## PART I

### ALKALI WORKS AND ALKALI WASTE

#### 1 Condensation of [<sup>F1</sup>hydrochloric] acid gas in alkali works.

(1) Every alkali work shall be carried on in such manner as to secure the condensation, to the satisfaction of [<sup>F2</sup>the appropriate Agency], of the [<sup>F1</sup>hydrochloric] acid gas evolved in such work, to the extent of ninety-five per centum, and to such an extent that in each [<sup>F3</sup>cubic metre] of air, smoke, or chimney gases, escaping from the works into the atmosphere, there is not contained more than [<sup>F3</sup>0.46 gram] of [<sup>F1</sup>hydrochloric] acid.

[<sup>F4</sup>(2) The owner of any alkali work which is carried on in contravention of this section shall be guilty of an offence.]

#### Annotations:

##### Amendments (Textual)

#### 2 Prevention of discharge of noxious and offensive gas in alkali works.

(1) In addition to the condensation of [<sup>F5</sup>hydrochloric] acid gas as aforesaid, the owner of every alkali work shall use the best practicable means for preventing the escape of noxious or offensive gases by the exit flue of any apparatus used in any process carried on in the work, and for preventing the discharge, whether directly or indirectly, of such gases into the atmosphere, and for rendering such gases where discharged harmless and inoffensive, subject to the qualification that, on the basis of the amount of acid gas per [<sup>F6</sup>cubic metre], no objection shall be taken under this section by [<sup>F7</sup>the appropriate Agency] to any [<sup>F5</sup>hydrochloric] acid gas in the air, smoke, or gases discharged into the atmosphere by a chimney or other final outlet where the amount of such acid gas in each [<sup>F6</sup>cubic metre] of air, smoke, or gases so discharged does not exceed the amount limited by the last preceding section.

[<sup>F8</sup>(2) If the owner of any alkali work fails, in the opinion of the court having cognizance of the matter, to use such means, he shall be guilty of an offence.]
