(5) A tests and trials authorisation shall last for a period of one year or such shorter period as the Scottish Ministers may specify.

(6) The Scottish Ministers shall not authorise marketing of an amount of seed in excess of that permitted by Article 7 (quantities) of the 2004 Commission Decision.

(3) The seed must be harvested from a crop that—

- (a) has been produced in the region of origin for the variety or additional region; and
- (b) satisfies the conditions laid down in paragraph 2 of Schedule 4.

(4) The Scottish Ministers may ascertain, so far as practicable, whether the requirements for the crop set out in paragraph 2 of Schedule 4 are met by the use of methods which may include an official post control and the consideration of any other relevant information, without requiring an official field inspection of the crop.

(5) The seed must satisfy the conditions laid down in paragraph 8 of Schedule 4.

(6) A person proposing to produce seed of a Conservation Variety must supply the Scottish Ministers, in such manner and form as the Scottish Ministers may require, with the following details in writing—

- (a) in respect of which an official certificate certifying that the seed is of the relevant category of seed has been issued in accordance with Part I of Schedule 2, although it attains a lower percentage of germination than that specified in Part II of Schedule 4 in relation to Basic Seed by virtue of the exception in paragraph 2(1)(c) of Schedule 2; or
- (b) which has been certified as satisfying the conditions for the relevant category of seed by a European Authority other than the Scottish Ministers although the seed attains a lower germination than that specified in Annex I(B) (seed conditions) of the Beet Seed Directive in relation to Basic Seed, by virtue of Article 5(a) (marketing of lower germination seed) of the Beet Seed Directive; or
- (c) which the person marketing the seed knows does not satisfy the minimum standards of germination specified for Basic Seed—

- (a) the official examination in respect of the germination of any seed lot of Pre-Basic Seed, Basic Seed or Certified Seed of a plant variety of a species accepted on to a UK National List or the Common Catalogue is being undertaken and has not been completed, but a provisional germination report has shown that the seed attains the appropriate minimum standard of germination specified in Part II of Schedule 4, the seed in all other respects satisfies the appropriate requirements of Schedule 4 and the provisional analytical report and the provisional germination report on the seed have been presented by the producer to the Scottish Ministers; or
- (b) any seed lot has been certified by a European Authority other than the Scottish Ministers by virtue of Article 5(b) (early movement of seed) of the Beet Seed Directive, and the provisional germination report on the seed has been presented by the producer to the Scottish Ministers,

the seed lot or any part of the seed lot may, notwithstanding regulation 6 but subject to paragraphs (2) to (5), regulation 19 and the other provisions of these Regulations, be marketed to the first buyer by way of trade.

- (2) In the event of any marketing under paragraph (1), the seller of the seed shall—

Regulations 2(1), 6(2)(c),

and (5), 11(1), 12(1), (2) and (3),
15(4), 16(3) and 19(14)

REQUIREMENTS FOR PRE-BASIC SEED, BASIC SEED, CERTIFIED SEED AND SEED OF A CONSERVATION VARIETY

PART I

CONDITIONS RELATING TO CROPS FROM WHICH SEED IS OBTAINED

Methods of ascertaining whether crop requirements are met

1. The Scottish Ministers may ascertain, so far as practicable, whether the requirements for the crop set out in this Part of the Schedule are met by the use of methods which shall include official field inspection of the crop and which may include examination of a control plot sown with a sample from the seed lot and the consideration of any other relevant information.

Varietal identity and varietal purity

2.—(1) The characteristics used for the determination of varietal identity and varietal purity shall be those to which regard was had when the relevant variety was accepted on to the relevant UK National List, an equivalent list in another EEA state or the Common Catalogue.

(2) The crop shall possess sufficient varietal identity and varietal purity.

Crop inspection

3.—(1) An official examination of the crop shall be made by means of an official field inspection.

(2) The official field inspection shall only be carried out when the cultural condition of the field and the stage of development and condition, including health, of the crop—

- (a) are such as to permit suitable checks of varietal identity, varietal purity and species purity; and
- (b) meets the requirements of the Scottish Ministers.

