EXPLANATORY NOTE

(This Note is not part of the Regulations.)

These Regulations further amend the Merchant Shipping (Crew Accommodation) Regulations 1978. The amendment relates to showers where the mixing valve, which allows the temperature of the water to be varied by the user, is thermostatically controlled. The permitted range for the maximum temperature of the shower water in such cases is now 38–43°C. instead of 35–40°C. (which remains the range for other such mixing valves).
