

SCHEDULE 2

ANNEX II OF THE PPE DIRECTIVE

BASIC HEALTH AND SAFETY REQUIREMENTS

Impact caused by falling or projecting objects and collision of parts of the body with an obstacle

3.1.1. Suitable PPE for this type of risk must be sufficiently shock-absorbent to prevent injury resulting, in particular, from the crushing or penetration of the protected part, at least up to an impact-energy level above which the excessive dimensions or mass of the absorbing device would preclude effective use of the PPE for the foreseeable period of wear.
