(2) Where the applicant is not the sole inventor or the applicants are not the joint inventors of the invention the subject of the application and the application does not contain a declared priority date which relates to an earlier relevant application as defined in section 5(5)(b), a sufficient number of copies of Patents Form No. 7/77 shall be filed by the applicant or applicants within the said period to enable the comptroller to send one to each inventor who is not one of the applicants.

(3) Where the application is an application for a European patent (UK) which by virtue of section 81 is to be treated as an application for a patent under the Act, the requirements of paragraphs (1) and (2) above shall be treated as having been complied with to the extent that the requirements of rule 17 of the Implementing Regulations to the European Patent Convention have been fulfilled.

(4) Where the application is an international application for a patent (UK) which is to be treated as an application for a patent under the Act, the requirements of paragraphs (1) and (2) above shall be treated as having been complied with to the extent that the requirements of rules 4.1(a)(v) and 4.6 of the Regulations made under the Patent Co-operation Treaty have been fulfilled.

(3) The title shall be short and indicate the matter to which the invention relates.

(4) The description shall include a list briefly describing the figures in the drawings, if any.

*Micro-organisms*

**17.**—(1) Without prejudice to the provisions of section 14(3), to the extent that the specification of an application for a patent or of a patent discloses an invention which requires for its performance the use of a micro-organism

which is not available to the public at its date of filing, the specification shall be treated for the purposes of the Act as disclosing the invention in a manner which is clear enough and complete enough for the invention to be performed by a person skilled in the art if either of the following conditions is satisfied, that is to say—

- (a) (i) a culture of the micro-organism has been deposited in a culture collection not later than the date of filing the application;
  - (ii) the application as filed gives such relevant information as is available to the applicant on the characteristics of the micro-organism; and
  - (iii) the name of the culture collection, the date when the culture was deposited and the accession number of the deposit are given in the specification of the application; or
- (b) in the case of a European patent (UK) or an application for a European patent (UK) which is treated, by virtue of section 77 or 81, as a patent under the Act, or, as the case may be, an application for a patent under the Act, that the corresponding provisions of the Implementing Regulations to the European Patent Convention have been complied with,

and where paragraph (3) below applies, that the applicant or proprietor makes a new deposit in accordance with that paragraph.

(2) Where the information specified in paragraph (1)(a)(iii) above is not contained in an application for a patent as filed, it shall be added to the application within the period of two months after the date of filing the application. The giving of this information shall be considered as constituting the unreserved and irrevocable consent of the applicant to the culture deposited being made available to any person who, on or after the date of publication of the application in accordance with section 16, makes a valid request therefor to the culture collection with which the micro-organism is deposited. A request shall be valid if it is accompanied by the comptroller's certificate authorising the release of the sample to that person. An application for such a certificate shall be submitted to the comptroller on Patents Form No. 8/77, together with—

- (a) an undertaking not to make the culture available to any other person until the application for the patent is refused or withdrawn or deemed to be withdrawn or, if a patent is granted, until it ceases to have effect without the possibility of renewal or restoration in accordance with sections 25 and 28; and
- (b) an undertaking to use the culture for experimental purposes only until the application is refused or withdrawn or deemed to be withdrawn or until the date of publication in the Journal of a notice that the patent has been granted:

Provided that the undertaking specified in sub-paragraph (b) of this paragraph shall not be required from any government department or person authorised in writing by a government department to make the request, where the request is being made in order to enable any act specified in section 55 to be done in relation to the culture for the services of the Crown.

(3) Where a culture collection notifies the applicant or proprietor that it cannot, for any reason, satisfy a valid request, made in accordance with paragraph (2) above, for a sample of a culture which has been deposited with it,

and in particular because the furnishing of the sample would require that it be sent outside the country in which the culture collection is situated and the sending or the receipt of the sample is prevented by export or import restrictions, the applicant or proprietor may, unless the culture has been transferred to another culture collection which is able to satisfy a request for a sample of that culture, make a new deposit of a culture of that micro-organism and if, within three months of receipt of such notification—

- (i) he makes the new deposit;
- (ii) he furnishes to the culture collection with which the new deposit is made a declaration claiming that the culture so deposited is of the same micro-organism as was the culture originally deposited; and
- (iii) he amends the specification so as to indicate the accession number of the new deposit and, where applicable, the name of the culture collection with which the new deposit has been made,

the new deposit shall be treated as always having been available for the purposes of this rule.

