EXPLANATORY NOTE

(This note is not part of the Order)

This Order is made consequent upon a review under section 148 of the Social Security Administration Act 1992 (c. 5).

The Order directs that the earnings factors relevant to the calculation of the additional pension in the rate of any long-term benefit or of any guaranteed minimum pension or to any other calculation required under Part III of the Social Security Pensions Act 1975 for the tax years specified in the Schedule to the Order are to be increased by the percentage of their amount specified in that Schedule. The percentage for the tax year 1992-93 is 5 per cent. and those for earlier tax years have been increased so that the earnings factors for those years are revalued at 1992-93 earnings levels.

The Order also provides for the rounding of fractional amounts for earnings factors relevant to the calculation of the additional pension in the rate of any long-term benefit. Rounding for the purpose of the calculation of any guaranteed minimum pension is not required by virtue of section 23(2) of the Social Security Contributions and Benefits Act 1992 (c. 4).
