60.—(1) In respect of an application for hazardous substances consent or an application under section 15(1) of the principal Act made before the commencement date but in respect of which no notice of the decision of the planning authority is given to the applicant before the commencement date the provisions of—

- (a) Part 3 of the 1993 Regulations (other than regulations 12(3) and (4) (determination of applications for hazardous substances consent), 13 (notice of reference of applications to the Scottish Ministers) and 14 (appeals)) continue to apply as those provisions had effect immediately before the commencement date; and
- (b) these Regulations (other than regulations 5 (notice to owner by applicants), 6 (applications for hazardous substances consent), 7 (applications for removal of conditions), 8 (applications for continuation of hazardous substances consent where there has been a change in the person in control of part of the land), 9 (neighbour notification by planning authorities), 10 (publication of receipt of applications by planning authorities), 11 (validation date), 12 (acknowledgement of applications) and 17(1) to (3) (time period for determination)) apply as they apply to an application made under regulation 6, 7 or 8 on or after the commencement date.

(a) 2000 c.7. Section 15 was amended by paragraph 158 of Schedule 17 to the Communications Act 2003 (c.21).

(2) Where the proposal in respect of which such an application is made is a project, or part of a project, that is subject to a national or transboundary environmental impact assessment or to consultations between Member States in accordance with Article 14(3) of the Directive and the notice published in accordance with regulation 7 of the 1993 Regulations did not state that fact, the planning authority must publish a notice in a newspaper circulating in the locality in which the land to which the application relates is situated.

(3) The notice to be published under paragraph (2) is to be in the same terms as the notice set out in Schedule 4.

Interpretation of existing consents

61.—(1) In this regulation “existing consent” means—

- (a) a consent, in the case of a hazardous substances consent granted on an application under the 1993 Regulations;
- (b) a claim, in the case of a consent deemed to be granted under section 9 or 10A of the principal Act^(a) (deemed hazardous substances consent: established presence);
- (c) a direction, in the case of a consent deemed to be granted, or having effect as if deemed to be granted, by virtue of section 10 of the principal Act (deemed hazardous substances consent: government authorisation),

granted or made before the commencement date under which the presence of a category of substance listed in column 1 of Part B of Schedule 1 to the 1993 Regulations or the presence of a hazardous substance named in column 1 of Part A of Schedule 1 to the 1993 Regulations is expressly authorised.

(2) This regulation applies to an existing consent where the category or substance referred to in paragraph (1)—

- (a) is not contained in Schedule 1 to these Regulations; or
- (b) is differently named or defined under Schedule 1 to these Regulations.

(3) Where this regulation applies any reference in an existing consent to a category or substance referred to in paragraph (1) is to be interpreted as if these Regulations had not come into force.

(4) In paragraph (1)(a) to (c) a reference to a consent includes any continuation of that consent which is granted or deemed to be granted under section 16 of the principal Act.

Saving provision for deemed consent conditions

62.—(1) This regulation applies to any consent that was deemed to be granted under section 10A or 30D of the principal Act^(b) before the commencement date.

(2) In relation to any consent to which this regulation applies—

- (a) the conditions in Schedule 3 to the 1993 Regulations continue to apply (unless any condition was removed following an application under section 11 of the principal Act); and
- (b) those conditions continue to be interpreted in accordance with regulation 17 of the 1993 Regulations.

Notification of other establishments

63.—(1) This regulation applies where hazardous substances consent would be required but for the exemption in paragraph 12 of Schedule 2 (presence of established substances).

(a) Section 9 provides that hazardous substances consent deemed to be granted by a planning authority under section 38 of the Housing and Planning Act 1986 shall continue to have effect notwithstanding the repeal of that section and shall be deemed to be granted by the authority under said section 9, and the relevant claim is the claim submitted under said section 38. Section 10A was inserted by S.S.I. 2000/179.

(b) Section 30D was added by S.S.I. 2006/269.

(2) Where this regulation applies the person in control of the land to which the exemption relates must give the planning authority notice in writing containing—

- (a) details of the person in control of the land;
- (b) details of the location of the land;
- (c) the maximum amount of any hazardous substances which is subject to the exemption which was held on, over or under the land in the period of 12 months ending on 31st May 2015; and
- (d) an explanation of why paragraph 12 of Schedule 2 applies.

(3) The planning authority must, as soon as practicable after receiving the notice given under paragraph (2), send a copy to the Scottish Environment Protection Agency and the safety regulator.

Appeals made after the commencement date

64.—(1) Subject to paragraph (2), these Regulations apply to an appeal under section 19 of the principal Act where notice of the appeal is given on or after the commencement date.

