(3D) The conditions of a project licence shall include such conditions as the Secretary of State considers appropriate to ensure—

- (a) that where a protected animal has been subjected to a series of regulated procedures for a particular purpose, at the conclusion of the series a veterinary surgeon or, if none is available, another suitably qualified person determines whether the animal should be killed or kept alive;
- (b) that, if that person considers that it is likely to remain in lasting pain or distress, the animal is killed by a method appropriate to the animal under Schedule 1 to this Act, or by such other method as may be authorised by the personal licence of the person by whom the animal is killed; and

that animal shall not be used for any further regulated procedures which will entail severe pain or distress.

(2) Where a protected animal has been subjected to a series of regulated procedures for a particular purpose and has been given a general anaesthetic for any of those procedures and been allowed to recover consciousness, that animal shall not be used for any further regulated procedures unless the Secretary of State has given his consent to such further use and—

- (a) the procedure, or each procedure, for which the anaesthetic was given consisted only of surgical preparation essential for a subsequent procedure; or

“SCHEDULE 2A

Section 10(2A).

ARTICLE 8 OF COUNCIL DIRECTIVE No. 86/609/EEC

1. All experiments shall be carried out under general or local anaesthesia.
2. Paragraph 1 above does not apply when:
 - (a) anaesthesia is judged to be more traumatic to the animal than the experiment itself;
 - (b) anaesthesia is incompatible with the object of the experiment. In such cases appropriate legislative and/or administrative measures shall be taken to ensure that no such experiment is carried out unnecessarily.

Anaesthesia should be used in the case of serious injuries which may cause severe pain.

3. If anaesthesia is not possible, analgesics or other appropriate methods should be used in order to ensure as far as possible that pain, suffering, distress or harm are limited and that in any event the animal is not subject to severe pain, distress or suffering.

4. Provided such action is compatible with the object of the experiment, an anaesthetised animal, which suffers considerable pain once anaesthesia has worn off, shall be treated in good time with pain-relieving means or, if this is not possible, shall be immediately killed by a humane method.”.
