

EXECUTIVE NOTE

THE FOOD FOR PARTICULAR NUTRITIONAL USES (ADDITION OF SUBSTANCES FOR SPECIFIC NUTRITIONAL PURPOSES) (SCOTLAND) REGULATIONS 2009 SSI 2009/427

1. The above instrument was made by the Scottish Ministers in exercise of the powers conferred by sections 16(1)(a) and (f), 17(2), 26(1)(a) and (3) and 48(1) of the Food Safety Act 1990 and all other powers enabling them to do so. This instrument is subject to the negative resolution procedure.

Policy Objectives

2. The purpose of this instrument is to provide execution and enforcement provisions in Scotland for Commission Regulation (EC) No. 953/2009 (“the Commission Regulation”) on the substances that may be added for specific nutritional purposes in foods for particular nutritional uses. The main purpose of the Regulations is to align domestic law with EC law to consolidate and amend the list of permitted substances for use in foods for particular nutritional uses (‘Parnuts foods’).
3. The Commission Regulation consolidates and amends current EC legislation providing for the addition of certain substances to Parnuts foods. It repeals Directive 2001/15/EC and Directive 2004/6/EC with effect from 31 December 2009.
4. The Food for Particular Nutritional Uses (Addition of Substances for Specific Nutritional Purposes (Scotland) Regulations 2009 (“the Regulations”) revoke:-
 - the Food for Particular Nutritional Uses (Addition of Substances for Specific Nutritional Purposes) (Scotland) Regulations 2002 (SSI 2002/397); and
 - the Food for Particular Nutritional Uses (Addition of Substances for Specific Nutritional Purposes (Scotland) Amendment Regulations 2004 (S.S.I 2004/90) and 2006 (S.S.I. 2006/556).

Policy Background

5. EC legislation requires that foods for particular nutritional uses are safe and that they meet the nutritional requirements of the persons for whom they are intended. A Parnuts food is a food which, owing to its special composition or process of manufacture, is clearly distinguishable from food intended for normal consumption, and is sold in such a way as to indicate its suitability for its claimed nutritional use. Examples of Parnuts foods include - infant formulae, follow-on formulae and medical foods.

6. To facilitate consumer choice, the widest possible choice of substances such as vitamins, minerals and amino acids should be available for use in foods for particular nutritional uses. To ensure consumer protection, it is also important that the safety of these substances is scientifically proven before they are used in the manufacture of foods for particular nutritional use.
7. In order to fulfil these requirements, a European Commission Directive was agreed in 2001 (Directive 2001/15/EC) which listed the types of chemical substances that may be used in the manufacture of foods for particular nutritional uses. Any chemical substance that is listed in the Directive must have received a favourable scientific evaluation either by the European Food Safety Authority (EFSA), or its forerunner, the Scientific Committee on Food (SCF).
8. If a manufacturer wishes a new substance to be added to the list of authorised substances in Directive 2001/15/EC the new substance must first receive a positive assessment from EFSA. The European Commission Standing Committee on the Food Chain and Animal Health (SCoFCAH) must then agree that the new substance should be added to the relevant list in Directive 2001/15/EC.
9. Commission Directive 2004/6/EC implemented a derogation which permitted the use of new substances in parnuts foods until 31st December 2006. Each substance listed in 2004/6/EC would have had to be approved by EFSA and then included in the Annex to 2001/15/EC before 31st December 2006 in order to permit its continued use in parnuts foods within the EC after that date.
10. The length of the derogation was extended by Directive 2007/26/EC as EFSA had not completed this list by that time. EFSA has now given favourable opinions on some of these substances and they are included in the Annex to the Commission Regulation.
11. Earlier this year the European Commission published the Commission Regulation to consolidate and amend Directive 2001/15/EC. This increases the range of sources of vitamins and minerals and other substances that may be added to foods for particular nutritional uses and represents simplification of current legislation as the provisions will be consolidated into a single regulation making it easier to read.

Consultation

12. Article 9 of EC Regulation 178/2002, laying down the general principles and requirements of food law, requires open and transparent public consultation on the revision of food law, save in measures made in circumstances of urgency. The Agency previously consulted all interested parties throughout the duration of EU negotiations on the Commission Regulation, the only responses received were 'no comment'. On this basis, we considered that a shortened consultation was appropriate and this allows us to update domestic legislation

according to the timetable set by the Commission which is of benefit to all stakeholders.

13. The Food Standards Agency consulted 188 interested parties (industry, consumer groups and enforcement authorities) in Scotland on the proposed Regulations. The consultation documents were also made available on the Food Standards Agency website. Within Government, the Food Standards Agency consulted the Scottish Government Health Directorate. Only one response ('no comment') was received.
14. A list of the interested parties consulted is attached.

Financial Implications

15. The primary business sector that will be affected by the regulatory proposals are manufacturers of foods for particular nutritional uses. The consultation generated only one response, a 'no comment'.
16. We do not expect the coming-into-force date to pose a problem to manufacturers of parnuts foods as the date coincides with the expiration of the derogation, outlined in paragraphs 9 and 10. Therefore it is assumed that the measures proposed impose no new financial burdens.
17. The Regulations would not impose any significant new burden on Government or enforcement officers. Rural areas and members of the ethnic communities, or of any particular racial group are unaffected by these proposals. Charities and voluntary organisations are unaffected by these proposals.
18. A Regulatory Impact Assessment has not been prepared to accompany these Regulations as no costs have been identified.

Contact

19. Tracey Thomas at the Food Standards Agency Scotland (Tel: 01224 285111 or e-mail: Tracey.Thomas@foodstandards.gsi.gov.uk) can answer any queries regarding the instrument.