(2) In the case of an appeal under section 19 of the principal Act where the relevant date is before the commencement date, the notice of appeal must be served on the Scottish Ministers within a period of 6 months from the relevant date.

(3) In this regulation “relevant date” means in the case of an appeal under—

- (a) section 19(1) of the principal Act, the date of the notice of the decision giving rise to the appeal; and
- (b) section 19(2) of the principal Act, the date on which the applicant first becomes entitled to appeal under that subsection.

Appeals made before the commencement date

65.—(1) This regulation applies in respect of—

- (a) an appeal under section 19 of the principal Act; and
- (b) an appeal against a hazardous substances contravention notice,

where notice of the appeal is given before the commencement date.

(2) The 1993 Regulations continue to apply to an appeal to which this regulation applies as those Regulations had effect immediately before the commencement date.

(3) Regulation 38 (notice of decision on appeal) applies in respect of an appeal to which this regulation applies.

Applications referred to the Scottish Ministers before the commencement date

66. Part 5, other than regulation 38 (notice of decision on appeal), does not apply in respect of the procedure for dealing with an application for hazardous substances consent or an application under section 15(1) of the principal Act referred to the Scottish Ministers by virtue of a direction under section 18(1) of the principal Act given before the commencement date.

Amendments

67. Schedule 8 has effect.

Revocations

68. Subject to regulations 60 (applications made before the commencement date) and 65 (appeals made before the commencement date), the instruments listed in column 1 of the table in Schedule 9 are revoked to the extent described in column 3 of that table.

NOTES TO PARTS 1 AND 2

1. Substances and mixtures are classified in accordance with the CLP Regulation.
2. Mixtures are to be treated in the same way as pure substances provided they remain within concentration limits set according to their properties under the CLP Regulation, or its latest adaptation to technical progress, unless a percentage composition or other description is specifically given.
3. Expressions appearing in this Schedule and the Directive have the same meaning for the purposes of this Schedule as they have for the purposes of the Directive.
- 4.—(1) The controlled quantities set out above relate to each establishment.

(2) The quantities to be considered for the application of these Regulations are the maximum quantities which are present or are likely to be present at any one time.

5. The following rule governing the addition of hazardous substances, or categories of hazardous substances, applies where appropriate.

In the case of an establishment where no individual hazardous substance is present in a quantity above or equal to the relevant controlled quantity, the following rule must be applied to determine whether the establishment is covered by the relevant requirements of these Regulations.

These Regulations apply to establishments if the sum $q_1/QL_1 + q_2/QL_2 + q_3/QL_3 + q_4/QL_4 + q_5/QL_5 + \dots$ is greater than or equal to 1,

where q_x = the quantity of hazardous substance x (or category of hazardous substances x) falling within Part 1 or Part 2 of this Schedule; and

QL_x = the relevant controlled quantity for hazardous substance x (or category of hazardous substances x) from column 2 of Part 1 or from column 2 of Part 2 of this Schedule (except for those substances for which column 2 contains a quantity Q^* , in which case, for Hydrogen, Q is equal to 5, and for Natural Gas (including liquefied natural gas) and Liquefied Petroleum Gas, Q is equal to 50).

This rule must be used to assess the health hazards, physical hazards and environmental hazards. It must therefore be applied 3 times—

- (a) for the addition of hazardous substances listed in Part 2 that fall within acute toxicity category 1, 2 or 3 (inhalation route) or STOT SE category 1, together with hazardous substances falling within section H, entries H1 to H3 of Part 1;
- (b) for the addition of hazardous substances listed in Part 2 that are explosives, flammable gases, flammable aerosols, oxidising gases, flammable liquids, self-reactive substances and mixtures, organic peroxides, pyrophoric liquids and solids, oxidising liquids and solids, together with hazardous substances falling within section P, entries P1 to P8 of Part 1;

- (c) for the addition of hazardous substances listed in Part 2 that fall within hazardous to the aquatic environment acute category 1, chronic category 1 or chronic category 2, together with hazardous substances falling within section E, entries E1 and E2 of Part 1.

The relevant provisions of these Regulations apply where any of the sums obtained by (a), (b) or (c) is greater than or equal to 1.

6. In the case of hazardous substances which are not covered by the CLP Regulation, including waste, but which nevertheless are present, or are likely to be present, in an establishment and which possess or are likely to possess, under the conditions found at the establishment, equivalent properties in terms of major accident potential, these must be provisionally assigned to the most analogous category or named hazardous substance falling within the scope of these Regulations.

