**2009 No. 392**

**The Home Energy Assistance Scheme  
(Scotland) Amendment Regulations 2009**

**Amendments to the Home Energy Assistance Scheme (Scotland) Regulations 2009**

3. In regulation 2 (interpretation) for the definition of “energy inefficient dwelling” substitute—
- ““energy inefficient dwelling” means—
- (a) a dwelling, other than a mobile home permanently fixed to a site, which does not attain a Standard Assessment Procedure rating of 55 or above; or
  - (b) a mobile home permanently fixed to a site where—
    - (i) the U-value of the walls of the mobile home exceeds  $0.5 \text{ W/m}^2\text{K}$ ;
    - (ii) the U-value of the floor of the mobile home exceeds  $0.5 \text{ W/m}^2\text{K}$ ;
    - (iii) the U-value of the roof of the mobile home exceeds  $0.3 \text{ W/m}^2\text{K}$ ;
    - (iv) the mobile home does not have a central heating system; or
    - (v) the mobile home has a central heating system comprising a non-condensing boiler fuelled by liquid petroleum gas,

in paragraph (b) of this definition “the U-value” means the measure in  $\text{W/m}^2\text{K}$  of heat transmission through the walls, floor or roof;”.
