

SCHEDULE 2

SPECIAL REQUIREMENTS IN RELATION TO AND IN CONNECTION WITH THE HEAT TREATMENT OF SEMI-SKIMMED MILK AND SKIMMED MILK

PART II

sterilisation

B. Additional conditions applicable when the milk is heated by a continuous-flow method

3. Any apparatus in which the milk is to be heated as aforesaid by a continuous-flow method shall be provided with a device which shall automatically divert the flow of any milk which is not raised to the authorised temperature and automatically record each operation of the device. Such record shall be dated and preserved for a period of not less than three months.
