EXPLANATORY NOTE

(This Note is not part of the Regulations.)

These Regulations, which come into force on 1st January 1972, prescribe the conditions under which goods are to be treated as goods produced or manufactured in a developing country for the purpose of any order under section 1 of the Finance Act 1971 relieving goods of such a country either wholly or in part from the duties normally chargeable under the Import Duties Act 1958.

Regulation 3 relates to goods which are to be regarded as wholly produced or manufactured in such a country.

Regulation 4 provides that generally goods which incorporate imported materials or parts shall be treated as produced or manufactured in a developing country if they have undergone in that country a sufficient change to cause them to be classified in a different tariff heading. This rule is qualified in the case of goods mentioned in Schedule 2. The performance of a process mentioned in the second column of that Schedule does not suffice to cause goods to be treated as produced or manufactured in the country in which it is carried out ; where a rule or requirement is mentioned in the third column, that rule or requirement must also be satisfied.

Regulation 5 provides that goods mentioned in Schedule 3 shall be treated as produced or manufactured in a developing country if they have undergone there the relevant process mentioned in that Schedule (notwithstanding that the process may not cause them to be classified in a different tariff heading).
