by using the apparatus known as “fully automatic ultrasonic carcase grading” (“AUTOFOM”) and the apparatus known as “Hennessy Grading Probe” (“HGP 4”). It withdraws authorisation for use of the apparatus known as “Fat-O-Meater” and it replaces, with minor amendments as to the formulae to be applied to predict lean meat percentages of pig carcasses, Commission Decision 88/234/EEC and various amending Decisions.

A Regulatory Impact Assessment has not been prepared for these Regulations because no additional requirements are being imposed.
