

SCHEDULE 10

(Annex XI to the Lifts Directive) CONFORMITY TO TYPE WITH RANDOM CHECKING (module C)

4. A notified body chosen by the manufacturer must carry out or have carried out checks on safety components at random intervals. An adequate sample of the finished safety components, taken on site by the notified body, must be examined and appropriate tests as set out in the relevant standard(s) referred to in Article 5, or equivalent tests, must be carried out to check the conformity of production to the relevant requirements of the Directive. In those cases where one or more of the safety components checked do not conform, the notified body must take appropriate measures.

The points to be taken into account when checking the safety components will be defined by joint agreement between all the notified bodies responsible for this procedure, taking into consideration the essential characteristics of the safety components referred to in Annex IV.

On the responsibility of the notified body, the manufacturer must affix that body's identification number during the manufacturing process.
