Regulation 2(2) substitutes regulation 4 to—

provide that a person who has developed one of twenty prescribed diseases referred to in paragraph (1) of that regulation benefits from the presumption that that disease was caused by his employed earner's employment, provided that he was employed within the relevant prescribed occupation for that disease within one month of the date on which he developed that prescribed disease;

provide for a person who has developed one of the twenty six diseases referred to in paragraph (2) of that regulation to benefit from the same presumption regardless of when he was last employed within the relevant prescribed occupation for that prescribed disease; and prescribe (in paragraphs (3) to (7) of that regulation) additional disease specific rules regarding presumption in respect of eight other specified prescribed diseases.

**Status:** This is the original version (as it was originally made). This item of legislation is currently only available in its original format.
