1983 No. 1390

**The Measuring Equipment (Liquid Fuel
delivered from Road Tankers) Regulations 1983**

PART II

**PRINCIPLES OF CONSTRUCTION AND
MARKING OF MEASURING EQUIPMENT**

Dipstick measuring systems

33.—(1) Every compartment number shall be marked—

- (a) legibly and permanently in line with the dipstick guide tube on the same side of the tank as the outlet valves so that the number is legible from the ground; and
- (b) legibly, permanently and conspicuously adjacent to the compartment's outlet valve.

(2) The nominal capacity of each compartment and the minimum quantity of fuel which may be delivered by the use of a dipstick from each compartment shall be marked legibly, permanently and conspicuously on the same side of the tank as the outlet valves with the same unit of measurement as is used for marking the dipstick.

(3) A legible, permanent and conspicuous notice shall be positioned on the same side of the tank as the outlet valves stating that dipsticks should be read at scale marks only.
