

Status: This is the original version (as it was originally made). This item of legislation is currently only available in its original format.

SCHEDULE 2

TSE MONITORING

PART II

CONTENTS OF A RMOP

Correlation of sample to carcass and all other parts of the body

3. Where brain stem sampling is required the RMOP must describe the system linking the brain stem sample of each bovine animal to the carcass of that animal and all parts of the body of that animal (including the blood and the hide).