(3) In the case of certified seed there shall be at least one official field inspection and in the case of Pre-Basic Seed and Basic Seed at least two official field inspections, one of seedlings and one of the seed-producing plants.

Previous cropping

4.—(1) The previous cropping of the field shall not have been incompatible with the production of seed of the species and variety of the crop, and the field shall be sufficiently free from plants which are volunteers (plants of a species and variety that have grown from seed that was not deliberately sown as part of the crop) from previous cropping.

(2) The crop may be grown only on land which complies with the Scottish Ministers' requirements in respect of previous cropping.

Isolation distances – minimum distances

5.—(1) There shall be a physical barrier or at least two metres of fallow between the seed crop and any crop likely to cause contamination in the seed.

(2) The minimum distances from neighbouring pollen sources shall be:

<i>Crop</i>	<i>Minimum distance</i>
1. For the production of Pre-Basic and Basic Seed: from any pollen sources of the genus Beta	1,000 m
2. For the production of Certified Seed:	
(a) of sugar beet:	
– from any pollen sources of the genus Beta not included below	1,000 m
– the intended pollinator or one of the intended pollinators being diploid, from tetraploid sugar beet pollen sources	600 m
– the intended pollinator being exclusively tetraploid, from diploid sugar beet pollen sources	600 m
– from sugar beet pollen sources, the ploidy of which is unknown	600 m
– the intended pollinator or one of the intended pollinators being diploid, from diploid sugar beet pollen sources	300 m
– the intended pollinator being exclusively tetraploid, from tetraploid sugar beet pollen sources	300 m
– between two sugar beet seed production fields in which male sterility is not used	300 m
(b) of fodder beet:	
– from any pollen sources of the genus Beta not included below	1,000 m
– the intended pollinator or one of the pollinators being diploid, from tetraploid fodder beet pollen sources	600 m
– the intended pollinator being exclusively tetraploid, from diploid fodder beet pollen sources	600 m
– from fodder beet pollen sources, the ploidy of which is unknown	600 m
– the intended pollinator or one of the pollinators being diploid, from diploid fodder beet pollen sources	300 m
– the intended pollinator being exclusively tetraploid, from tetraploid fodder beet pollen sources	300 m
– between two fodder beet seed production fields in which male sterility is not used	300 m

The above distances can be disregarded if there is sufficient protection from any undesirable foreign pollinator. No isolation is necessary between seed crops using the same pollinator.

The ploidy of both seed-bearing and pollen-shedding components of seed-producing crops is to be established by reference to the Common Catalogue or UK National List.

If this information is not included for any variety, the ploidy is to be regarded as unknown, and a minimum isolation distance of 600 metres is required.

(3) With approval of the Scottish Ministers these distances may be modified if there is adequate protection against undesirable pollen.

The Beet Seeds (Amendment) (Scotland) Regulations 2000	S.S.I. 2000/246	The whole Regulations

EXPLANATORY NOTE

(This note is not part of the Regulations)

These Regulations revoke and replace the Beet Seed (Scotland) Regulations 2010 (S.S.I. 2010/67) in order to correct a number of drafting errors. These Regulations, which extend to Scotland only, consolidate, with amendments, the provisions of the Beet Seeds Regulations 1993 (S.I. 1993/2006) as relevantly amended by the Beet Seeds (Amendment) Regulations 1999 (S.I. 1999/1861) and the Beet Seeds (Amendment) (Scotland) Regulations 2000 (S.S.I. 2000/246).

The Regulations implement the provisions of Council Directive 2002/54/EEC on the marketing of beet seed as amended. The Regulations also implement the provisions of Commission Directive 2008/62/EC providing for certain derogations for acceptance of agricultural landraces and varieties which are naturally adapted to the local and regional conditions and threatened by genetic erosion and for marketing of seed and seed potatoes of those landraces and varieties.

