## SCHEDULE 1

## Standards for pressure heaters

## PART II

## Pressure heater burner pressures

- 1. An internal pressure of 4.2 bar.
- **2.** An internal pressure equal to any capable of being produced in the fuel container of the heater by operation of the pump in the manner described in Part I of this Schedule.
- **3.** An internal pressure equal to the lesser of the two pressures calculated, in relation to the fuel container of the heater, in accordance with the formulae set out in Part III of this Schedule.