7. In the case of hazardous substances with properties giving rise to more than one classification, for the purposes of these Regulations the lowest controlled quantities apply. However, for the application of the rule in Note 5, the lowest controlled quantity for each group of categories in Note 5(a), (b) and (c) corresponding to the classification concerned must be used.

8. Hazardous substances that fall within Acute Toxic Category 3 via the oral route (H 301) fall under entry H2 ACUTE TOXIC in those cases where neither acute inhalation toxicity classification nor acute dermal toxicity classification can be derived, for example due to lack of conclusive inhalation and dermal toxicity data.

9. The hazard class Explosives includes explosive articles (see Section 2.1 of Annex I to the CLP Regulation). If the quantity of the explosive substance or mixture contained in the article is known, that quantity must be considered for the purposes of these Regulations. If the quantity of the explosive substance or mixture contained in the article is not known, then, for the purposes of these Regulations, the whole article must be treated as explosive.

10. Testing for explosive properties of substances and mixtures is only necessary if the screening procedure according to Appendix 6, Part 3 of the UN Recommendations on the Transport of Dangerous Goods, Manual of Tests and Criteria (UN Manual of Tests and Criteria)(a) identifies the substance or mixture as potentially having explosive properties.

11. If Explosives of Division 1.4 are unpacked or repacked, they must be assigned to the entry P1a, unless the hazard is shown to still correspond to Division 1.4, in accordance with the CLP Regulation.

12.—(1). Flammable aerosols are classified in accordance with Council Directive 75/324/EEC on the approximation of the laws of the Member States relating to aerosol dispensers(b) (Aerosol Dispensers Directive). “Extremely flammable” and “Flammable” aerosols of Directive 75/324/EEC correspond to Flammable Aerosols Category 1 or 2 respectively of the CLP Regulation.

(2). In order to use this entry, it must be documented that the aerosol dispenser does not contain Flammable Gas Category 1 or 2 nor Flammable Liquid Category 1.

13. According to paragraph 2.6.4.5 in Annex I to the CLP Regulation, liquids with a flash point of more than 35 °C need not be classified in Category 3 if negative results have been obtained in the sustained combustibility test L.2, Part III, section 32 of the UN Manual of Tests and Criteria. This is, however, not valid under elevated conditions such as high temperature or pressure, and therefore such liquids are included in this entry.

(a) More guidance on waiving of the test can be found in the A.14 method description, see Commission Regulation (EC) No 440/2008 of 30 May 2008 laying down test methods pursuant to Regulation (EC) No 1907/2006 of the European Parliament and of the Council on the Registration Evaluation, Authorisation and Restriction of Chemicals (REACH) (O.J. L 142, 31.5.2008, p.1)

(b) O.J. L 147, 9.6.1975, p.40.

14. Ammonium nitrate (5,000/10,000): fertilisers capable of self-sustaining decomposition

This applies to ammonium nitrate-based compound/composite fertilisers (compound/composite fertilisers contain ammonium nitrate with phosphate and/or potash) which are capable of self-sustaining decomposition according to the UN Trough Test (see UN Manual of Tests and Criteria, Part III, subsection 38.2), and in which the nitrogen content as a result of ammonium nitrate is—

- (a) between 15.75%(a) and 24.5%(b) by weight, and either with not more than 0.4% total combustible/organic materials or which fulfil the requirements of Annex III-2 to Regulation (EC) No 2003/2003 of the European Parliament and of the Council relating to fertilisers(c);
- (b) 15.75% by weight or less and unrestricted combustible materials.

15. Ammonium nitrate (1,250/5,000): fertiliser grade

This applies to straight ammonium nitrate-based fertilisers and to ammonium nitrate-based compound/composite fertilisers which fulfil the requirements of Annex III-2 to said Regulation (EC) No 2003/2003 and in which the nitrogen content as a result of ammonium nitrate is—

- (a) more than 24.5% by weight, except for mixtures of straight ammonium nitrate based fertilisers with dolomite, limestone and/or calcium carbonate with a purity of at least 90%;
- (b) more than 15.75% by weight for mixtures of ammonium nitrate and ammonium sulphate;
- (c) more than 28%(d) by weight for mixtures of straight ammonium nitrate-based fertilisers with dolomite, limestone and/or calcium carbonate with a purity of at least 90%.

16. Ammonium nitrate (350/2,500): technical grade

This applies to ammonium nitrate and mixtures of ammonium nitrate in which the nitrogen content as a result of the ammonium nitrate is—

- (a) between 24.5% and 28% by weight, and which contain not more than 0.4% combustible substances;
- (b) more than 28% by weight, and which contain not more than 0.2% combustible substances.

