**1950 No. 65**

**The Pottery (Health and Welfare) Special Regulations 1950**

**Lithographic Transfer Making**

27.—(1) Machines used in lithographic transfer making shall not be brushed down but shall be cleaned either:—

- (a) with moist materials, such as oily rags, in such a manner as not to disperse any dust into the air, or
- (b) with an efficient vacuum cleaning apparatus.

(2) All pieces of cotton wool or similar material which have been used in the process of lithographic transfer making shall:—

- (a) be kept in a suitable receptacle or receptacles which shall be provided by the occupier for the purpose, and
- (b) when no longer required for use, be removed and burnt without unreasonable delay.

(3) The cleaning of pads from lithographic transfer machines in which powdered colour is used shall be done with an efficient vacuum cleaning apparatus.
