

#### SCHEDULE 4

Exploitation and bottling requirements for natural mineral water and spring water

- 7.—(1) After bottling, the total colony count at source may not exceed—
- (a) 100 per ml at 20 to 22°C in 72 hours on agar agar or an agar gelatine mixture; and
  - (b) 20 per ml at 37°C in 24 hours on agar agar.
- (2) The total colony count shall be measured within the period of 12 hours following bottling, the water being maintained at 4°C +/- 1°C during that period.
