SCHEDULE 2

Regulations 2(1) and 4(1)

CLASSIFICATION: SOURCE MATERIAL, OTHER REQUIREMENTS AND TOLERANCES

1. Following completion of examination of the crop in accordance with paragraph 1(c) of Schedule 1, an authorised officer may classify the potatoes as being pre-basic seed potatoes or basic seed potatoes of a class specified in column 1 of Table I (pre-basic seed potatoes) or Table II (basic seed potatoes) to this Schedule where he is satisfied–

- (a) that the seed potatoes are derived from source material of the kind specified in the entry in column 2 corresponding to that class;
- (b) that the other requirements specified in the entry in column 3 corresponding to that class have been met; and
- (c) on a sample that any of the tolerances specified in the entry in column 4 corresponding to that class have not been exceeded.

2. Any tolerance in column 4 of Table I or Table II expressed as a percentage is a reference to the proportion expressed as a percentage which the number of growing plants affected by the disease or varietal impurity bears to the total number of plants in the sample.