(4) The new deposit referred to in paragraph (3) above shall be made with the same culture collection as was the original deposit, except in the particular case described in that paragraph, when the new deposit shall be made with a culture collection which is able to satisfy the request.

(5) The comptroller shall send a copy of Patents Form No. 8/77 to the applicant for, or proprietor of, the patent.

#### *Drawings*

**18.—**(1) Drawings forming part of an application for a patent made under section 14 shall be on sheets the usable surface area of which shall not exceed 26.2 cm by 17 cm. The sheets shall not contain frames round the usable or used surface. The minimum margins shall be as follows—

top	2.5 cm.
left side	2.5 cm.
right side	1.5 cm.
bottom	1.0 cm.

(2) Drawings shall be executed as follows—

- (a) without colouring in durable, black, sufficiently dense and dark, uniformly thick and well-defined lines and strokes to permit satisfactory reproduction;
- (b) cross-sections shall be indicated by hatching which does not impede the clear reading of the reference signs and leading lines;
- (c) the scale of the drawings and the distinctness of their graphical execution shall be such that a photographic reproduction with a linear reduction in size to two-thirds would enable all details to be distinguished without difficulty. If, as an exception, the scale is given on a drawing, it shall be represented graphically;
- (d) all numbers, letters, and reference signs, appearing on the drawings shall be simple and clear and brackets, circles and inverted commas shall not be used in association with numbers and letters;

- (e) elements of the same figure shall be in proportion to each other, unless a difference in proportion is indispensable for the clarity of the figure;
  - (f) the height of the numbers and letters shall not be less than 0.32 cm and for the lettering of drawings, the Latin and, where customary, the Greek alphabets shall be used;
  - (g) the same sheet of drawings may contain several figures. Where figures drawn on two or more sheets are intended to form one whole figure, the figures on the several sheets shall be so arranged that the whole figure can be assembled without concealing any part of the partial figures. The different figures shall be arranged without wasting space, clearly separated from one another. The different figures shall be numbered consecutively in arabic numerals, independently of the numbering of the sheets;
  - (h) reference signs not mentioned in the description or claims shall not appear in the drawings, and vice versa. The same features, when denoted by reference signs, shall, throughout the application, be denoted by the same signs;
  - (i) the drawings shall not contain textual matter, except, when required for the understanding of the drawings, a single word or words such as "water", "steam", "open", "closed", "section on AA", and, in the case of electric circuits and block schematic or flow sheet diagrams, a few short catchwords;
  - (j) the sheets of the drawings shall be numbered in accordance with rule 20(10) below.
- (3) Flow sheets and diagrams shall be considered to be drawings for the purposes of these Rules.

*The abstract*

**19.**—(1) The abstract shall commence with a title for the invention.

(2) The abstract shall contain a concise summary of the matter contained in the specification. The summary shall indicate the technical field to which the invention belongs and be drafted in a way which allows a clear understanding of the technical problem to which the invention relates, the gist of the solution to that problem through the invention and the principal use or uses of the invention. Where appropriate, the abstract shall also contain the chemical formula which, among those contained in the specification, best characterises the invention. It shall not contain statements on the alleged merits or value of the invention or on its speculative application.

(3) The abstract shall normally not contain more than 150 words.

(4) If the specification contains any drawings, the applicant shall indicate on Patents Form No. 1/77 the figure or, exceptionally, the figures of the drawings which he suggests should accompany the abstract when published. The comptroller may decide to publish one or more other figures if he considers that they better characterise the invention. Each main feature mentioned in the abstract and illustrated by a drawing shall be followed by the reference sign used in that drawing.

(5) The abstract shall be so drafted that it constitutes an efficient instrument for the purposes of searching in the particular technical field, in particular by

making it possible to assess whether there is a need to consult the specification itself.

*Size and presentation of documents*

20.—(1) All documents other than drawings, making up an application for a patent or replacing such documents, shall be in the English language.

(2) The specification, abstract and any replacement sheet thereof shall be filed in duplicate.

(3) All documents referred to in paragraph (1) above, including drawings, shall be so presented as to permit of direct reproduction by photography, electrostatic processes, photo offset and micro-filming, in an unlimited number of copies. All sheets shall be free from cracks, creases and folds. Only one side of the sheet shall be used, except in the case of a request for the grant of a patent.