The Regulations apply to the certification and marketing of beet seed of the species specified in Schedule 1 to these Regulations (regulation 4 and Schedule 1). The Regulations include provisions which prohibit the marketing of beet seed in Scotland unless it is seed of a listed variety which has been officially certified or Breeder's Seed (regulation 6(1)). The prohibition does not apply in the case of seed—

- (a) which has not yet been fully certified (seed as grown) if it is marketed for processing (regulation 6(2));
- (b) the marketing of which is authorised by general licence under regulation 7; or
- (c) where authorisation has been granted for scientific purposes or selection work or for the purposes of tests and trials (regulations 8 and 9).

The Regulations make provision for the marketing of seed of a Conservation Variety (regulation 10). Seed of a Conservation Variety may only be marketed where the following are complied with-

- (a) it is included in the UK National List of plant varieties of agricultural plant species, as a Conservation Variety;
- (b) it descends from seed produced according to well defined practices for maintenance of the variety;
- (c) the seed has been harvested from a crop that has been produced in the region of origin for the variety or additional region and meets normal requirements for crops in respect of minimum varietal identity and purity;
- (d) the seed must satisfy certain requirements as are laid down in Schedule 4 (regulation 10(5));
- (e) seed of a Conservation Variety must be marketed in its region of origin and producers of seed of a Conservation Variety must supply the Scottish Ministers with details in writing as to the size in hectares and the location of the area to be used to produce the seed;
- (f) Conservation Varieties are subject to quantitative restrictions and accordingly these Regulations permit Scottish Ministers to specify the maximum amount of seed of a Conservation Variety which may be marketed in any growing season. Scottish Ministers may authorise in writing the marketing of seed of a Conservation Variety not exceeding the amount specified in the authorisation; and
- (g) any person marketing seed of a Conservation Variety must supply the Scottish Ministers, on request, with details in writing of the amount and variety of the seed placed on the market during each growing season.

The Regulations include provisions about the standards to be met by beet seed before it will be officially certified by the Scottish Ministers (regulation 15, Schedule 1 and Schedule 2). There are provisions allowing the marketing of seed which does not attain the relevant germination standards (regulation 11) and for marketing seed before it is shown to meet the relevant germination standards (regulation 12).

The Regulations make provision for breeder's confirmations for seed which is not yet accepted onto a UK National List or the Common Catalogue but which otherwise meets the requirements for Pre-Basic Seed or Basic Seed (regulation 16 and Schedules 1, 2 and 4) and for upgrading a breeder's confirmation to an official certificate (regulation 15(3)).

The Regulations lay down requirements relating to seed sampling (regulation 17 and Schedule 5) and the packaging and sealing of packages of seed (regulations 14 and 18) and the labelling of packages of such seed (regulations 14 and 19 and Schedule 6).

The Regulations introduce the power to require an additional sample of seed for the purposes of European tests and trials (regulation 20).

The Regulations provide that particulars given to a purchaser by a seller of seed to which the Regulations apply will constitute a statutory warranty so far as they relate to certain information about the seed being sold (regulation 21). The Regulations introduce provisions about service of notices (regulation 22) and permit electronic communications to be used in certain circumstances (regulation 23).

The Regulations amend the Seeds (Fees) (Scotland) Regulations 2007 (S.S.I. 2007/536) to allow fees to be charged for procedures carried out in relation to the Regulations (regulation 24).

The Regulations revoke the Beet Seeds Regulations 1993 as amended. General licences made under the 1993 Regulations will be replaced by general licences made under these Regulations (regulation 25). The Regulations also revoke the Beet Seed (Scotland) Regulations 2010 (S.S.I. 2010/67).

Contravention of these Regulations is a criminal offence (section 16(7) of the Plant Varieties and Seeds Act 1964).

A copy of the 'Instructions for Seed Samplers Licensed in Scotland' guidance document in respect of sampling and a copy of the Scottish Ministers' requirements in respect of previous cropping, crop conditions for field examinations and moisture testing can be obtained from the Chief Officer at the Official Seed Testing Station, SASA, Roddinglaw Road, Edinburgh, EH12 9FJ.
