

SCHEDULE

PRESERVED SECTIONS OF THE NORTH OF SCOTLAND MILK MARKETING SCHEME 1934

Expenses of collection of milk

21.—(4) The cost of collecting milk from registered end year producers shall be an expense chargeable to the general fund, but in the event of the Board considering that any such collection is unreasonably difficult or unduly onerous or costly (whether by reason of difficulty of access, or inconvenience of location, or any other reason) then the Board may, in such a case, assess a Special Collection Charge. The amount of such a charge shall be fairly related to the actual extra cost of the collection compared to the average cost of collection as assessed by the Board, and shall be debited against the account of the individual producer concerned.
