

## SCHEDULE 2

### MONITORING

#### **PART 1**

#### INTESTINAL ENTEROCOCCI AND ESCHERICHIA COLI

##### **Monitoring**

3.—(1) SEPA must—

- (a) take and analyse at least 4 samples from every bathing water for every bathing season except where subparagraph (2) or (3) applies;
- (b) take the first such sample for every bathing season shortly before the start of that season; and
- (c) take samples from every bathing water throughout the bathing season at regular intervals and, except where the bathing water is situated in a region subject to special geographical constraints, such intervals must not exceed one month.

(2) Where the bathing season for a particular bathing water does not exceed 8 weeks, SEPA needs to take and analyse only 3 samples.

(3) Where a bathing water is situated in a region subject to special geographical constraints, SEPA needs to take and analyse only 3 samples.

**Changes to legislation:**

There are currently no known outstanding effects for the The Bathing Waters (Scotland) Regulations 2008, Paragraph 3.
