

SCHEDULE 11**METHODS OF ANALYSIS**

5. In relation to the following tests, the methods for the analysis and testing shall be those specified below—

<i>Test</i>	<i>Method</i>
(a) Enumeration of <i>Staphylococcus aureus</i>	Provisional IDF Standard 145: 1990; Milk and milk-based products. Enumeration of <i>Staphylococcus aureus</i> in products other than dried milk—Colony count technique at 37°C.
(b) Enumeration of <i>Staphylococcus aureus</i> in powdered milk	Provisional IDF Standard 138: 1986; Dried Milk. Enumeration of <i>Staphylococcus aureus</i> . Colony count technique at 37°C.
(c) Detection of <i>Salmonella</i> spp	ISO 6597: 1993; Microbiology— General guidance on methods for the detection of <i>Salmonella</i> and IDF Standard 93A: 1985; sample preparation.
(d) Detection of <i>Listeria monocytogenes</i>	ISO 10560: 1993; Milk and milk products— Detection of <i>Listeria monocytogenes</i> .
(e) Enumeration of <i>Escherichia coli</i> in milk-based products	Provisional IDF standard 170: 1994. Milk and milk products—Enumeration of presumptive <i>Escherichia coli</i> content by: (i) Most probable number technique. (ii) most probable number technique with use of 4-methylumbelliferyl - β -D-glucuronide (MUG). (iii) Colony count technique at 44°C using membranes.
(f) Detection of phosphatase (Residual) in cream	AOAC official method 950.41: Official Methods of Analysis, 16th edition: 1995.
(g) Detection of phosphatase (Reactivated and Residual) in cream	AOAC official method 965.27: Official Methods of Analysis, 16th edition: 1995.