(4) All such documents and drawings shall be on A4 paper (29.7 cm. × 21 cm.) which shall be pliable, strong, white, smooth, matt and durable. Each sheet (other than drawings) shall be used with its short sides at the top and bottom (upright position).

(5) The request for the grant of a patent and the description, claims, drawings and abstract shall each commence on a new sheet. The sheets shall be connected in such a way that they can easily be turned over, separated and joined together again.

(6) Subject to rule 18(1), the minimum margins shall be as follows:

top	2 cm.
left side	2.5 cm.
right side	2 cm.
bottom	2 cm.

(7) The margins of the documents making up the application and of any replacement documents must be completely blank.

(8) In the application, except in the drawings—

(a) all sheets in the request shall be numbered consecutively; and

(b) all other sheets shall be numbered consecutively as a separate series,

and all such numbering shall be in arabic numerals placed at the top of the sheet, in the middle, but not in the top margin.

(9) In the application every fifth line of each sheet of the description and the claims shall be numbered in arabic numerals placed to the left of the relevant lines but to the right of the margin.

(10) All sheets of drawings contained in the application shall be numbered consecutively as a separate series. Such numbering shall be in arabic numerals placed at the top of the sheet, in the middle, but not in the top margin.

(11) Every document (other than drawings) referred to in paragraph (1) above shall be typed or printed in a dark, indelible colour in at least  $1\frac{1}{2}$  line spacing and in characters of which the capital letters are not less than 0.21 cm. high: Provided that Patents Form No. 1/77 may be completed in writing, and that graphic symbols and characters and chemical and mathematical formulae may be written or drawn, in a dark indelible colour.

(12) The request for the grant of a patent, the description, the claims and the abstract shall not contain drawings. The description, the claims and the abstract may contain chemical or mathematical formulae. The description and the abstract may contain tables. The claims may contain tables only if their subject-matter makes the use of tables desirable.

(13) In all documents referred to in paragraph (1) above, including drawings, units of weight and measures shall be expressed in terms of the metric system. If a different system is used they shall also be expressed in terms of the metric system. Temperatures shall be expressed in degrees Celsius. For the other physical values, the units recognised in international practice shall be used, for mathematical formulae the symbols in general use, and for chemical formulae the symbols, atomic weights and molecular formulae in general use shall be employed. In general, use should be made of technical terms, signs and symbols generally accepted in the field in question.

(14) If a formula or symbol is used in the specification a copy thereof, prepared in the same manner as drawings, shall be furnished if the comptroller so directs.

(15) The terminology and the signs shall be consistent throughout the application.

(16) All documents referred to in paragraph (1) above, including drawings, shall be reasonably free from deletions and free from other alterations, overwritings and interlineations and shall, in any event, be legible.

*Form of statements, counter-statements and evidence*

**21.** Any statement, counter-statement or evidence filed at the Patent Office shall, unless the comptroller otherwise directs, comply with the requirements of rule 20(1) and (4) and, except that both sides of the sheet may be used in the case of statutory declarations and affidavits, with the requirements of rule 20(3).

*Claims in different categories*

**22.** Without prejudice to the generality of section 14(5)(d), an application for a patent which includes—

- (a) in addition to an independent claim for a product, an independent claim for a process specially adapted for the manufacture of the product, and an independent claim for a use of the product; or
- (b) in addition to an independent claim for a process, an independent claim for an apparatus or means specifically designed for carrying out the process; or
- (c) in addition to an independent claim for a product, an independent claim for a process specially adapted for the manufacture of the product, and

an independent claim for an apparatus or means specifically designed for carrying out the process,  
shall be treated as relating to a group of inventions which are so linked as to form a single inventive concept.

*Late filed drawings*

23. The period prescribed for the purposes of section 15(2) and (3) shall be one month calculated from the date on which the Patent Office sends out notification to the applicant that the drawing has been filed later than the date which is, by virtue of section 15(1), to be treated as the date of filing the application or, as the case may be, that it has not been filed.

