

SCHEDULE 3

Cleansing and disinfection of premises other than regulated places and of any thing (including any vehicle) on those premises

PART 2

Specific procedures for the cleansing and disinfecting of infected premises

4. Following killing—
 - (a) carcases must be sprayed with disinfectant;
 - (b) transport from the premises for disposal of carcases and of any tissue and blood spilled during killing or post-mortem examination must be in closed, leak-proof containers and in accordance with a veterinary inspector's instructions;
 - (c) the following parts of the premises must be sprayed with disinfectant as soon as the killed poultry and other captive birds have been removed—
 - (i) parts where the poultry or other captive birds were housed;
 - (ii) parts contaminated during the killing of the poultry or other captive birds;
 - (iii) parts contaminated during any post-mortem examination.
 - (d) any tissue or blood spilled during the killing or any post-mortem must be collected and disposed of with the killed poultry or other captive birds;
 - (e) disinfectant must remain on the surface for at least 24 hours.

Changes to legislation:

There are currently no known outstanding effects for the The Avian Influenza and Influenza of Avian Origin in Mammals (Scotland) Order 2006, Paragraph 4.