It also applies to aqueous ammonium nitrate solutions in which the concentration of ammonium nitrate is more than 80% by weight.

17. Ammonium nitrate (10/50): 'off-specs' material and fertilisers not fulfilling the detonation test.

This applies to—

- (a) material rejected during the manufacturing process and to ammonium nitrate and mixtures of ammonium nitrate, straight ammonium nitrate-based fertilisers and ammonium nitrate-based compound/composite fertilisers referred to in Notes 15 and 16, that are being or have been returned from the final user to a manufacturer, temporary storage or reprocessing plant for reworking, recycling or treatment for safe use, because they no longer comply with the specifications of Notes 15 and 16;

(a) 15.75% nitrogen content by weight as a result of ammonium nitrate corresponds to 45% ammonium nitrate.

(b) 24.5% nitrogen content by weight as a result of ammonium nitrate corresponds to 70% ammonium nitrate.

(c) O.J. L 304, 21.11.2003, p.1.

(d) 28% nitrogen content by weight as a result of ammonium nitrate corresponds to 80% ammonium nitrate.

- (b) fertilisers referred to in Notes 14(a) and 15 to this Schedule which do not fulfil the requirements of Annex III-2 to Regulation (EC) No 2003/2003.

18. Potassium nitrate (5,000/10,000)

This applies to those composite potassium-nitrate based fertilisers (in prilled/granular form) which have the same hazardous properties as pure potassium nitrate.

19. Potassium nitrate (1,250/5,000)

This applies to those composite potassium-nitrate based fertilisers (in crystalline form) which have the same hazardous properties as pure potassium nitrate.

20. Upgraded biogas

For the purpose of the implementation of these Regulations, upgraded biogas may be classified under entry 18 of Part 2 of Schedule 1 where it has been processed in accordance with applicable standards for purified and upgraded biogas ensuring a quality equivalent to that of natural gas, including the content of Methane, and which has a maximum of 1% Oxygen.

21. Polychlorodibenzofurans and polychlorodibenzodioxins

The quantities of polychlorodibenzofurans and polychlorodibenzodioxins are calculated using the factors in Table 1—

22. In cases where this hazardous substance falls within category P5a Flammable liquids or P5b Flammable liquids, then for the purposes of these Regulations the lower controlled quantity applies.

PART 3

Substances used in processes

<i>Column 1 Hazardous Substances</i>	<i>Column 2 Controlled quantity</i>
Where it is reasonable to foresee that a substance falling within Part 1 or Part 2 (“HS”) may be generated during loss of control of the processes, including storage activities in any installation within an establishment, any substance which is used in that process (“S”).	The amount of S which it is believed may generate (on its own or in combination with other substances used in the relevant process) an amount equal to or exceeding the controlled quantity of the HS in question.

NOTES TO PART 3

1. Expressions used in this Part and in the Directive have the same meaning as in the Directive.
2. The controlled quantity referred to in column 2 relates to each establishment.
3. Where S also falls within Part 1 or 2, the classification with the lowest controlled quantity applies. Where S also falls within Part 1 and Part 2, the controlled quantity which is lowest when the controlled quantities under Part 2 and Part 3 are compared applies.

EXPLANATORY NOTE

(This note is not part of the Regulations)

These Regulations consolidate the Town and Country Planning (Hazardous Substances) (Scotland) Regulations 1993 and subsequent amendments to those Regulations and make further amendments. They also implement the land-use planning aspects of Directive 2012/18/EU on the control of major-accident hazards involving dangerous substances (“Seveso III”).

Part 2 and Schedule 1 sets out the substances which are hazardous substances for the purpose of the Planning (Hazardous Substances) (Scotland) Act 1997 (“the principal Act”), the controlled quantities of those substances and exemptions from the need for hazardous substances consent.

Part 3 sets out the processes for applying for, and determining, applications for hazardous substances consent and related applications.

Part 4 implements provisions in Seveso III regarding preparation of policy, plans and programmes and land-use planning around establishments to which that Directive applies.

Part 5 contains provisions on making, and determining, appeals and on the processing of applications referred to the Scottish Ministers under section 18 of the principal Act.

Part 6 provides for the keeping of a register of hazardous substances consents.

Part 7 deals with hazardous substances contravention notices and appeals against such notices.

Part 8 contains miscellaneous provision, including provision on fees and applications by planning authorities. It also contains savings and transitional provisions.

A Business and Regulatory Impact Assessment and transposition note have been prepared and placed in the Scottish Parliament Information Centre. They can be obtained free of charge from the Scottish Government Planning Directorate, Area 2H, Victoria Quay, Edinburgh, EH6 6QQ.