*New applications under section 15(4)*

24.—(1) A new application which includes a request that it shall be treated as having as its date of filing the date of filing of an earlier application for a patent may be filed in accordance with section 15(4)—

- (a) in a case where the new application is filed after the earlier application has been amended in pursuance of section 18(3) so as to comply with the requirements of section 14(5)(d), within two months of such amendment; and
- (b) in a case which does not fall within sub-paragraph (a) above, at any time after filing of the earlier application, provided that where the new application is filed after the first report of the examiner under section 18 has been sent to the applicant—
  - (i) if the report is made under section 18(3), the new application shall be filed before the end of the period specified for reply to that report, unless the comptroller agrees otherwise; and
  - (ii) if the report is made under section 18(4), the new application shall be filed within two months of that report being sent to the applicant,

and in any event, any new application shall be made before the earlier application has been refused, withdrawn or taken to be withdrawn and before the expiration of the period prescribed for the purposes of section 20(1).

(2) Where possible, the description and drawings of the earlier application and the new application shall respectively relate only to the matter for which protection is sought by that application. However, when it is necessary for an application to describe the matter for which protection is sought by another application, it shall include a reference by number to that other application.

(4) Where the declared priority date referred to in sub-paragraph (b) of paragraph (1) or sub-paragraph (b) of paragraph (2) above is the date of filing of such an application made before 1st June 1978 as is referred to in section 127(4), those sub-paragraphs shall have effect as if for the references therein to periods of twelve months there were substituted references to periods of fifteen months.

#### *Extensions for new applications*

26.—(1) Where a new application is filed under section 8(3), 12(6), 15(4) or 37(4) after the period of sixteen months prescribed in either rule 6 or rule 15 above, then, subject to paragraph (3) below, the requirements of those rules shall be complied with at the time of filing the new application.

(3) Where the preliminary examination reveals that an earlier relevant application declared for the purposes of section 5 has been stated in the application in suit to have a date of filing more than twelve months before the date of filing of the application in suit, the Patent Office shall notify the applicant that the earlier relevant application will be disregarded unless, within one month, he supplies the Patent Office with a corrected date, being one which falls within those twelve months.

*Address for service*

**30.** Every person concerned in any proceedings to which these Rules relate and every proprietor of a patent shall furnish to the comptroller an address for service in the United Kingdom and that address may be treated for all purposes connected with such proceedings or patent as the address of the person concerned in the proceedings or the proprietor of the patent.

*Formal requirements*

(3) If the applicant requests a hearing within the time allowed, the comptroller shall, after giving the applicant an opportunity of being heard, determine whether the application shall be allowed or refused.

(4) If the comptroller decides to allow the application, he shall notify the applicant accordingly and require him to file Patents Form No. 17/77, together with Patents Form No. 12/77, duly completed, and the amount of the unpaid renewal fee, upon receipt of which the comptroller shall order the restoration of the patent and advertise the fact in the Journal.

## EXPLANATORY NOTE

*(This Note is not part of the Rules.)*

These Rules consolidate, with modifications, the Patents Rules 1978 as amended. The principal modifications are—

- (a) paragraph (3) of rule 5 (International exhibitions) provides for statements to be published in the Official Journal (Patents) that an exhibition is an international exhibition for the purposes of section 130(1) of the Patents Act 1977 (“the Act”);
- (b) paragraph (3) of rule 6 (Declaration of priority for the purposes of section 5) has been amended to make different procedural provisions for applications filed under section 15(4) and other applications;
- (c) rule 20 (Size and presentation of documents) contains new requirements for documents making up an application for a patent;
- (d) paragraph (1) of rule 39 (Renewal fees) has been amended to redefine the period for the payment of renewal fees in respect of patents granted in the three months before the expiry of the fourth or any succeeding year from the date of filing an application for a patent;
- (e) rule 48 (Request as to payment of renewal fee) provides a new procedure for obtaining information about payment of renewal fees which will no longer be recorded in the register;
- (f) rule 90 (Agents) modifies the present requirement for an agent in all cases to produce evidence of his authority to act by providing for him to do so where, after his principal has become a party to proceedings before the comptroller, he is appointed for the first time or there is a change of agent;
- (g) paragraph (5)(e) of rule 93 (Inspection of documents under section 118) extends the provision that no request for information made under rule 92 shall be open to inspection to requests under rules 48, 49(2) and 93;
- (h) Schedule 1 increases most of the fees payable under the Act. The new fees are payable on or after 12th July 1982 except in the case of certain renewal fees paid in advance. Fees payable for the renewal of a patent in respect of any year beginning on or after 12th July 1982 are increased on 14th June 1982;
- (i) Schedule 2 contains revised forms for the purposes of the Act;
- (j) Schedule 4 contains revised forms for patents and applications to which the Patents Act 1949 applies.
