

Status: This is the original version (as it was originally made). This item of legislation is currently only available in its original format.

SCHEDULE 2

General requirements for packages and packaging

12. In addition to the radioactive properties, any other dangerous properties of the contents of a package, such as explosiveness, flammability, pyrophoricity, chemical, toxicity, corrosiveness and (as in the case of UF_6) the possibility of the formation of products having dangerous properties by interaction of the contents with the atmosphere or with water shall be taken into account.
