## SCHEDULE 1

## ACCURACY CLASSIFICATION OF NON-AUTOMATIC WEIGHING MACHINES

## PART V

## MACHINES DESIGNATED CLASS IIII

- 16. A machine which is—
  - (a) made in accordance with an approved pattern and which is or could be marked

, or

- (b) first stamped before 1st November 1988 in accordance with the provisions for crane weighing machines constructed upon the hydraulic principle in the Weights and Measures Regulations 1963, or
- (c) of the type referred to as "approximate weighers" and first stamped before 1st November 1988, or
- (d) of a type referred to as "common form" and which was first stamped before 1st November 1988,

is a Class IIII machine.

17. The specifications for non-graduated and graduated Class IIII machines are given in Table 4.
