**2012 No.**

The Electricity and Gas (Energy  
Companies Obligation) Order 2012

PART 3

Determining carbon emissions reduction obligations, carbon saving  
community obligations and home heating cost reduction obligations

**Determining obligations for a supplier who is a member of a group**

**10.** Where this article applies, in respect of each of the obligations referred to in article 8(2), the supplier's obligation for a phase is—

$$J \times \left( \frac{H}{K} \right)$$

where—

“J” is the amount produced by applying the formula set out in article 9 where—

- (a) A and T have the same meaning as in that article;
- (b) Tx is the amount of electricity or gas supplied in the relevant notification period by the group to which the supplier belongs as determined in accordance with article 11;

“H” is the amount of electricity or gas notified by a supplier for the relevant notification period;

“K” is the amount of electricity or gas supplied in the relevant notification period by the group to which the supplier belongs.
